Ordered By: ID-SCF	A Number: A-34	Aircraft/Scanner System: N149Z/Phoenix	Pilots/Techs: Pilots: Boyce/Helquist Tech: Mann
IRIN Comments on imagery: Good		Weather at time of flight: Clear	Flight Objective: Heat Perimeter Detection / Categorizing Heat Intensity
Date and Time Imagery Received by Interpreter: 8/18/2022 @ 2341MDT		Type of media for final product: Shapefiles, one geodatabase, two pdf maps, kmz file, IRIN log. IR data was posted to IRIN Edit Services (National Incident Feature Service 2022) Digital files sent to: https://ftp.wildfire.gov/public/incident_specific_data/great_basin/2022_Incidents/2022_WolfFang/IR/20220819	
Date and Time Products Delivered to Incident: IR data uploaded to EIN: 08/19/2022 @ 0528 MDT IR products uploaded to ftp: 08/19/2022 @ 0625 MDT			
Comments /notes on tonight's mission and this interpretation: <ul style="list-style-type: none"> • Started IR interpretation from 8/18/2022 IR wildfire perimeter. The Wildfire Daily Perimeter for this incident has not been inputted into Internal View Services (National Incident Feature Service 2022). • Fire had most activity on the east side. There also some expansion at the northwest tip. Acreage increased by 178 acres for a total of 1,444. • Majority of intense heat is the eastern third of fire. There is also intense heat associated with perimeter growth at the northwest tip. Small pockets of intense heat located along the west flank. • Large patch of scattered heat on the east side. • Isolated heat sources mostly scattered through the interior. There are five on the west flank adjacent to the perimeter. • The provided geodatabase and shapefiles are in in WGS84 decimal degrees, so would be convenient for working in IES and IVS. • Maps are in NAD83 UTM 11. • Feedback is always appreciated. Please contact the interpreter at the contact information listed above.
