Comments /notes on tonight's mission and this interpretation: <p>Tonight's initial perimeter is continued from previous night's IR Heat Perimeter.</p> <p>Start 1,925 Acres, Interpreted 2,037 Acres Located on the south slope east of Norton Ridge Lookout. Perimeter continues to expand to the south and northwest with a small are of growth on the north side. Intense heat along boundary where perimeter expansion occurred. Areas of dense scattered heat behind the intense heat and isolated heat were also mapped throughout the interior.</p> <p>NIFS Event Poly has not been updated in a few days.</p>
