

Incident Action Plan

Left Fork Fire

UT-DIF-000133 P4 PL93 (0407)

HEALTH & SAFETY MESSAGE:

THUNDERSTORM SAFETY

Thunderstorms cause significant hazards for wildland firefighters, including **high out-flow winds** that can cause **erratic and or extreme fire behavior, and lightning**. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. Heavy rain, hail, and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

- If you feel the hair on your arms or head "stand up," there is a high probability of a strike in the vicinity. Crouch or sit on a pack.
- Do not lie down.
 - The best position is sitting on the pack or crouching with feet close together.
 - Avoid sitting directly on the ground, if possible; but if necessary, keep feet and butt close together.
 - Crouching for extended periods is not easily done, so sit on your pack.
 - Sitting on or covering up with a ground cloth is okay.
- Find a place free of hazard trees, strong outflow winds may cause them to come down.
- Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety.
- Don't group together. Ridge tops and wide-open areas should be avoided.
- **Refer to IRPG page 17**

***In Kane County, Utah, the community Covid-19 level is medium. People may choose to mask at any time. People with symptoms, a positive test, or exposure to someone with Covid-19 should wear a mask. Report to your line supervisor to establish quarantine protocols.

Safety Officers: Randy Turrill, Dan Barlow (t), Wayne Peterson, Don Fullmer

Thursday, June 23, 2022
Day Operations 0600-2200

Left Fork Fire Aquatic Invasive Species Operational Guidance

Engines should work in the same drainage they have drafted from. Drafting should only be done at approved drafting locations; to reduce the probability of spreading invasives into uncontaminated portions of water ways. Before working in a different drainage, decontamination must be complete. For decontamination engines should arrive with an empty tank.

May draft from the following without decontamination. Tested positive for Chytrid and Whirling.	Need to decontaminate before drafting from. Tested positive for Chytrid and negative for Whirling
Kanab Creek Tropic Reservoir Left Fork of the Sevier	Blubber Creek (Decontaminate prior to drafting from here)
Draft site location Kanab Creek Draft Site 37.533815, -112.286819 Or Left Fork Sevier Draft Site 37.576086, -112.266245	Draft site location Blubber Creek Draft Site 37.549314, -112.281548

Bucket work in **Retardant Avoidance Areas** should be avoided to reduce the likelihood of spreading both Chytrid and Whirling disease.

Aircraft will need to decontaminate before switching dip site locations.

SPIKE CAMP SELECTION CRITERIA

- Camping within one-half mile of the Forest Road 087 (East Fork Road) and Tropic Reservoir is limited to numbered (designated) sites only.
- Dispersed camping is permitted more than one-half mile off Forest Road 087 in previously disturbed areas, avoid creating new campsites.
- Please use existing parking pull-outs and turnarounds where possible.
- Choose an appropriate camp size for your crew needs.
- Camping in meadows is acceptable, however, DO NOT drive in meadows to access camping areas.
- Campsite #5 on Forest Road 087 is occupied by a Range Permittee.
- Do not use Forest Road 091 (on the west side of Tropic Reservoir) to access Base Camp as the Campground located on 091 is still open to the public.

