### Fire Order of the Day: Keep informed of fire weather conditions and forecasts

Evaluate the forecasts provided in IAP  
What are your spot weather forecasts telling you?

## Risk Management

- Establish situation awareness.
- Identify hazards and assessing the risk.
- Control or eliminate hazards.
- Make decisions based on acceptability of remaining risk.
- Evaluate effectiveness of hazard controls and continuously reevaluate the situation.

## Human Factor Watch Outs

Watching out for yourself, coworkers, subordinates and your boss is a primary responsibility for everyone involved in high-risk activities. Watch outs are not just for the tactical environment. The Human Factor Watch Outs are designed to create an opportunity for you to take a tactical pause and re-evaluate your situation.

If any of the following occur:

- Your briefing was unclear.
- You are not getting answers to your questions.
- You are not getting clear acknowledgement of your message.
- You are encountering hazards that are not mentioned in your brief.
- Your team is not debriefing.
- Your tempo is too high to maintain command and control.

**Take moment to re-assess your situation.**

*Safety Officer: Wynn Whitmeyer (t)*

# Finance Message

## **Show your meal breaks.**

The Yellow Book language for compensated breaks  
requires “the fire is not controlled”,  
that you are directed by OSC to “remain on post” as you eat,  
and that your fireline supervisor approves language documenting both conditions  
**on your CTR.**

# Owl & Horse Fire Precipitation Forecast

Name Of Incident: Owl & Horse Fires

Jaclyn Anderson - Incident Meteorologist

Time/Date Issued: Monday, 9/12 @ 1745 hrs

Signed: *Jaclyn Anderson*

**Discussion:** There is a chance for showers late tonight into early Tuesday morning, with better chances arriving throughout the day on Tuesday. Additional chances for showers and a few thunderstorms arrive on Wednesday, but coverage looks to be more scattered. Locally heavy rain may be possible on Wednesday, but it really depends on where storms develop. Chances increase again for widespread rain on Thursday. Lingering chances for light rain continues into the weekend.

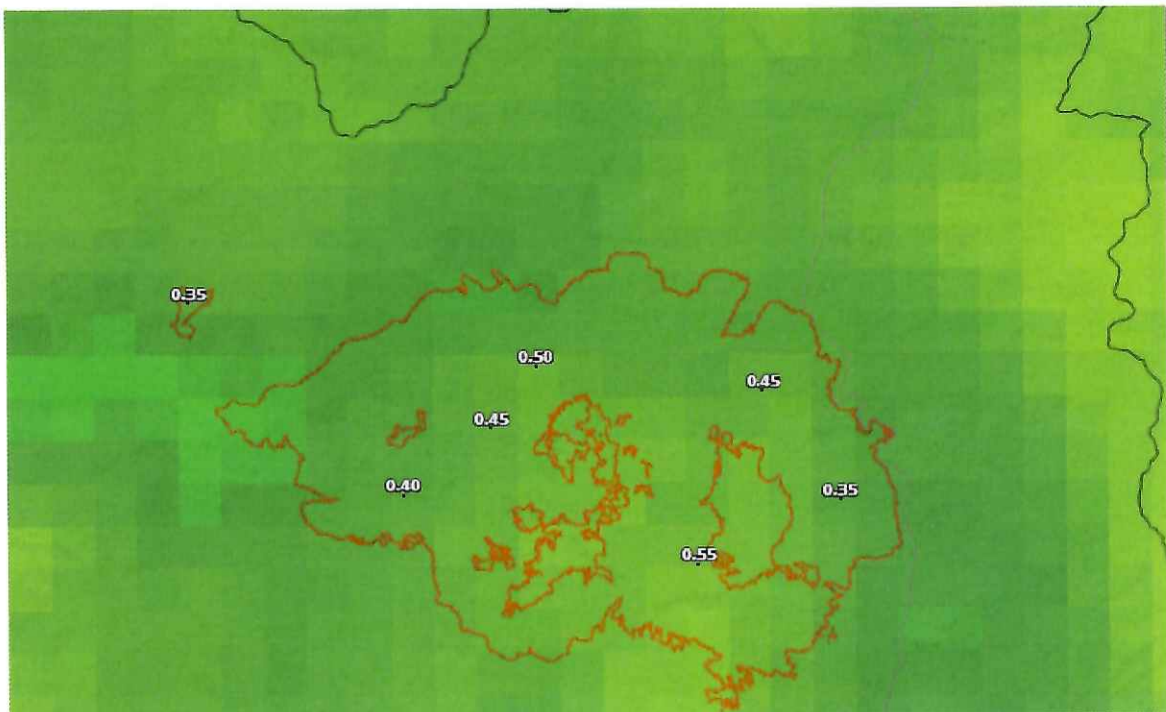

Gusty winds may accompany showers or thunderstorms, especially tonight given the very dry atmosphere in place.

**Estimated Timing for Precipitation:** Where the date and vertical bar are annotated marks 0000 LT, or midnight.

## Probability of Precipitation, %

**Estimated Precipitation Forecast through 6 AM Friday:** The below precipitation map shows the average estimated precipitation through Friday morning. To provide some additional context, on the low-end, it looks like the Owl and Horse Fires should at least pick up around 0.10-0.15 inches of rain starting tomorrow through Friday morning. On the high-end, around 0.65-0.76 inches of rain could impact the fire.
