Comments /notes on tonight's mission and this interpretation: Tonight's initial perimeter is continued from previous night's IR Heat Perimeter. Start: 1,308 Acres, Interpreted 1,665 Acres Located on the south slope east of Norton Ridge Lookout. Heat Perimeter took a run to the east and a small area to the south adding over 350 acres. Perimeter growth mostly along the eastern perimeter. Intense heat located along the east perimeter with scattered patches on the south perimeter. Isolated heat along the northwest boundary, with the northern portion of the incident looking like it has cooled down.
