Comments /notes on tonight's mission and this interpretation:
Tonight's initial perimeter is continued from previous night's IR Heat Perimeter.

Start 1,859 Acres, Interpreted 1,925 Acres
Located on the south slope east of Norton Ridge Lookout.
Perimeter continues to expand to the southeast, small area of growth on the west side. Had perimeter expansion on the northeast side as well. Intense heat along boundary where perimeter expansion occurred. Small areas of scattered heat and isolated heat were also mapped.

NIFS Event Poly has not been updated in a few days.
