

Deer Springs Fire

Incident Action Plan

Saturday July 13, 2024

UT-CPD-000347 PD R2UM (1522)

Consistently Reevaluate Risk Management

Please don't let normal activities become normal and comfortable. Everything we do can have a bad outcome and that is the reason we must come to work every day physically and mentally prepared to take on whatever the day brings. Do not let complacency creep into your everyday routine, look at each mission as if it's new and give it the same respect that you would if it really were something brand new. So don't let your guard down. Keep looking up, down and all around, even if you have been in the same area for multiple days.

S – Step back and consider all aspects of the job. This includes yourself, your co-workers, equipment, vehicles, route of travel, activities, weather, terrain, etc.

T – Think about what you are about to do. This includes potential/real hazards, crew experience levels, influence of other activities/happenings, distractions, specific safety message that needs to be communicated to co-workers, do my actions reflect my intent on emphasis of safety, etc.

O – Organize the job and co-workers to ensure quality and quantity of task accomplishments. This diligent effort will achieve desired results in a “non-hurried” environment.

P – Proceed in a determined effort to accomplish given tasks in a safe manner. This means that all personnel involved are consistently alert and keenly aware of being careful in all their actions.

Micah Suwyn ICT3/Izaak McHenry (T)

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
DEER SPRINGS	Date/Time From: 07/13/2024 0600 SAT	Date/Time To: 07/13/2024 2200 SAT
3. Objective(s):		
<p>Firefighter and public safety is first and foremost in all actions. Minimize loss to private property, infrastructure, communications sites and transmission lines. Protect water quality in watersheds, water systems, riparian zones, springs and seeps by limiting fire intensities and limiting suppression effects. Build and maintain relationships with local communities and cooperators. Use natural barriers, constructed features and favorable fuel types that will provide the greatest possibility for suppression success.</p>		
4. Operational Period Command Emphasis:		
Consider driving conditions (sandy material) in accessing tactical actions.		
General Situational Awareness:		
Consult resource advisor on tactical operations that may affect cultural resources. Record temperature and red flag warning will persist.		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located at:		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):		
<input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206	<input type="checkbox"/> ICS 207 <input type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents	Other Attachments: <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____

Deer Springs Fire Fire Suppression Repair Guidelines

The following guidelines were developed to assist in the completion of Repair efforts of areas disturbed during fire suppression.

Repair Objectives

1. Reduce or eliminate erosion and sedimentation that could result from the fire suppression activities such as dozer or hand line, any roads that were reopened during suppression activities and safety zones.
2. Prevent unwanted vehicle travel routes that may have been created by reopening roads and construction of fire lines.
3. Protect sensitive heritage and natural resource locations.
4. Reduce the potential for spread of noxious weeds.
5. Remove all garbage produced by the incident including all unnecessary flagging and signage.

Repair Standards (General)

Flagging: Remove all flagging when no longer needed. **Litter:** Do a sweep for suppression and mop-up crews' litter during and at conclusion of repair work. Also a sweep in Spike Camps, Staging or parking areas. Leave rusty can dumps and other historic objects alone.

Supplies: Remove all gear and supplies when no longer needed.

Slash: Scatter any cleared debris in a natural appearing pattern. Use slash and duff to rehabilitate camp areas and fire line as needed.

Fireline (handline):

- After fire spread has stopped and lines are secured, fill in firelines, cup trenches and obliterate any berms. The berm material should be spread back into the fireline or recontoured to the fireline.
- Restore drainages by removing fill or dams, reestablish crossings and return to natural configuration.
- Any trees or large size brush cut during fireline construction should be scattered to appear natural.
- Use waterbars only when necessary to prevent erosion or use woody material to act as sediment dams. Waterbars should only be used on steep slopes and only when necessary. Archaeologists monitor as needed repair activities for archaeological sites to avoid doing further damage to sites impacted by firelines.

Dozerline:

- Develop large or impassable barriers where dozer lines intercept roads or other points of public access. The emphasis is to block motorized use of these areas.
- Where firelines intercept roads, install barriers that block off-road use by the general public.
- Barriers should be constructed using locally available natural materials. As warranted, lop and scatter woody debris 100 feet from the barrier to discourage off road use by the general public.

- Use of an Excavator to complete this work is preferred; however if the dozer operators are able to perform the work and the product is satisfactory to the HEQB's and the READ's then dozer work is acceptable.
- Where concentration of materials is limited, pull material across line only.

Roads:

- Close any roads created for fire suppression activities.
- Road and trail signs damaged by suppression activities may be replaced with suppression funds. Those damaged by the wildfire must be procured with project funds.
- Repair major inlet roads (grading, and replacing gravel as needed).

