The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Wildcat Fire

DATE: July 16, 2022

TIME: 0600-2200

Major Hazards and Risks:

Fire Behavior - Disengage early; know your escape routes and safety zones.

Dehydration - Continue to drink fluids. Supplement with Gatorade at a ration of 4 to 1.

Transportation - Drive defensively with lights on.

Heavy Equipment - When approaching, make sure the operator can see you.

Transitioning – Nevada Team 3 assumed command of the fire @1800 on 7/15

Make sure instructions are clearly understood!!

Complacency - Challenge one another to stay alert, creative and safe. Be patient.

Fire Order of the Day –Give clear instructions and be sure they are understood

Narrative: The transition period when an incident management team takes over the fire can be one of the most confusing times. If there was going to be a Watch Out Situation #19 added, this would be a good candidate. Communicating with new people means we can't take anything for granted. Please take the time today to make sure instructions given and received are clearly understood. Don't assume anything and don't be afraid to ask questions. We can make this transition clean and seamless if everyone pays particular attention to communication today. Most of all, we can ensure that this transition is **SAFE AND ACCIDENT FREE!** Stay heads up and have a safe day.

Watch Out Situation of the Day
