<b>Comments /notes on tonight's mission and this interpretation:</b> Still very active fire. Started interpretation with NIFS Wildfire Event Poly pulled 08/21/2022 @ 2115 MDT Incident made adjustments to daily fire perimeter based on dozer line and black line from ground observations. The heat perimeter continues to grow. Previous IR acres 7,822 mapped 7,986 acres in the extending to the east and southwest. Potential heat source @ 116.0886729°W 44.4924795°N (could be backyard grill) in residential area off W Mountain Road. Still a lot of intense heat along entire perimeter. Lots of scattered heat throughout the interior. Lots of small area outside main perimeter along the east and south borders.
