

Incident Status Summary (ICS-209)

Incident: **Jacob City**

1. Incident Name: Jacob City		2. Incident Number: UT-NWS-000342	
3. Report Version (check one box): Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: ICT2, Trent Ingram GBIMT5	5. Incident Management Organization: Type 2 Team	6. Incident Start Date/Time: Date: 07/09/2022 Time: 1434 MDT
7. Current Incident Size or Area Involved (use unit label – e.g., "Acres", "Square Miles"): 4185 Acres	8a. Percent (%) Contained or Completed: 51 %	9. Incident Type: Wildfire B. Incident Description: C. Cause: Human D. Fire Suppression Strategy:	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single Complex
	b. Total Percentage (%) of Perimeter that will be Contained or Completed: 100 %		
12. Prepared By: Print Name: Jessica Wade SITL-t Date/Time Prepared: 07/15/2022 1700 MDT		13. Approved By: Print Name: Trent Ingram, ICT2 GBIMT5 Signature: .	
14. Date/Time Submitted: 07/15/2022 1844 MDT		15. Primary Location, Organization, or Agency Sent To: GBCC	
16. State: UT	17. County / Parish / Borough: Tooele	18. City: Stockton	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): UT-NWS	
22. Latitude/Longitude: Latitude: 40° 25' 21" Longitude: 112° 19' 21"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Salt Lake Township: 4S Range: 4W Section: 32 1/4 Sec: of 1/4 Sec:	
25. Short Location or Area Description (list all affected areas or a reference point): 1 Mi E of Stockton		26. UTM Coordinates: Zone: 12 Easting: 387817 Northing: 4475477	
27. Note any geospatial data available (indicate data format, content, and collection time information and labels):			
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal Backing Creeping Smoldering			

Incident Status Summary (ICS-209)

Incident: **Jacob City**

Narrative:

Although the fire received precipitation during the last two operational shifts, the fire continues to creep and back in areas with heavy dead and down fuels. Commodore Pass and Soldier Creek drainage continue to be the main areas with concentrated heat and fire potential.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)
Timber (Grass and Understory)
Chaparral (6 feet)**

Narrative:

Elevations 5000 ft to 7500 ft the fuels are pinion-juniper, sagebrush, mountain mahogany, and oak brush. Annual grasses dominated the south slopes. Elevations 7500 ft to 10000 ft the fuels are mainly mountain mahogany, mixed conifer, and aspen. Perennial grasses are also at higher elevations.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc): Fire area closures remain in effect. The following were damaged: Stockton water treatment plant which included propane tanks, solar panels, and generator. Other items include: multiple flatbed trailers, sheds, and two con-ex boxes. Settlement canyon is open up to Camp Wapiti.	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
	E. Single Residences	48	2	0
	F. Multiple Residences	0	1	0
	G. Mixed Commercial / Residential	0	1	0
	H. Nonresidential Commercial Property	0	0	0
	I. Other Minor Structures	0	2	0

33. Life, Safety, and Health Status/Threat Remarks: Settlement Canyon is open up to Camp Wapiti. An area closure was implemented for the fire area including Soldier and Dry Canyons.	34. Life, Safety, and Health Threat Management:
---	---

Incident Status Summary (ICS-209)

Incident: **Jacob City**

<p>Hazards include extremely steep and wet terrain and rolling material such as rocks or timber. The area around the fire is experiencing prolonged drought and the possibility for thunderstorm outflow winds with lightning.</p> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Monsoon moisture brought early morning showers across the fire Friday morning, with up to a quarter of an inch of rainfall on parts of the fire. Thunderstorm activity is expected to redevelop late in the afternoon, but will be more isolated than previous days. Any showers and thunderstorms would still produce locally heavy rainfall and occasional lightning. Saturday will see a brief end of thunderstorms activity, with mostly clear skies and hot temperatures in the mid 90s to near 100.</p>		Active?
	A. No Likely Threat	
	B. Potential Future Threat	X