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
LEFT FORK	Date/Time From: 06/23/2022 0600 THU	Date/Time To: 06/23/2022 2100 THU
3. Objective(s):		
<ol style="list-style-type: none"> 1. Provide for Firefighter and Public Safety. Prioritize tactics that ensure firefighter safety through risk-informed approach. 2. Utilize direct and indirect containment strategies as necessary including strategic firing opportunities, and aircraft for full suppression. 3. Assess and utilize natural barriers, roads, and trail systems to assist with containment. 4. Minimize impacts to values at risk and smoke impacts to highway 12 Bryce Canyon NP and nearby communities. 5. Keep fire and suppression activities from impacting species of concern through coordination of resource advisors. 6. Avoid the use of ground disturbing equipment in identified cultural sites as directed by resource advisors, or forest archaeologist. 		
4. Operational Period Command Emphasis:		
<ol style="list-style-type: none"> 1. Utilize aviation and ground resources to recon and detect new fire growth/perimeter. 2. Look for opportunities to reestablish containment lines and anchor points in DIV D/T utilizing aircraft/dozer from the south along the west flank. 3. Contain fire to the west of Kanab Creek FS Road 105 and East Fork FS Road 087. 4. Contain spot fires in Kanab Creek between roads FS Road 105 and FS Road 1186. 5. Contain fire west of the Grand View Trail. 6. Look for opportunities to contain fire south of the Skunk Creek FS Road 223. 7. Mandatory evacuations are in affect for the Bryce Woodlands Estates. Continue to monitor the potential threat of fire impacting the community. 		
General Situational Awareness:		
<ul style="list-style-type: none"> • Radio morning briefing at 06:30 via command Wilson • Be sure to have proper radio frequencies programed. • Maintain situational awareness in monitoring fire weather and behavior before initiating actions. 		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (**Verify correct frequency prior to starting report**)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: *Provide incident summary (including number of patients) and command structure.*

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each patient as applicable (start with the most severe patient)*

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: **Considerations:** *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.*

8. ADDITIONAL INFORMATION: *Updates/Changes, etc.*

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

AIR OPERATIONS SUMMARY ICS-220		Prepared By: Glenn Dietz	Prepared: 06/22/2022	Prepared Time: 19:50 hrs.	
1. INCIDENT NAME: LEFT FORK UT-DIF-000133 / 0407-P4PL93	2. OPERATIONAL PERIOD June 23, 2022	START TIME: 0600	END TIME: 2000	SUNRISE: KCDC 06:11 MDT KBCE 06:08 MDT	SUNSET: KCDC 20:58 MDT KBCE 20:54 MDT

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.). <u>HAZARD:</u> Radio Towers in the area. Turbulent winds near prominent terrain features. <u>MILITARY TRAINING ROUTES:</u> No MOA's in the vicinity of the incident area. There is an IR MTR approximately 3 NM Southeast of the Southeast corner of the Left Fork TFR. <u>APPROVED PREFERRED WATER USE SOURCES:</u> Follow direction from Air Attack. ***Decontaminate Dip Equipment prior to utilizing a different Dipsite*** <u>UAS:</u> Report any UAS or unknown aircraft sightings to Air Attack, if no aerial supervision, advise IC.	4. LEFT FORK FIRE WATER TENDERS AND ENGINES

Aquatic Invasive Species Decontamination Protocol

Decontamination station at the Left Fork Helibase (Bryce Canyon Airport) is open from 0800 to 2000

1. Water drafted from the left fork fire is contaminated with Whirling disease and Chytrid fungus.
 - Water drafted out of Blubber Creek is contaminated with Chytrid fungus.
 - Decontamination will need to occur before going to another incident, leaving the fire, or when moving from east fork, Kanab, and Tropic Reservoir to Blubber Creek.
 - Engines should continue to work in the same drainages they have been assigned to prevent the spread of aquatic invasives from one drainage to the other.
2. Engines should arrive at the decontamination station empty.
3. Decontamination will require engines and tenders to draft the quat solution out of the folda tank furthest to the north labeled **Quat Solution**, after the engine or tender is full (or has drafted all the solution in the tank) the solution must remain in the tank for at least **10 minutes** to totally kill Whirlings Disease. For larger engines and tenders that draft all of the solution it is recommended they drive around for 10 minutes to allow the solution to splash inside the tank to get all the nooks and crannies.
4. After 10 minutes the solution can be released back into the **Quat Solution** tank.
5. A triple rinse is recommended for engines and tenders after quat treatment, 3 other folda tanks are located just south of the tank containing the quat solution. Engines and tenders will draft from Rinse Station 1 until they are full and then release that water back into Rinse Station 1. If you have a big tender or engine you may want to drive around to thoroughly rinse the inside of the tank. After rinsing at station 1 proceed to Rinse Stations 2 and 3 following the same procedures to thoroughly triple rinse.

Congratulations! You are now decontaminated!
