Owl & Horse Fire Precipitation Forecast

Name Of Incident: Owl & Horse Fires
Time/Date Issued: Tuesday, 9/13 @ 1630 hrs

Jaclyn Anderson - Incident Meteorologist
Signed: *Jaclyn Anderson*

Today's rainfall shown to the right:
The Owl and Horse Fires appear to have been on the edge of the better rainfall today, with much of the better moisture tracking over the Moose Fire. It appears likely, based on nearby RAWS, that the Owl Fire likely picked up a wetting rain today.

Discussion for the rest of the week:
There is a very small chance showers and storms out in Oregon attempt to move in from the west late this evening. However, confidence is low that they will hold together and make it that far east. Additional chances for showers and a few thunderstorms arrive on Wednesday, but coverage looks to be more scattered. A few models indicate that the coordinate along the Salmon River may be a targeted area for thunderstorm development Wednesday. Locally heavy rain will be possible on Wednesday, but it really depends on where storms develop.

Chances increase again for widespread wetting rain on Thursday, with a chance for thunderstorms as well. Lingering chances for rain continues into the weekend.

Estimated Timing for Precipitation: Where the date and vertical bar are annotated marks 0000 LT, or midnight.

Probability of Precipitation, %

Chance of Wetting Rain Wednesday is ~25%
Chance of Wetting Rain Thursday and Thursday night is ~ 50%
Chance of Wetting Rain Friday and Friday night is ~30%
