<b>6. Control Operations/Work Assignments:</b>						
<b>DIV A</b>						
Secure and mop-up the along the line in the area of the burnout operation to the extent necessary to prevent any potential flare ups or spots that could threaten the line. Continue to maintain careful watch for any potential threats to the control line from the A/W break to the A/D break.						
Prepare for any backhaul and demobilization of unneeded resources and supplies.						
Successful completion of this would further secure the containment lines, minimizing the potential fire impacts to the Virginia Hills subdivision, and surrounding residences.						
Coordinate with the READ on suppression repair needs utilizing the excavator.						
<b>DIV D</b>						
Utilize the tactics that will provide the highest probability of success in securing the fires edge around Horse Hollow, further minimizing fire growth and potential impacts to the water ways during heavy rain events.						
Work to establish better depth off the indirect handline, in coordination with the aerial ignition operation.						
Successfully securing this line will minimize the potential for future fire spread to the north into the North Fork of Chalk Creek drainage, and west towards the community.

**Common Sense, Training and Experience  
= A SAFE Assignment**

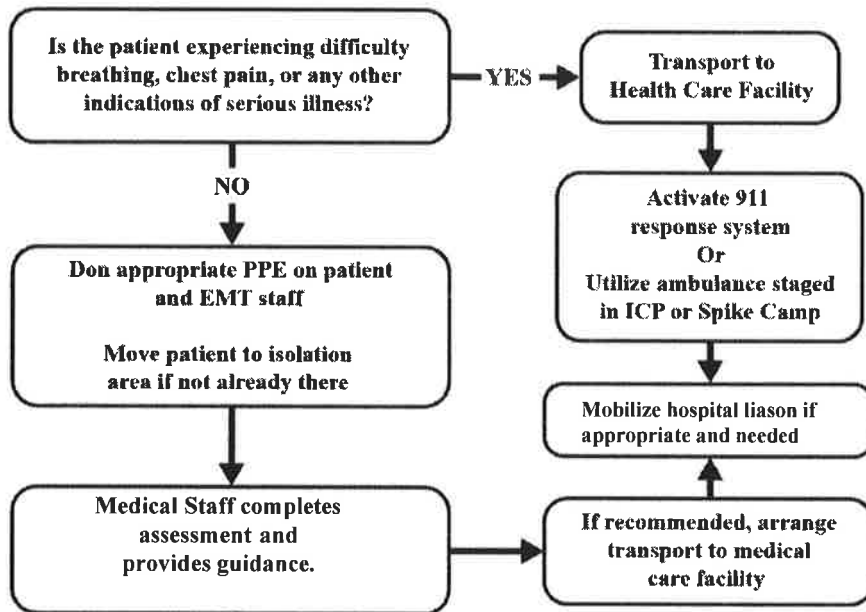

- **Working in steep terrain with rolling material. Watch your footing, maintain spacing, limit exposure, and keep adjacent crews informed of known hazards where/when possible.**
- **Continue with hydration and “personal housekeeping”. Pace your work, take care of yourselves and look out for each other’s wellbeing.**

**Fire Order of the Day Stay alert, keep calm, think clearly, act decisively**

Yes, it’s the same old fire, we are going to work in the same old places. Weather is hot and dry again. A few spots near the line smoking. So.... Tell me something new. Now is NOT the time to get complacent. Not the time to forget the basics. Not the time to let down your guard. Remember the common denominators of fire behavior on tragedy fires!! Continuous monitoring of RISK ASSESSMENT utilizing the Incident Response Pocket Guide, keep monitoring what you are doing and making the necessary adjustment.

An individual is identified with a possible COVID-19 infection based on the screening tool.

**Cough more than expected? Shortness of breath or difficulty breathing? Fever? Chills? Muscle pain outside your normal for firefighting? Sore throat? New loss off taste or smell? Temperature greater than 100.4?**

**NWCG COVID Screening Tool**

**Following COVID-19 Test Results options are:**

- Return to work**
- Isolate**
- Demobilization off Incident**
