

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Moose Incident ID-SCF-022105	IR Interpreter(s): Max Wahlberg	Local Dispatch Phone: Central Idaho Dispatch (208-756-5157)	Interpreted Size: 40,388 acres Growth last period: 2,067 acres
Flight Time: 0121 MDT Flight Date: 7/28/2022	Interpreter(s) location: Bend, OR Interpreter(s) Phone: 503-319-9582	GACC IR Liaison: Nate Yorgason GACC IR Liaison Phone: 435-590-1107	National Coordinator: Tom Mellin National Coord. Phone: 505-301-8167
Ordered By: ID-SCF	A Number: A-71	Aircraft/Scanner System: N149Z / Phoenix	Pilots/Techs: Pilots: Helquist / Johnson Techs: Mann/Guzman
IRIN Comments on imagery: Two passes. Data was somewhat limited in resolution and detail in some areas, but sufficient information existed for high confidence interpretation.		Weather at time of flight: Clear	Flight Objective: Map heat
Date and Time Imagery Received by Interpreter: 7/28/2022 @ 0150 MDT		Type of media for final product: PDF Map, gdb, kmz.	
Date and Time Products Delivered to Incident: 7/28/2022 @ 0330 MDT		Digital files sent to: NIFS, NIFC FTP.	
Comments / notes on tonight's mission and this interpretation: Tonight's mapping used the incident's wildfire daily perimeter pulled from NIFS at 0150 as a base for mapping. Significant perimeter growth and intense heat was mapped on the fire's western edge in Div T. This intense heat stretches south from the southern bank of the Salmon River to Sawmill Gulch. Notable perimeter growth was also mapped on the fire's eastern edge in Div M with intense heat stretching from the bottom of Bobcat Gulch to the bottom of Napoleon Gulch. Growth was again noted on the disconnected polygon of fire northeast of Sims mine. The northern edge of the fire showed no signs of perimeter growth and only interior isolated heat was mapped north of the Salmon River.
