| Incident Name: Woodtick ID-SCF-022097 | IR Interpreter(s): Dale Gough | Local Dispatch Phone: Central Idaho Dispatch 208-758-5157 | Interpreted Size: 6,063 IR Acres Growth last period: 38 IR Acres |
| Flight Time: 0008 MDT Flight Date: 08/29/2022 | Interpreter(s) location: Creswell, OR Interpreter(s) Phone: 541 228-0594 | GACC IR Liaison: Nathan Yorganson GACC IR Liaison Phone: 208 557-5826 | National Coordinator: Jan Johnson National Coord. Phone: Cell – (505) 301-817 jverjohnson@gmai.com |
| Ordered By: ID-SCF | A Number: A-64 | Aircraft/Scanner System: N149Z/Phoenix | Pilots/Techs: Pilots: Boyce/Watts Tech: Rhodes |
| IRIN Comments on imagery: Clear and good orthorectification | | Weather at time of flight: Clear | Flight Objective: Heat Perimeter Detection / Categorizing Heat Intensity |
| Date and Time Imagery Received by Interpreter: 08/29/2022 @ 0051 MDT | | Type of media for final product: Shapefiles, one geodatabase, two pdf maps, kmz file, IRIN log. IR data was posted to IRIN Edit Services (National Incident Feature Service 2022) | |
| Date and Time Products Delivered to Incident: IR data uploaded to EIN: 08/29/2022 @ 0328 MDT IR products uploaded to ftp: 08/29/2022 @ 0345 MDT | | Digital files sent to: NIFS and NIFC FTP: /incident_specific_data/Great_basin/2022_Incidents/2022_Woodtick/IR/2029 | |
| Comments /notes on tonight's mission and this interpretation: <ul style="list-style-type: none"> • Started IR interpretation from the last night's (8/28) IR flight interpretation. The Wildfire Daily Perimeter for this incident has not been updated to the most recent IR interpretation in the Internal View Services (National Incident Feature Service 2022). • Fire perimeter acres increased by 38 for a total acreage of 6,063. • Fire activity continues in lower west flank. • Intense heat along the lower west flank associated with perimeter growth. • The spot fire in the middle southern part of the fire continues to grow. It contains intense heat. • Scattered heat primarily located along most of the west flank. • Isolated heat in three bunches; one on west flank; second in the middle southern flank and the third on the south on east. • The provided geodatabase and shapefiles are in in WGS84 decimal degrees, so would be convenient for working in IES and IVS. • Maps are in NAD83 UTM 11. • Feedback is always appreciated. Please contact the interpreter at the contact information listed above. | | | |
