- Expect moderate to dangerous rates of spread with *alignment of slope and wind*. Group torching and spotting can contribute to significant fire growth.
- Grass and sagebrush are carrying fire in the meadows on the southern part of the fire.
- Fire behavior will become active around 1300 and remain active until around midnight. Cloud or smoke shading will moderate fire behavior in affected areas.
- Group torching and crown runs have been observed, with spotting distance greater than ½ mile.
- Very heavy fuel loading in an areas with high mortality. 1000-hour fuels are consuming and contributing to fire load. Fuels are at critical levels. Expect high energy release and extended residence/burn out times.

SPECIFIC

Fuel Type	Flame Length	Crown Fire Flame Length	Max Rate of spread	Spotting Distance	Probability of Ignition
Moderate load dry climate shrubSH2	<5	30	12 ch/hr	.6 mi	60%
High load timber-shrub TU5	<13	49	26 ch/hr	.6 mi	60%
Large downed logs TL7	<4	28	9 ch/hr	.6 mi	60%
Moderate load dry climate grass- shrub GS2	<7	26	57 ch/hr	.6 mi	60%

SAFETY

Expect fire activity with high resistance to control- fuels will ignite easier, spread faster and have increased spread rates.

You may need to adjust normal strategies and tactics!!

Pack Trail Fire

Operation Period: 10/12/24 0700 to 10/13/24 0700

SAFETY MESSAGE

Common Denominators of Fire Behavior on Tragedy Fires

- 1. On relatively small fires or deceptively quiet areas of large fires.
- 2. In relatively light fuels, such as grass, herbaceous fuels, and light brush.
- 3. When there is an unexpected shift in wind direction or in wind speed.
- 4. When fire responds to topographic conditions and runs uphill.
- 5. During critical burn period between 1400 and 1700. (IRPG Pg 3)

Are you in any of these situations now, or expected today? What have you done to mitigate the hazards?

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	WILDLIFE
<u>FATIGUE</u>	DEHYDRATION	HAZARD TREES
SPOT FIRES	<u>HUNTERS</u>	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

DISENGAGEMENT "TRIGGERS"

- RH
- Winds
- Fire behavior
- Topographical boundaries
- Time/distance to safety zones
- Loss of support resources (airtankers, helicopters,
- Other operational considerations (e.g., firefighter fatigue.

loss of lookouts or communication)

Roadside Response Safety

- Conduct all operations as far from traffic lanes as possible.
- When not involved in firefighting, high visibility vests must be worn.
- Park on one side of the roadway.
- Exit vehicle away from the traffic lane when possible.
- Post lookouts to watch for and control traffic in both directions.
- Use cones or other warning signs.
- Operate pumps from the non-traffic side.
- Keep all hose, tools and equipment out of the traffic lane. (IRPG Pg 24)

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / C	NDITIONS MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR	 CRITICAL LOW FUEL MOISTURE LOW RELATIVE HUMIDITY Establish and maintain LCES. Take weather observations. Anticipate intense burning and rapid rates of spread. Watch for spot fires. Allow for adequate time to escape routes and safety zone.
ALL	HAZARD TREES	 Follow Hazard Tree Safety Guidelines. Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in sleeping areas prior to using. Maintain Situational Awareness.
ALL	DRIVING HAZARDS	 Drive defensively! Expect the unexpected around every curve. Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. Don't drive when fatigued. Adhere to agency driving regulations and guidelines. Be alert for wildlife, heavy trucks, & high-speed opposing and over-taking traffic. School bus stops exist along high-speed roads. Increase following distances on dusty roads. Slow down when you meet opposing traffic or encounter washboard surfaces.
ALL	AIRCRAFT OPERATIONS	 Keep personnel out of drop zones when bucket work in progress. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.
ALL	INDIRECT LINE CONSTRUC	 Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers.
ALL	STRUCTURE PROTECTION	 If possible burn out or backfire as line construction progresses. Ensure LCES is in place Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone Look for propane tanks and other hazardous materials
ALL	BEAR PRECAUTIONS	Pick up and remove all trash from fire line. Don't allow storage of food in tents. Manage trash to avoid attracting bears. Grizzly Bears are driven by food this time of year.
ALL	HEAVY EQUIPMENT/DOZE	
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel if and when you don't know the plan. Ensure all personnel are familiar with the incident and IA communications plans.

NEEDLES OF FIVE...LEAVE IT ALIVE!

