FORECAST NO: 51

FORECAST FOR: Mon, Oct 14, 2024 Day/Night

FORECAST ISSUED: Oct 13, 2024, 1800 MDT

NAME OF FIRE: Pack Trail UNIT: Bridger-Teton NF

SIGNED: //s// Mark Loeffelbein - IMET

801-882-7268 (Text or Call)

<u>WEATHER DISCUSSION:</u>...Even with a ridge of high pressure still in control winds will start to pick up again at ridge top. There will be a change in direction to the West-Northwest to accompany the up-tick in wind speed. The atmosphere will remain dry and somewhat unstable with mixing heights near where they were on Sunday. With the dry air in place and clear skies overnight expect more chilly low temperatures.

FORECAST FOR TODAY: Mostly Sunny (0-20%). Smoky.

Max Temperature(°F):

Min RH:

(8500 ft.) 62-67 (1-2° Warmer) (8500 ft.) 19-24% (Little Change) (10,000 ft.) 52-57 (1-2° Warmer) (10,000 ft.) 23-28% (Little Change)

20 FT Winds:

Slope/Valleys: Upslope 3-6 mph after 0930.

Ridgetops: West-Northwest 6-10 Gusts to 16 mph.

Ch. of Rain: 0% CWR (0.1"+): 0% LAL: 1

Inversion: Breaking around 0930. Mixing Height: 8,000 ft AGL through the afternoon.

OUTLOOK FOR TONIGHT: Mostly Clear (0-10%). Smoky.

Min Temperature (°F): Max RH:

ICP (7000 ft.) 28-33 ICP 70-80% Fire (9000 ft.) 25-30 Fire 65-75%

20 FT Winds:

Slope/Valleys: Downslope 2-4 mph after 1900. **Ridgetops:** Less than 10 mph after 2100.

Ch. of Rain: 0% CWR (0.1"+): 0% LAL: 1

EXTENDED OUTLOOK (8500 ft.):

Tuesday...Mostly Sunny (0-20%). High 62-67. Min RH: 20-25%. 20 ft. Winds: SW 8-12 Gusts to 17 mph. CWR (0.1"+): 0%.

Wednesday...Partly Cloudy (40-60%) becoming Mostly Cloudy (80-100%). 10% Chance of Light Rain. High 57-62. Min RH:38 24-29%. 20 ft. Winds: SW 12-18 Gusts to 30 mph. CWR (0.1"+): Less than 5%.

Thursday...Mostly Cloudy (80-100%). 80% Chance of Rain or Snow. Snow Level 8,000 ft. High 35-40. Min RH: 50-60%. 20 ft. Winds: SW 12-16 Gusts to 28 mph. CWR (0.1"+): 40%.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 9	TYPE OF FIRE: WILDFIRE
FIRE NAME: Pack Trail	OPERATIONAL PERIOD: 10/14/24 (24 hour shift)
DATE ISSUED: 10/13/24	
UNIT: Teton-Bridger NF	SIGNED R.Henault

INPUTS

WEATHER SUMMARY

High temps 62-67 Min RH 19-24%

Daytime: Upslope 3-6 WNW 6-10 G16 on ridgetops

Nighttime: Downslope 2-4

Overnight lows 25-30 Max RH 65-75%

OUTPUTS

FIRE BEHAVIOR

GENERAL

FDFM 4-7% PIG 40-70% (Shaded/Unshaded)

LFM: Sagebrush 76-81% Lodgepole 87-97% Subalpine Fir 98% Snowberry 100-110% Grass 94-115%

1000 Hr 12%

Spotting distance: .3 miles Crown Fire ROS 65 ch/hr

- Expect moderate to dangerous rates of spread with *alignment of slope and wind*. Group torching and spotting can contribute to significant fire growth.
- Grass and sagebrush are carrying fire in the meadows on the southern part of the fire.
- Fire behavior will become active around 1300 and remain active until around midnight. Cloud or smoke shading will moderate fire behavior in affected areas.
- Group torching and crown runs have been observed, with spotting distance greater than ½ mile.
- Very heavy fuel loading in an areas with high mortality. 1000-hour fuels are consuming and contributing to fire load. Fuels are at critical levels. Expect high energy release and extended residence/burn out times.

SPECIFIC

Fuel Type	Flame Length	Crown Fire Flame Length	Max Rate of spread	Spotting Distance	Probability of Ignition
Moderate load dry climate shrubSH2	<9	67	27 ch/hr	.3 mi	70%
High load timber-shrub TU5	<13	79	31 ch/hr	.3 mi	70%
Large downed logs TL7	<4	60	10 ch/hr	.3 mi	70%
Moderate load dry climate grass- shrub GS2	<11	60	105 ch/hr	.3 mi	70%

^{*}assumes a 20 mph wind .6 wind reduction

SAFETY

It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions, as well as predicted and current weather conditions. As fire behavior moves from mild to moderate to extreme, it is critical to act decisively regarding the changing situation.

