## Incident Status Summary (ICS-209)

Incident: **Stockade Canyon**

**Short Crown Runs  
Group Torching  
Short-range Spotting**

Narrative:

**Due to a smoke inversion the last couple of days unable to fly a more accurate fire perimeter**

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Brush (2 feet)  
Timber (Grass and Understory)**

Narrative:

**Grass, Sagebrush, and Juniper**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):  
**3 Primary Residences 2 miles to the East of the Stockade fire eastern progression. HWY 447 could be Possibly impacted within the next 48 to 72 hours.**

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Continued growth to the north, east, influenced by W-SW winds, With 500-1000 ac of fire growth**  
 24 hours: **Continued growth to the north and east influenced by strong W-SW winds. 500-1000 ac growth**  
 48 hours: **The threat for thunderstorms will increase Friday afternoon into the weekend with potential for erratic outflow winds, dry lightning strikes, and localized heavy rainfall**  
 72 hours: **Continued growth to the north and east 500 - 1000 ac growth depending on weather forecasts**  
 Anticipated after 72 hours: **If all orders are filled, and containment objective are being met, growth should be diminishing**

37. Strategic Objectives (define planned end-state for incident):

**Full Suppression utilizing approved tools within the WSA. Minimize acres burned in Primary and General Sage grouse habitat. Protect identified cultural and historic resources in the fire area. Prevent fire spread into adjacent jurisdiction and populated areas.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Critical Priority and General Sage grouse habitat threatened as well as several LEKs. Historic structures threatened**  
 24 hours: **Critical Priority and General Sage Grouse habitat threatened as well as several LEKs. Historic structures threatened**  
 48 hours: **There are multiple residence, transmission lines, and HWY 447 that are within 2 miles of the fire. Critical Priority and General Sage grouse habitat threatened as well as several LEKs.**  
 72 hours: **Any fire spread into the Granite Mountains east of Hwy447 needs to be kept west of the**

<p>39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:</p> <p>12 hours: <b>critical need for 2 Line Safety, 1 RADO, 2 Division and 2 Task Force Leaders</b></p> <p>24 hours: <b>Continued need for crews and aerial support with bucket work from helicopters and logistical needs</b></p> <p>48 hours: <b>Continued need for crews and bucket work from helicopters, and logistical needs</b></p> <p>72 hours: <b>Continued need for crews and bucket work from helicopters, and logistical needs</b></p> <p>Anticipated after 72 hours: <b>Expect to begin maintaining current resources as containment objectives are met.</b></p>														
<p>40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:</p> <ol style="list-style-type: none"> <li>1) critical resource needs identified above,</li> <li>2) the Incident Action Plan and management objectives and targets,</li> <li>3) anticipated results.</li> </ol> <p>Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.</p> <p><b>Operational challenges are accessibility due to fire burning in WSA. Access is very limited to vehicles. Fires in this area always require a heavy handcrew commitment and aircraft to support the crews working the fire. Aircraft are needed to support crews both tactically and logistically on a daily basis. Also needed for emergency evac if needed of personnel. Ground travel times out of the WSA from the fire location are in excess of 1.5 hrs just to get to pavement. Fires in this area typically last 5-7 days and require a lot of mop-up due to the juniper component.</b></p>														
<p>41. Planned Actions for Next Operational Period:</p> <p><b>Using direct and indirect tactics with handcrews supported by aircraft, limit fire spread to the North and East utilizing changes in fuels and terrain and cherry-stem roads within the WSA. Limit fire spread to the south and west by reinforcing the heel and flanks.</b></p>
