...FLASH FLOOD WATCH IN EFFECT UNTIL 11 PM MDT THIS EVENING...

Any shower or thunderstorm this evening will produce heavy rain that could cause local flooding. Showers and thunderstorms this evening should mostly end by midnight. There will be another chance of showers and thunderstorms in the afternoon but showers and storms should not be as heavy or widespread as today. Snag & Contour

Felling Safety Message

Size-up hazards in the work area.

Never become complacent.

Always look up.

Get wind/weather report.

SODA LAKE FIRE – 8/01/21 – 0600-2200

Snag and contour felling considerations include:

- 1) Use saw teams and Falling Bosses.**
- 2) Post lookouts concentrating on snags.**
- 3) All sawyers assure themselves a quick and safe escape route from the tree they are falling.**
- 4) Do not turn your back on a falling snag.**
- 5) Snag fire access routes as necessary – roads, trails, and drop points.**
- 6) Keep crews spread out – Don't bunch up.**
- 7) Two sets of eyes are better than one.**
- 8) Heads up for erratic winds from storm cells.**
- 9) Stay well clear of all air operations including cargo drops, water drops, slurry drops, low level flights, arrivals and departures at helispots, etc.**
- 10) Consider the domino effect when determining safe distances from hazard snags.**
- 11) If a crew doesn't have a qualified saw with them to mitigate hazard snags, they should just stay entirely clear from identified hazard snags.**
- 12) Consider green trees as hazards also – burned out stems or root systems pose a serious safety hazard.**
- 13) Watch for burned out root systems on snags and green trees as well, especially several days into the incident – a sound snag or tree today may not be tomorrow.**

LOOK UP - LOOK DOWN - LOOK ALL AROUND