6. Work Assignments:

Identify access, structures, and other values at risk adjacent to the Hwy 26 Corridor from DP40 south to Dubois.

Prepare structures for defensive actions.

Prepare Structure Defense Plan.

7. Special Instructions:

REAF will be working across all divisions and will check in and out with the DIVS

PIOFs will notify DIVS when entering a division

Backhaul any unused equipment and/or trash.

6. Work Assignments	S:								

Construct indirect control line from DP45 south to the 540 Road and DP 101 for potential firing operations.

Identify potential alternate lines to decrease the fire perimeter.

Continue to Patrol Hwy 26 and Flagstaff Rd North to DIV M/L break

7. Special Instructions:

REAF will be working across all divisions and will check in and out with the DIVS

PIOFs will notify DIVS when entering a division

Backhaul any unused equipment and/or trash.

Pack Trail Fire

Operation Period: 10/14/2024 0700 to 10/15/2024 0700

SAFETY MESSAGE

FATIGUE EFFECTS AND MANAGEMENT

- Cumulative fatigue is a contributing factor in many accidents.
- Fatigue effects your mental processing, your ability to access your short and long term memory, as well, your physical performance.
- The effect of 24 hours without sleep is equivalent to being legally drunk.
- The only remedy to fatigue is quality sleep. Manage your off-shift time to ensure you and your personnel get the rest needed.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
SPOT FIRES	PUBLIC TRAFFIC	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

Planning for Safety

Have multiple plans and make them known

P – Primary Plan (Offense)

Focused on firefighter safety and mission objectives

A – Alternate Plan (Offense)

A fallback plan that closely supports the primary

C – Contingency Plan (Defense) Entirely focused on firefighter safety

E – Emergency Plan (Defense)

Entirely focused on individual firefighter survival

Watch for Over Confidence **During Suppression Repair**

*Driving: As you become more familiar with the road systems, we tend to increase speeds. Please be aware of this and keep speeds down, watch for people and vehicles along the roads, and drive defensively.

*PPE: Please recognize that in low stress situations like suppression repair, it is easy to over-look the importance of wearing the appropriate PPE include eye protection.

*Work Area: Familiarity with your work area can result in a lowering of awareness, especially as conditions change.

California Team 10 Safety Officer Jason Danen

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / C	NDITIONS MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR	 CRITICAL LOW FUEL MOISTURE LOW RELATIVE HUMIDITY Establish and maintain LCES. Take weather observations. Anticipate intense burning and rapid rates of spread. Watch for spot fires. Allow for adequate time to escape routes and safety zone.
ALL	HAZARD TREES	 Follow Hazard Tree Safety Guidelines. Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in sleeping areas prior to using. Maintain Situational Awareness.
ALL	DRIVING HAZARDS	 Drive defensively! Expect the unexpected around every curve. Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. Don't drive when fatigued. Adhere to agency driving regulations and guidelines. Be alert for wildlife, heavy trucks, & high-speed opposing and over-taking traffic. School bus stops exist along high-speed roads. Increase following distances on dusty roads. Slow down when you meet opposing traffic or encounter washboard surfaces.
ALL	AIRCRAFT OPERATIONS	Keep personnel out of drop zones when bucket work in progress. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.
ALL	INDIRECT LINE CONSTRUC	 Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers.
ALL	STRUCTURE PROTECTION	 If possible burn out or backfire as line construction progresses. Ensure LCES is in place Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone Look for propane tanks and other hazardous materials
ALL	BEAR PRECAUTIONS	 Pick up and remove all trash from fire line. Don't allow storage of food in tents. Manage trash to avoid attracting bears. Grizzly Bears are driven by food this time of year.
ALL	HEAVY EQUIPMENT/DOZEI	
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel if and when you don't know the plan. Ensure all personnel are familiar with the incident and IA communications plans.

NEEDLES OF FIVE...LEAVE IT ALIVE!

Whitebark Pine (WBP) – A Living Legacy

Facts:

- They typically grow above \sim 6,500 ft. elevation- on summits, ridges and rocky exposed slopes.
- They are slow growing; cones not produced until ~ 30-60 yrs. The oldest whitebark pine is in Idaho and is >1,270 years old!
- Act as snow fences to hold moisture later in the spring gradually releasing water into the stream systems.
- The seeds are an important food source for wildlife including black bear and the Clark's nutcracker.

Why is this species such a big deal?

• On December 15, 2022, the U.S. Fish and Wildlife Service published a final rule (87 FR 76882) to list the WBP as a threatened species under the Endangered Species Act.

General Information Regarding WBP:

- The Clark's nutcracker, a native bird, can carry up to 30 WBP seeds at a time and cache them up to 10 miles away from harvest site for future food source.
- The four main causes of WBP loss are white pine blister rust, mountain pine beetle attacks, fire exclusion and climate change.
- It is very important that we do our best to protect the remaining WBP. These survivors may contain genetic resistance to the rust that could be critical to the long-term survival of this species.

