Incident Weather Forecast

FORECAST NO: 50

FORECAST FOR: Sun, Oct 13, 2024 Day/Night

FORECAST ISSUED: Oct 12, 2024, 1800 MDT

NAME OF FIRE: Pack Trail

UNIT: Bridger-Teton NF

SIGNED: //s// Mark Loeffelbein - IMET 801-882-7268 (Text or Call)

WEATHER DISCUSSION:...High pressure will take control of the region bringing the first relief from the gusty winds that have been observed over the fire for the past two weeks. With the lack of large scale flow the general wind will be fairly light leading to terrain driven winds over most of the fire. South facing slopes will see a little enhancement due to the light south ridge wind. Morning inversions will be slow to break due to the lack of upper level winds leading to a smoky day.

FORECAST FOR TODAY: Partly Cloudy (30-60%). Smoky.

Max Temperature(°F):

Min RH:

- Expect moderate to dangerous rates of spread with alignment of slope and wind. Group torching and spotting
 can contribute to significant fire growth.
- · Grass and sagebrush are carrying fire in the meadows on the southern part of the fire.
- Fire behavior will become active around 1300 and remain active until around midnight. Cloud or smoke shading will moderate fire behavior in affected areas.
- Group torching and crown runs have been observed, with spotting distance greater than ½ mile.
- Very heavy fuel loading in an areas with high mortality. 1000-hour fuels are consuming and contributing to fire load. Fuels are at critical levels. Expect high energy release and extended residence/burn out times.

SAFETY MESSAGE

Crew Safety Is Dependent Upon Competent And Confident Leadership

Every Incident Supervisor Has The Responsibility To Confirm That Safe Practices Are Known And Observed

- TAKE CHARGE of assigned resources
- MOTIVATE crew members with a "can do" safety attitude
- DEMONSTRATE INITIATE by taking appropriate action in the absence of orders
 - COMMUNICATE by giving specific instructions and asking for feedback
 - SUPERVISE at the scene of the action

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	MOUNTAIN DRIVING	
FATIGUE	CAMP CRUD	HAZARD TREES	
SPOT FIRES	EVAC TIMES	COMPLACENCY	

Be

sure all elements of your safety plan are in place prior to engagement

Dirty Nomex? Don't think coolthink contaminated.

For more information scan the URL code to the right for the full article and other useful links related to cancer awareness Firefighting has been linked to an increased risk of certain types of cancer. Wildland firefighters are exposed to carcinogens through their skin. Skin becomes 400% more absorptive for every 5 degrees increase in core body temperature. Washing or swapping dirty PPE may reduce carcinogen exposure. Showers or wet wipes to the affected areas are your best prevention

NEEDLES OF FIVE...LEAVE IT ALIVE!

Whitebark Pine (WBP) – A Living Legacy

Facts:

- They typically grow above ~6,500 ft. elevation- on summits, ridges and rocky exposed slopes.
- They are slow growing; cones not produced until ~ 30-60 yrs. The oldest whitebark pine is in Idaho and is >1,270 years old!
- Act as snow fences to hold moisture later in the spring gradually releasing water into the stream systems.
- The seeds are an important food source for wildlife including black bear and the Clark's nutcracker.

Why is this species such a big deal?

• On December 15, 2022, the U.S. Fish and Wildlife Service published a final rule (87 FR 76882) to list the WBP as a threatened species under the Endangered Species Act.

General Information Regarding WBP:

- The Clark's nutcracker, a native bird, can carry up to 30 WBP seeds at a time and cache them up to 10 miles away from harvest site for future food source.
- The four main causes of WBP loss are white pine blister rust, mountain pine beetle attacks, fire exclusion and climate change.
- It is very important that we do our best to protect the remaining WBP. These survivors may contain genetic resistance to the rust that could be critical to the long-term survival of this species.

What Can I Do?

- · Learn to identify whitebark pine and its' habitat - teach others.
- Report location information to a botanist collect coordinates/pictures/notes OR try Survey123 whitebark pine survey with this QR code (or link at bottom of page):

- · Find out where 'plus' or 'elite' trees occur (AGOL or botanist) and NEVER cut them down. Protect them from Rx and wild fire.
- Avoid cutting (especially > 4" DBH), damaging (ex: digging/burning w/n 10 m., limbing, etc.) or impeding (ex: piling slash on top of or w/n 10 m.) WBP whenever possible in ALL management activities.
- · Avoid constructing helispots or staging equipment, fire camps, vehicles, etc. in occupied whitebark pine habitat.
- · Cut other species, such as subalpine fir, in order to help promote the growth and vigor of the existing WBP.

WBP Mature Female Cones

- 5 needles per fascicle (group)
- · Needle fascicles clustered on the end of branches
- WBP can easily be confused with lodgepole pine, which can have similar bark, but only 2 needles per fascicle
- Needle clusters on the branches have thicker and more clumpy appearance than lodgepole pine
- Crown is broadly branched and
- · Thin, gray bark
- Female cones purplish-brown; often in groups of 2-5 (3) cones.

Please include your email address and phone number in your email.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

Contract Crews – Crew Boss time starts at briefing. Contract crew member times start ½ hour later. Meal breaks need to be shown and time stops at arrival back at ICP.

Any questions? Please call or email finance

Reminder for Federal Employees: When claiming Hazard Pay you must include the suppression action being performed. This includes operations that directly support control of fire (e.g., activities to extinguish the fire, firefighting, ground scouting, spot fire patrolling, search and rescue operations, and backfiring). NOTE on CTR if you are

Lend/Lease from fire name.

Reminder for Contract Daily Rate Resources: Please note your meal break and if applicable, any down/out of service time on your Shift Tickets. Shift Tickets need to be filled out completely and signed by the contractor and government official. NOTE on Shift Ticket if you are Lend/Lease from fire name.

Inspection performed at Ground Support.

COMP/CLAIMS PROCESS

Cache Replacement: Complete appropriate form and take to Supply.

For incident replacement requests for non-cache items, a Property Loss or Damage Report (OF-289) must be completed and include contact name and phone number of person on the incident, a valid email address, home agency name, and home unit address. Please obtain statements and signatures from your supervisor and SME prior to submitting. Provide pictures when possible. The item must be turned into Supply.

TRAINING SPECIALIST MESSAGE

- Training is preparing for transition next Wednesday, the 16th
- In order to receive Incident Documentation for your Type 1 experience, you'll need to close out with the TNSP no later than Monday, the 14th by 2100 Hrs.
- Trainees remaining on the incident should start a new Evaluation Record in their PTB listing the new complexity level.
- The deadline for registering for incident documentation under the Type 1 Complexity is Sunday, 10-13 by 2000 Hrs.
- Access the Incident Training Page by scanning the QR Code on the IAP Cover Page and select the "Training Specialist" link.
- Evaluation Forms, Blank Evaluation Records, and Tips for writing effective evals are available on the Training Home Page
- You will save 15 to 20 minutes at the Training Close-Out if you prepare your docs ahead of time. Follow the instructions on the Training Home Page to save time.

Avoid The Rush! If as many tasks as possible have been (or will be) completed in a trainee's position task book, date your documentation for the trainee's anticipated demob date and close out with the TNSP.
