Comments /notes on tonight's mission and this interpretation: Tonight's interpretation began with the event polygon downloaded at 2100 MDT on 9/8/2023 (3,315.5 acres). Small amount (0.2 acre) of heat perimeter growth found in the areas of scattered heat, which is mapped around the unnamed drainages to the south of Fool Creek. Isolated heat sources mapped within the perimeter. Questions? Please contact the interpreter via the contact information above. UTM Zone 11
