Spot Forecast for Halfway Hill Fire
National Weather Service Salt Lake City UT
248 PM MDT Tue Jul 26 2022

.DISCUSSION...The moisture gradient will remain near the forecast site, with abundant moisture to the south and much drier air to the north. As such, expect isolated to scattered showers and thunderstorms to develop over the higher terrain near the burn Wednesday through the end of the week. While these showers and thunderstorms will have the potential to produce brief heavy rain and gusty outflow winds, overall rainfall is not expected to be especially large, with storm totals each day most likely remaining around a half inch of water or less each day. However, an outside chance of higher amounts exist, due to slow storm motions.

.WEDNESDAY...

Sky/weather.....Partly sunny (50-60 percent cloud cover). A chance of showers and thunderstorms in the afternoon.

Chance of pcpn.....30 percent.

CWR.....15 percent.

LAL.....1 until 1200, then 4.

Max temperature.....82-85.

Min humidity.....22-25%.

Wind (20 ft).....Northeast winds 3-6 mph becoming northwest
5-9 mph with gusts to 16 mph after 1100.

Chance of pcpn.....10 percent.

CWR.....5 percent.

LAL.....1.

Min temperature.....64-67.

Max humidity.....45-48%.

Wind (20 ft).....Northwest winds 5-9 mph with gusts to 16 mph
becoming east-northeast 3-6 mph after 2100.

6. Control Operations/Work Assignments:						
DIV A						
Secure and mop-up the along the line in the area of the burnout operation to the extent necessary to prevent any potential flare ups or spots that could threaten the line. Continue to maintain careful watch for any potential threats to the control line from the A/W break to the A/D break.						
Prepare for any backhaul and demobilization of unneeded resources and supplies.						
Successful completion of this would further secure the containment lines, minimizing the potential fire impacts to the Virginia Hills subdivision, and surrounding residences.						
Coordinate with the READ on suppression repair needs.						
DIV D						
Utilize the tactics that will provide the highest probability of success in securing the fires edge around Horse Hollow, further minimizing fire growth and potential impacts to the water ways during heavy rain events.						
Successfully securing this line will minimize the potential for future fire spread to the north into the North Fork of Chalk Creek drainage, and west towards the community.						
DIV W						
Continue to regularly check the line through the most appropriate method to ensure nothing will impact the containment along the control lines.

SNAG & HAZARD TREE SAFETY

ENVIRONMENTAL/OPERATIONAL CONDITIONS THAT INCREASE SNAG HAZARDS

- Strong winds
- Night operations
- Steep Slopes
- Diseased or bug-kill areas
- Helicopter bucket drops and rotor down drafts
- Retardant drops
- Vibrations from heavy equipment and motor vehicles operating nearby

HAZARD TREE INDICATORS

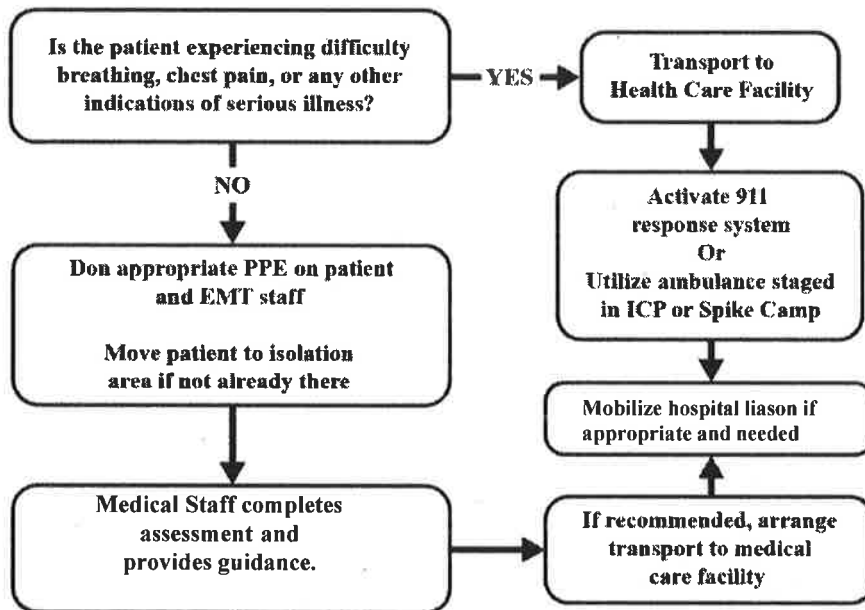

- Trees have been burning for an extended period of time
- High risk tree species (rot and shallow root system, i.e., cypress)
- Numerous down trees
- Dead or broken tops and limbs overhead
- Accumulation of down limbs
- Absence of needles, bark or limbs
- Leaning or hung-up trees

RULES TO REMEMBER

- Maintain hazard tree awareness at all times for all firefighters.
- Emphasize standard firefighting orders, and Situations that Shout “Watch Out”.
- Include “SNAG INTELLIGENCE” in all fire suppression discussions and briefings; i.e., expected burn through time, location and marking, areas of snags, additional hazards due to slope, etc.
- Be aware of complacency on fires of all sizes during all phases; particularly during non-threatening and uneventful periods.
- Direct and train all firefighters to do their own safety assessments, and encourage all to interact with their supervisors to ensure better safety.

An individual is identified with a possible COVID-19 infection based on the screening tool.

Cough more than expected? Shortness of breath or difficulty breathing? Fever? Chills? Muscle pain outside your normal for firefighting? Sore throat? New loss of taste or smell? Temperature greater than 100.4?

NWCG COVID Screening Tool

Following COVID-19 Test Results options are:
Return to work
Isolate
Demobilization off Incident
