

INFRARED INTERPRETER'S DAILY LOG

Incident Name: Little Twist UT-FIF-240112	IR Interpreter(s): Lindsey Kiesz Jennifer Zajac (t)	Local Dispatch Phone: Richfield Interagency Fire Center (435) 896-8404	Interpreted Size: 2533 acres Growth last period: 89 acres
Flight Time: 2344 MDT Flight Date: 6/22/2024	Interpreter(s) location: Wenatchee, WA Interpreter(s) Phone: 913-549-8586	GACC IR Liaison: Steve Penny GACC IR Liaison Phone: 208-315-3729	National Coordinator: Kathryn Sorenson National Coord. Phone: 406-499-2701
Ordered By: Linda Chappell (SITL) 435-529-7640	A Number: A-42	Aircraft/Scanner System: Overwatch TK N287AT	Pilots/Techs: Nick
IRIN Comments on imagery: 4 passes, good imagery		Weather at time of flight: clear	Flight Objective: Map heat perimeter, identify intense heat, scattered heat, and isolated heat sources
Date and Time Imagery Received by Interpreter: 0015 MDT 6/23/2024		Type of media for final product: Pdf maps, NIFS data update, geodatabase, shapefile, kmz, IR logfile Digital files sent to: https://ftp.wildfire.gov/public/incident_specific_data/great_basin/2024_Incidents/2024_LittleTwist	
Date and Time Products Delivered to Incident: 0300 MDT 6/19/2024: NIFS data 0400 MDT 6/19/2024: FTP products			
Comments /notes on tonight's mission and this interpretation: Started interpretation using the perimeter found in the event polygon on the NIFS (pulled 06/23/2024 1230 MDT). Intense heat was identified in three sections of the fire. First, to the north along the burn out operations on the ridge above Twist Creek. Second, on the southeast end of the fire on the southwest ridge coming off of Circleville Mountain. Third, on the southwestern side of the fire on the ridge above Senseball Creek. Several isolated heats found north of the handline along the burn out operation above Twist Creek. An isolated heat was identified at close to trail 066 near the center of T39S R 6W section 35. Isolated heats were found near Evans Lake, Anderson Meadow, Kents Lake, and Tushar Lakeside Campgrounds and others which appear to be recreation related. Scattered heat and isolated heats found thru out the interior of the fire perimeter. Scattered heat polygons mapped to the south of South Creek near Thompson Ridge are not included in the main fire heat perimeter nor in the interpreted acres.
