Ordered By: Salmon/Challis NF 208-756-5157	A Number: A #124	Aircraft/Scanner System: N350FV / Tenax	Pilots/Techs: Tech: John
IRIN Comments on imagery: Overall good imagery, a few little striation/hash-marks but nothing to ruin image. Two passes		Weather at time of flight: Clear.	Flight Objective: IR heat perimeter and heat sources
Date /Time Imagery Received by Interpreter: 9/15/2021 @ 2236 MDT		Type of media for final product: IRIN Daily Log, Shapefiles, KML, PDF Maps, Geodatabase	
Date /Time products delivered 09/16/2021 0300 MDT posted to NIFS and FTP		Digital files sent to: https://ftp.wildfire.gov/incident_specific_data/great_basin/2021_Incidents/2021_Mudlick/IR/ and uploaded to NIFS IR Polygon feature class Emailed to: <u>N/A – no contact info provided in scan order</u>	
<p>Comments</p> <p><i>Starting perimeters obtained from NIFS features service, pulled at around @2000 MDT September 15.</i></p> <p><i>No incident contact; posted products to NIFS and FTP only.</i></p> <p>No change in heat perimeter acreage. There is a new scattered heat polygon in the northwest section of Heat Perimeter: southeast of Indian Point. Scattered heat still appears northeast of Deer Lake, although it is decreasing since the last flight on 20210911. There are also a few isolated heat signatures on the north near Gant Ridge (East of Indian Point) and Deer Lake.</p>