Whitebark Pine (WBP) – A Living Legacy

Facts:

- They typically grow above ~6,500 ft. elevation- on summits, ridges and rocky exposed slopes.
- They are slow growing; cones not produced until ~ 30-60 yrs. The oldest whitebark pine is in Idaho and is >1,270 years old!
- Act as snow fences to hold moisture later in the spring gradually releasing water into the stream systems.
- The seeds are an important food source for wildlife including black bear and the Clark's nutcracker.

Why is this species such a big deal?

• On December 15, 2022, the U.S. Fish and Wildlife Service published a final rule (87 FR 76882) to list the WBP as a threatened species under the Endangered Species Act.

General Information Regarding WBP:

- The Clark's nutcracker, a native bird, can carry up to 30 WBP seeds at a time and cache them up to 10 miles away from harvest site for future food source.
- The four main causes of WBP loss are white pine blister rust, mountain pine beetle attacks, fire exclusion and climate change.
- It is very important that we do our best to protect the remaining WBP. These survivors may contain genetic resistance to the rust that could be critical to the long-term survival of this species.

What Can I Do?

- · Learn to identify whitebark pine and its' habitat - teach others.
- Report location information to a botanist collect coordinates/pictures/notes OR try Survey123 whitebark pine survey with this QR code (or link at bottom of page):

- Find out where 'plus' or 'elite' trees occur (AGOL or botanist) and NEVER cut them down. Protect them from Rx and wild fire.
- Avoid cutting (especially > 4" DBH), damaging (ex: digging/burning w/n 10 m., limbing, etc.) or impeding (ex: piling slash on top of or w/n 10 m.) WBP whenever possible in ALL management activities.
- Avoid constructing helispots or staging equipment, fire camps, vehicles, etc. in occupied whitebark pine habitat.
- Cut other species, such as subalpine fir, in order to help promote the growth and vigor of the existing WBP.

WBP Mature Female Cones

Fascicles at Branch Ends

- 5 needles per fascicle (group)
- Needle fascicles clustered on the end of branches
- WBP can easily be confused with lodgepole pine, which can have similar bark, but only 2 needles per
- Needle clusters on the branches have thicker and more clumpy appearance than lodgepole pine
- Crown is broadly branched and
- Thin, gray bark
- Female cones purplish-brown; often in groups of 2-5 (3) cones.

Please include your email address and phone number in your email.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

Contract Crews – Crew Boss time starts at briefing. Contract crew member times start ½ hour later. Meal breaks need to be shown and time stops at arrival back at ICP.

Any questions? Please call or email finance

Reminder for Federal Employees: When claiming Hazard Pay you must include the suppression action being performed. This includes operations that directly support control of fire (e.g., activities to extinguish the fire, firefighting, ground scouting, spot fire patrolling, search and rescue operations, and backfiring). NOTE on CTR if you are

Lend/Lease from fire name.

Reminder for Contract Daily Rate Resources: Please note your meal break and if applicable, any down/out of service time on your Shift Tickets. Shift Tickets need to be filled out completely and signed by the contractor and government official. NOTE on Shift Ticket if you are Lend/Lease from fire name.

Inspection performed at Ground Support.

COMP/CLAIMS PROCESS

Cache Replacement: Complete appropriate form and take to Supply.

For incident replacement requests for non-cache items, a Property Loss or Damage Report (OF-289) must be completed and include contact name and phone number of person on the incident, a valid email address, home agency name, and home unit address. Please obtain statements and signatures from your supervisor and SME prior to submitting. Provide pictures when possible. The item must be turned into Supply.

TRAINING SPECIALIST MESSAGE

Trainees: There is much the (On Site) Incident Training Specialist can do to help make your assignment as productive as possible. Register your assignment with the TNSP to take advantage of the available services. The TNSP desk is in ICP adjacent to Check—In and Demob.

An <u>Incident Training Home Page</u> is available for <u>both</u> trainees and trainers. Please vist and bookmark the page to <u>register</u> and manage your training assignment throughout the incident.

Access the incident Training Home Page by scanning the QR Code on the IAP Cover and select the "Training Specialist" link.

Please take advantage of the Incident Training Home Page as connectivity opportunity allows.

Trainees and Trainers: Please take a moment to check the Message Board on the Training Home Page, daily, for any important information and updates regarding training assignments on this incident.

Avoid creating a delay when it's time for you to Demob. Register with the Training Specialist as early as possible during the course of your assignment.

Contact information for the TNSP's is listed on the Training Home Page.
