Date and Time Products Delivered to Incident: IR uploaded to IES: 07/20/2022 @ 2355 MDT IR products uploaded to ftp: 07/21/2022 @ 0123 MDT			
Comments /notes on tonight's mission and this interpretation: <ul style="list-style-type: none"> • Started interpretation with Wildfire Daily Perimeter in IVS. Downloaded 07/20/22 @ 1926 MDT. • Fire perimeter has expanded in the last 24 hours. Perimeter area is now 124, a 68-acre increase. • The previously two fires have merged into one. • There are three spot fires at the southeast portion of the fire. The closest is 283 ft to the perimeter. The second and third are about 690 ft and 1,200 ft from the perimeter, respectively. • Intense dominants within the perimeter. • One isolated heat source was mapped. • The provided geodatabase and shapefiles are in in WGS84 decimal degrees, so would be convenient for working in IES and IVS. • Maps are in NAD83 UTM 11 NAD 83. • Feedback is always appreciated. Please contact the interpreter at the contact information listed above.
