Comments /notes on tonight's mission and this interpretation: Tonight's initial perimeter is continued from previous night's IR Heat Perimeter. Start 1,665 Acres, Interpreted 1,779 Acres Located on the south slope east of Norton Ridge Lookout. Perimeter continues to expand to the south and east. Small area to the west has expanded the boundary as well. Pockets of intense heat on the south side with one area on the north perimeter. NIFS Event Poly has not been updated in a few days. ** Need to expand scan box to the south and east.
