

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Moose ID-SCF-022105	IR Interpreter(s): Max Wahlberg	Local Dispatch Phone: Central Idaho Dispatch (208-756-5157)	Interpreted Size: 130,144 acres Growth last period: 14 acres.
Flight Time: 2043 MDT Flight Date: 10/12/2022	Interpreter(s) location: Bend, OR Interpreter(s) Phone: 503-319-9582	GACC IR Liaison: Nate Yorgason GACC IR Liaison Phone: 435-590-1107	National Coordinator: Tom Mellin National Coord. Phone: 505-301-8167
Ordered By: ID-SCF (4065441506)	A Number: A-201	Aircraft/Scanner System: N149Z/Phoenix	Pilots/Techs: Helquist/Watts/Teats
IRIN Comments on imagery: Good clean imagery. No major issues.		Weather at time of flight: Clear	Flight Objective: Map remaining heat in the southeastern corner of the Moose Fire
Date and Time Imagery Received by Interpreter: 10/12/22 @ 2100 PDT		Type of media for final product: PDF Map, gdb, kmz.	
Date and Time Products Delivered to Incident: 10/13/22 @ 0030		Digital files sent to: NIFS, NIFC FTP.	
Comments /notes on tonight's mission and this interpretation: Tonight's mapping used the incident perimeter from NIFS as a base for mapping. Perimeter changes were limited to the areas of the fire that were scanned for heat. See maps and NIFS data depicting area of scan. <i>Note: areas of unmapped heat may exist outside of the scanned area.</i> Very little perimeter change was mapped tonight, with some slight growth on a couple lobes and in the interior unburned islands. Some small patches of intense heat were mapped along the fire's perimeter, though these were limited in number and extent. Small pockets of scattered heat and isolated heat sources were also mapped.
