<b>Date and Time Products Delivered to Incident:</b> 7/24/2022 @ 0205 PDT		<b>Digital files sent to:</b> NIFS, NIFC FTP.	
<b>Comments / notes on tonight's mission and this interpretation:</b> Tonight's mapping used the previous night's IR as a base for mapping. Perimeter growth was mapped to the northwest in the area of Doe Canyon with scattered and intense heat. Additional growth was also mapped to the east south of Bull Mountain in the Horse Canyon drainage. This area of growth also exhibited intense heat along the perimeter. Much yesterday's growth is now showing scattered heat.
