Incident Action Plan

Tuesday July 9, 2024

UT-CPD-000347 PD R2UM (1522)

## **DAILY SAFETY MESSAGE:**

- **Situational Awareness : Hot WX & Dehydration**

Dehydration occurs when you lose more fluid than you take in, and your body doesn't have enough water and other fluids to carry out its normal functions. If you don't replenish lost fluids, you may suffer serious consequences.

Inadequate intake of water during hot weather or exercise also may cause dehydration. Anyone may become dehydrated.

You can usually reverse mild to moderate dehydration by increasing your intake of fluids, but severe dehydration needs immediate medical treatment. The safest approach is prevention of dehydration. Monitor your fluid loss during hot weather and drink enough liquids to replace what you lose.

**HOW MUCH WATER? - URINATE CLEAR; URINATE OFTEN!**