What Can I Do?

- Learn to identify whitebark pine and its' habitat - teach others.
- Report location information to a botanist collect coordinates/pictures/notes OR try Survey123 whitebark pine survey with this QR code (or link at bottom of page):

- Find out where 'plus' or 'elite' trees occur (AGOL or botanist) and NEVER cut them down. Protect them from Rx and wild fire.
- Avoid cutting (especially > 4" DBH), damaging (ex: digging/burning w/n 10 m., limbing, etc.) or impeding (ex: piling slash on top of or w/n 10 m.) WBP whenever possible in ALL management activities.
- Avoid constructing helispots or staging equipment, fire camps, vehicles, etc. in occupied whitebark pine habitat.
- « Cut other species, such as subalpine fir, in order to help promote the growth and vigor of the existing WBP.

WBP Mature Female Cones

Fascicles at Branch Ends

- 5 needles per fascicle (group)
- Needle fascicles clustered on the end of branches
- WBP can easily be confused with lodgepole pine, which can have similar bark, but only 2 needles per fascicle
- Needle clusters on the branches have thicker and more clumpy appearance than lodgepole pine
- Crown is broadly branched and
- Thin, gray bark
- Female cones purplish-brown; often in groups of 2-5 (3) cones.

Survey 123 Whitebark Pine Survey link (must have Survey 123 app downloaded, can access survey without AGOL account): arcgis-survey123://?portalUrl=https://www.arcgis.com&itemID=926855e838634db5aa1bb7d0106597b3

FINANCE MESSAGE

Phone Line: 303-242-1303

Fire Personnel: For all resources, please send all documents digitally to <u>2024.packtrail.finance@firenet.gov</u> everyday. Do not send duplicates.

In the email subject line, please use the keyword for your resource type:

Resource Type	Keyword
Overhead, Agency Crews, Cooperators	CTR
Contracted Equipment and Crews	SHIFT TICKET
Buying Team, Aircraft	COST
Comp/Claims	COMP
Lend/Lease Resources	LEND/LEASE

Email all documents that pertain to your assignment:

Fed Agency Overhead/Crews/Equipment	Agency ADs	VIPR / EERA Resources	Contract Crews	Cooperators
Resource Order	Resource Order	Resource Order	Resource Order	Resource Order
CTRs	Casual Hire Form	VIPR Agreement	Manifest	Agreement
Crews - manifest	CTRs	Schedule of Items	Agreement/Contract	Shift Tickets/CTRs
		Shift Tickets Pre-Inspection	Pre-Inspection Crew Time Reports	Pre-Inspection

Please include your email address and phone number in your email.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

Contract Crews – Crew Boss time starts at briefing. Contract crew member times start ½ hour later. Meal breaks need to be shown and time stops at arrival back at ICP.

Any questions? Please call or email finance

Reminder for Federal Employees: When claiming Hazard Pay you must include the suppression action being performed. This includes operations that directly support control of fire (e.g., activities to extinguish the fire, firefighting, ground scouting, spot fire patrolling, search and rescue operations, and backfiring). NOTE on CTR if you are

Lend/Lease from fire name.

Reminder for Contract Daily Rate Resources: Please note your meal break and if applicable, any down/out of service time on your Shift Tickets. Shift Tickets need to be filled out completely and signed by the contractor and government official. NOTE on Shift Ticket if you are Lend/Lease from fire name.

Inspection performed at Ground Support.

COMP/CLAIMS PROCESS

Cache Replacement: Complete appropriate form and take to Supply.

For incident replacement requests for non-cache items, a Property Loss or Damage Report (OF-289) must be completed and include contact name and phone number of person on the incident, a valid email address, home agency name, and home unit address. Please obtain statements and signatures from your supervisor and SME prior to submitting. Provide pictures when possible. The item must be turned into Supply.

TRAINING SPECIALIST MESSAGE

- The CIIMT 10 Training Specialists will be available to finalize (Close Out) Incident Training Documentation until tonight, 10–14 2100 Hrs.
 - Beginning Tuesday, 10–15, registration and finalization of Training Documentation will be facilitated by a remote TNSP.
- Any "open" Training Documentation Packages, initiated with the CIIMT 10 TNSP's will be transferrred to the remote TNSP on Tuesday, 10-15.
- If the incident changes in complexity, Trainees remaining on the incident should start a new Evaluation Record in their PTB listing the new complexity level.
- The CIIMT 10 Training Home Page will remain active until records are transferred to the incoming, remote TNSP. Scan the QR Code on the IAP Cover Page and select the "Training Specialist" link to access the Training Home Page.
 - Evaluation Forms, Blank Evaluation Records, and Tips for writing effective evals are available on the Training Home Page.
- SAVE TIME at the Training Close-Out by preparing your docs ahead of time. Follow the instructions on the Training Home Page.

Contact information for the CIIMT 10 TNSP's is listed on the Training Home Page.

Email orders to: CIIMT10Ordering@gmail.com
