27. Note any geospatial data available (indicate data format, content, and collection time information and labels): https://ftp.wildfire.gov/public/incident_specific_data/								
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):								

Sep 8, 2024

Incident: Red Rock

Active Group Torching Running Long-range Spotting

Narrative:

Due to warmer temperatures and lower RH values fire activity has increased.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory) Light Logging Slash

Narrative:

Lots of dead and down timber.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

Old Red Rock lookout.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed

36	. Projected	Incident	Activity,	Potential,	Movement,	Escalation,	or Spread	and inf	luencing	factors	during	the i	next
					ind 72-hour						-		

12 hours: Increased fire activity, short runs, and spotting.

24 hours: Fire could move to the northeast with terrain influence and cross over FS 112 road and FS 55 road.

Fire could impact Road 112 with access into Yellow jacket Guard Station and Black Eagle Mine.
There are 40 plus structures in the Yellow Jacket drainage.

Fire behavior could impact FS road systems, specifically road 112 with access into Yellowjacket 72 hours: Guard Station and Black Eagle Mine, along with FS road 113 into the Bighorn Crags recreational area. Potential impact to the Bighorn Crags campground and recreational users off 113 road.

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Provide for firefighter and public safety. Protection of forest timber resources and impact to forest road infrastructures. Impact to the Bighorn Crags campground and recreational users off the 113 road. Limit road impact to Yellowjacket Guard Station.

- 38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:
- 12 hours: Impact to the FS road 110 and recreational infrastructures that lead to the Crags.
- 24 hours: Compromising the 112 road.
- 48 hours: **Compromising the 113 road.**

72 hours:

Incident: Red Rock

#### Anticipated after 72 hours:

- 39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:
- 12 hours: Aerial resources Air attack, 2 Type 1 helicopters, 1 TFLD/DIVS, 1 REMS, and 1 line safety
- 24 hours: Aerial resources Air attack, 2 Type 1 helicopters, 1 TFLD/DIVS, 1 REMS, and 1 line safety
- 48 hours: Aerial resources Air attack, 2 Type 1 helicopters, 1 TFLD/DIVS, 1 REMS, and 1 line safety

72 hours:

Anticipated after 72 hours:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

#### Terrain and fuel loading make it difficult for mixed tactics without Type 1 crews.

41. Planned Actions for Next Operational Period:

Fire is full suppression utilizing a mix of tactics (direct, indirect, and point protection where the probability of success is high and the risk is commensurate to the values at risk.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"):
- 43. Anticipated Incident Containment or Completion Date: 10/31/2024
- 44. Projected Significant Resource Demobilization Start Date:
- 45. Estimated Incident Costs to Date: \$940,000.00
- 46. Projected Final Incident Cost Estimate:
- 47. Remarks (or continuation of any blocks above list block number in notation):
- 49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
