<b>Comments / notes on tonight's mission and this interpretation:</b> Started interpretation with NIFS Wildfire Event Poly pulled 08/27/2022 @ 0021 MDT The heat perimeter continues to grow. Previous IR acres 9,206 mapped 10,182 acres. SE, SW and East Perimeter seeing lots of activity as expected per GISS on incident. Growth on the southern tip of perimeter toward Wilson Peak with lots of intense heat in that area. There are large areas of intense heat along east perimeter. Additional growth in the NE corner toward lake north of Silver Creek. Several isolated heat sources east of the lake, could be campfires. Couple of isolated heat sources SW of the perimeter along 3 <sup>rd</sup> Fork Road and the creek, could also be campfires.
