

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Moose Incident ID-SCF-022105	IR Interpreter(s): Max Wahlberg	Local Dispatch Phone: Central Idaho Dispatch (208-756-5157)	Interpreted Size: 45,113 acres Growth last period: 1,887 acres
Flight Time: 2232 MDT Flight Date: 7/29/2022	Interpreter(s) location: Bend, OR Interpreter(s) Phone: 503-319-9582	GACC IR Liaison: Nate Yorgason GACC IR Liaison Phone: 435-590-1107	National Coordinator: Tom Mellin National Coord. Phone: 505-301-8167
Ordered By: ID-SCF	A Number: A-76	Aircraft/Scanner System: N149Z / Phoenix	Pilots/Techs: Pilots: Helquist, Boyce Techs: Guzman
IRIN Comments on imagery: Clean imagery tonight, no clouds.		Weather at time of flight: Clear	Flight Objective: Map heat
Date and Time Imagery Received by Interpreter: 7/29/2022 @ 2300 MDT		Type of media for final product: PDF Map, gdb, kmz.	
Date and Time Products Delivered to Incident: 7/30/2022 @ 0152 MDT		Digital files sent to: NIFS, NIFC FTP.	
Comments / notes on tonight's mission and this interpretation: Tonight's mapping used the incident's wildfire daily perimeter pulled from NIFS at 2230 as a base for mapping. Perimeter growth was mapped along the fire's western edge in Div T and now reaches west to the confluence of Pine Creek and the Salmon River. Intense heat was mapped along this western edge in the area of Eagles Nest and stretching south to Pine Creek Ranch. Imagery resolution made it difficult to say with certainty, but a small portion of this fire appears to be located south of FS road 032 and Pine Creek southeast of Eagles Nest. Intense heat was also mapped east of Pine Creek Ranch in the Virginia Gulch drainage. Moderate growth was also mapped along portions of the fire's southern perimeter and existing disconnected heat polygons continue to grow. On the fire's eastern edge, intense heat and fire growth were both mapped in Napoleon Gulch where the fire has crossed to the southeast of the drainage bottom. Only isolated heat sources remain in the fire area north of the Salmon River.