Stumps and Stobs:

Use techniques that will most successfully blend debris with the existing landscape, cost effective, meets safety and fire suppression Repair objectives. The end product should be as natural appearing as possible.

Helispots:

- Low-cut stumps as much as possible in the helispot
- Leave a 15' x 15' (75' safety circle) clearing in the helispot for future use by Light (Type III) Helicopter
- Coordinate and consult with resource advisor for questions

Drop Points/Water Dipping sites (pumpkins /folda tanks):

- Restore to pre-fire conditions, as much as possible
- Remove all trash, flagging, and equipment from the area
- Coordinate and consult with resource advisors

Hazard Trees:

- Hazard Trees will be felled 60 feet on either side of designated system roads and system trails. Fell only those trees necessary to maintain a safe and productive working environment. Follow OSHA definition for hazard trees.

Cultural Resources:

The general area is expected to have a moderate density of cultural resource sites. These sites are sensitive in nature and their locations and components will be fully protected.

- Identify, report, and protect any cultural resources discovered during Repair activities.

The area around Timber Mountain has been lived on and utilized for thousands of years. The sites are made up of both prehistoric and historic sites. These sites are sensitive and easily destroyed or damaged. Previous archaeological surveys indicate the areas within the burn have a high probability of containing archaeological sites.

AIR OPERATIONS SUMMARY ICS-220		Prepared By: Glenn Dietz	Prepared: 07/12/2024	Prepared Time 18:45 hrs.	
1. INCIDENT NAME: DEER SPRINGS UT-CPD-000347 / 1522-PDR2UM	2. OPERATIONAL PERIOD July 13, 2024	START TIME: 0600	END TIME: 2100	SUNRISE: KCDC: 06:21 MDT KKNB: 06:21 MDT	SUNSET: KCDC: 20:55 MDT KKNB: 20:51 MDT

Spot Forecast for Deer Springs Wildfire...Suwyn Type 3 IMT
National Weather Service Salt Lake City UT
718 PM MDT Fri Jul 12 2024

...RED FLAG WARNING IN EFFECT FROM NOON TO 10 PM MDT SATURDAY...

.DISCUSSION...With high pressure centered over the 4 corners area, mid-level moisture will continue to increase, fueling showers and thunderstorms Saturday and Sunday. By Sunday, sufficient mid to low level moistening is expected to transition dry thunderstorms to a hybrid of wet/dry with a 20 percent chance of wetting rain. Any thunderstorms both days will be capable of strong, gusty outflow winds.

.SATURDAY...

Sky/weather.....Partly cloudy (50-60 percent cloud cover). Isolated dry thunderstorms after 1200, scattered dry thunderstorms after 1500.

CWR.....5 percent.

Chance of pcpn.....10 percent until 1200 increasing to 50 percent after 1500.

LAL.....1 until 1200, then 2 until 1500 then 6.

Max temperature.....91-93.

Min humidity.....10-15 percent.

Wind (20 ft).....Downslope/downvalley 2-5 mph becoming southwest 5-15 mph after 1200. Gusty and erratic winds with gusts in excess of 45 mph expected near thunderstorms after 1200.

Transport winds.....North 9 to 16 mph.

Haines Index.....6.

.SATURDAY NIGHT...

Sky/weather.....Partly cloudy (60-70 percent cloud cover). Scattered dry thunderstorms until 2000, then isolated dry thunderstorms until 2400.

CWR.....0 percent.

Chance of pcpn.....40 percent.

LAL.....6 until 2000, then 2 until 2400.

Min temperature.....55-58.

Max humidity.....55-60 percent.

Wind (20 ft).....West to southwest 5-15 mph becoming downslope/downvalley 2-5 mph after 2100. Gusty and erratic winds with gusts in excess of 45 mph expected near thunderstorms until 2400.

Transport winds.....Northwest 12 to 15 mph.

Haines Index.....5.

MEDICAL PLAN (206 WF)

DATE: _____ TIME: _____

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE

USE THE FOLLOWING ITEMS TO COMMUNICATE SITUATION WITH COMMUNICATIONS/DISPATCH

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Point of Contact		<i>Name of on-scene POC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as

Patient Assessment: (See IRPG pg 106 or use chart to the right)

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrinsic

Great Basin Team 6 Medical Unit: VITAL SIGNS REPORT

Age: _____ Weight: _____

Level of consciousness:

Alert and oriented to: Person Place Time Event

Responsive to: Verbal Stimulus Pain Stimulus Unresponsive

Breathing: Not Normal Difficult/Labored Rate: _____

Pulse Rate: Absent Present: _____/minute

Blood pressure: SYS: _____ / DIA: _____

Oxygen Saturation With Pulse Oximeter (SaO2): _____

Blood Glucose Level: _____

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