	L. Mass Immunization Complete	
	M. Quarantine in Progress	
N. Area Restriction in Effect		
O. Road Closure	X	
P. Trail Closure	X	
Q. Area Closure	X	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
12 hours:	Monsoonal moisture has moved over the fire area with light to heavy precipitation. Cloud cover, higher relative humidity and precipitation will minimize fire behavior. No surface spread is expected.
24 hours:	Although there is a break in the monsoonal flow and the hot and dry conditions will occur, due the previous precipitation, minimal surface spread is expected. The majority of the heat remains in pockets around Commodore Pass and Edwards Pass areas. In these areas the fire will continue to smolder and creep through interior pockets of 1000hr and 100hr fuels.
48 hours:	Hot temperatures continue with highs in the 90s. Isolated showers and thunderstorms possible in the afternoon. The majority of the heat remains in pockets around Commodore Pass and Edwards Pass areas. In these areas the fire will continue to smolder and creep through interior pockets of 1000hr and 100hr fuels.
72 hours:	Hot temperatures continue with highs in the 90s. Scattered showers and thunderstorms in the afternoon. In interior areas of unburned fuel, the fire will continue to smolder and creep through interior pockets of 1000hr and 100hr fuels.
Anticipated after 72 hours: Similar fire behavior to the previous shifts.	

37. Strategic Objectives (define planned end-state for incident):
Full suppression utilizing direct and indirect tactics. Keep fire east of Copper Street/gravel site road; south of Settlement Canyon; west of Rocky Peak; and north of the Jacob City and Ophir Campgrounds. Keep fire out of Ophir Canyon.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Incident Status Summary (ICS-209)

Incident: **Jacob City**

12 hours:	The watershed located in Settlement Canyon is critical to the town of Tooele, and remains at risk if any fire progresses into that canyon. The potential threat remains to natural resources, range allotments, and historic mining artifacts remain at risk throughout the surrounding area.														
24 hours:	The watershed located in Settlement Canyon is critical to the town of Tooele, and remains at risk if any fire progresses into that canyon. The potential threat remains to natural resources, range allotments, and historic mining artifacts remain at risk throughout the surrounding area.														
48 hours:	The threat is minimal to surrounding areas due to completed containment lines. The threat is limited to the Soldier Creek drainage where unburned fuels remain.														
72 hours:	The threat is minimal to surrounding areas due to completed containment lines. The threat is limited to the Soldier Creek drainage where unburned fuels remain.														
Anticipated after 72 hours: Same as the previous shift.															
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:															
12 hours:	No critical needs at this time.														
24 hours:	No critical needs at this time.														
48 hours:	No critical needs at this time.														
72 hours:	No critical needs at this time.														
Anticipated after 72 hours: Similar to the previous shift.															
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: <ol style="list-style-type: none"> 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. Due to the precipitation received on the fire, suppression resources are adequate at this time. Aviation assets continue to be critical to support the continued suppression efforts and the spiked crews on the fireline.															
41. Planned Actions for Next Operational Period: Crews will continue to construct direct and indirect fireline in the Soldier Canyon and Commodore Pass areas. A hose lay is being utilized within the Soldier Creek drainage. Aviation assets are being utilized for crew transports, suppression assistance to ground resources, and supporting multiple spike locations by delivering food, water, and supplies throughout the operational shift. Beginning suppression repair activities.															
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): 4,500															
43. Anticipated Incident Containment or Completion Date: 07/24/2022															
44. Projected Significant Resource Demobilization Start Date: 07/23/2022															
45. Estimated Incident Costs to Date: \$5,376,000.00															
46. Projected Final Incident Cost Estimate: \$7,500,000.00															
47. Remarks (or continuation of any blocks above – list block number in notation): Block #7: Acres by ownership are: BLM, 1300ac; State, 1317ac; Private, 1557ac.															
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
