28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):

Incident: Black Eagle

Active
Short Crown Runs
Torching
Long-range Spotting

Narrative:

Due to warmer temperatures and lower RH values, fire activity has increased.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Litter and Understory)

Narrative:

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

- 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:
- 12 hours: Estimating continued growth of in Hoodoo Creek, Wilson Creek, and Black Eagle Creek drainages
- Along with more growth into Black Eagle and Hoodoo Creek drainages, fire is expected to continue backing down Lake Creek and Wilson drainages.
- 48 hours: Potential to reach Black Eagle Mine Structures
- 72 hours: Potential to reach Yellowjacket Townsite and Yellowjacket campground

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Continue with point protection, establishment of trigger points, while utilizing MIST tactics within the wilderness.

- 38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:
- 12 hours: Black Eagle Mine site.
- 24 hours: Black Eagle mine site.
- 48 hours: Yellowjacket Campground. If winds lined up, Hoodoo Meadow Trailhead.
- 72 hours: Yellow Jacket Town site if fire growth moves to the south.

Anticipated after 72 hours: Yellow Jacket Townsite.

- 39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:
- 12 hours: REMS, 1 Line Safety, 1 TFLD/DIVS, Camp Crew, 1 RADO

Incident: Black Eagle

24 hours: REMS, 1 Line Safety, 1 TFLD/DIVS, Camp Crew, 1 RADO

48 hours: REMS, 1 Line Safety, 1 TFLD/DIVS, Camp Crew, 1 RADO

72 hours: None.

Anticipated after 72 hours:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Movement due to terrain driven winds, high temperatures, low RH values, and high fuel loading the fire is pushing towards values at risk.

41. Planned Actions for Next Operational Period:

Monitor fire behavior and revaluate based on activity and weather conditions.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"):
- 43. Anticipated Incident Containment or Completion Date: 10/31/2024
- 44. Projected Significant Resource Demobilization Start Date:
- 45. Estimated Incident Costs to Date: \$200,000.00
- 46. Projected Final Incident Cost Estimate:
- 47. Remarks (or continuation of any blocks above list block number in notation):
- 49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
