OPERATIONAL PERIOD

8/9/2024 0600
 to
8/9/2024 2100

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Stockade Canyon Fire</p>	2. Operational Period:	Date From: 8/9/2024 Time From: 0600	Date To: 8/9/2024 Time To: 2100
--	-------------------------------	--	------------------------------------

3. Objective(s):

- Incident Objectives**
- Firefighter and public safety take precedence over all other incident objectives and incident requirements
 - Protect Greater Sage Grouse habitat throughout the planning area (SFA, PHMA, GHMA, and OHMA) minimize fire size and intensity where safe and effective to do so to decrease cumulative loss of habitat
 - Protect the community of Gerlach and associated infrastructure, nearby ranches/residences and transmission lines within the HWY 447 corridor to minimize threat to public safety and minimize negative impacts to highly valued resources such as private property and infrastructure in coordination with responsible jurisdictional agencies
 - Identify and protect cultural, and historic properties and resources

- Management Objectives**
- Protect property, improvements, and infrastructure.
 - Ensure coordinated, timely and accurate release of public information.
 - Foster and maintain relationships with all cooperators and stakeholders.
 - Protect economic, natural, cultural and heritage resources.
 - Maintain fiscal accountability and keep costs commensurate with values at risk.
 - Any fire spread into the Granite Mountains east of HWY 447 needs to be kept west of the ridgetop in order to protect Lahonton cutthroat trout (T&E) recovery streams on the east side of the mountains

- Control Objectives**
- Keep the fire North of Smoke Creek RD/Suprize Valley RD
 - Keep the fire South of Coyote Canyon
 - Keep the fire East of the Buffalo creek drainage
 - Keep the fire West of HWY 447 Corridor

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Fuels and Fire Behavior Advisory

Northern Half of Nevada

July 25th – August 8th, 2024

Subject: Recent above normal temperatures preceded by prolonged exceptional heat in early July rapidly dried out fuels in Nevada. Recent moisture has lowered fire danger temporarily in the dead fuels in localized areas, but upcoming dry weather and breezy winds will quickly reverse those effects in northern and western Nevada. Fine fuel loading is also well above normal and fully cured in northern Nevada, adding to rapid fire spread potential. These fuel conditions are rapidly increasing fire behavior, especially with increasing wind or lightning.

Discussion: The following conditions are being experienced/observed:

- Dry and breezy conditions returning to Nevada with relative humidity 7-12% and poor overnight recovery.
- Well above normal fine fuel loading, continuity, and tall grass across northern Nevada.
- Extreme critical Sagebrush live fuel moisture values below 80%.
- ERCs 80th- 90th percentile in some areas, but on the rise.
- 100 and 1000-hr time lag fuels rapidly decreasing.
- Reports of sagebrush die off and matted tumbleweed in northern Nevada drainages increasing fire spread.

Difference from normal conditions: Live and dead fuel moistures dried out weeks ahead of schedule due to very hot and dry conditions in June which were amplified by exceptional heat and dryness in early July. Live sagebrush fuel moisture is well below normal, and in some areas at record lows. 100-hr and 1000-hr fuel moisture has increased due to recent moisture but is rapidly decreasing again due to dry and breezy weather. Above normal fine fuels are also widespread over northern Nevada. (See Img 2 below) **Significant periods of hot and dry weather recently have also worsened the short-term drought conditions and allowed large fire activity to increase.** Extreme fuel driven fire behavior has been observed on the Wilder Fire in Northwest Nevada and on the Whisky Canyon Fire in Northern Nevada in the lower elevations where fine fuels are abundant. Large fire activity has increased rapidly in recent days.

Concerns to Firefighters and the Public:

- Anticipate flashy fine fuels, sagebrush, and pinyon-juniper, to ignite easily and exhibit **advanced rates of spread, elongated flaming fronts and increasing fire brands; expect more long-range spotting, even in absence of slope and wind. You can't out run it!**
- Anticipate dust devils and fire whirls to develop in hot, dry and unstable conditions, especially in fine flashy fuels, that may jeopardize control lines and contribute to erratic fire behavior.
- Expect longer burn periods at mid to higher elevations.
- Fine fuel loadings in northern Nevada are dense and continuous and will support extreme rates of spread regardless of fuel heights.

Mitigation Measures:

- Modify tactics to account for potential high rapid rates of spread and high resistance to control.
- Communicate retardant drop effectiveness and modify as necessary; higher coverage levels or altered tactics may be required.
- Park all vehicles in clean, cold black; avoid driving or parking in unburned fuels.
- Ensure solid anchor points – keep one foot in the black.
- Constantly re-evaluate LCES – Lookouts – Communications – Escape Routes – Safety Zones.
- Consult the latest weather and fire danger information at <http://gacc.nifc.gov/gbcc/>

Area of Concern: Northern Half of Nevada.

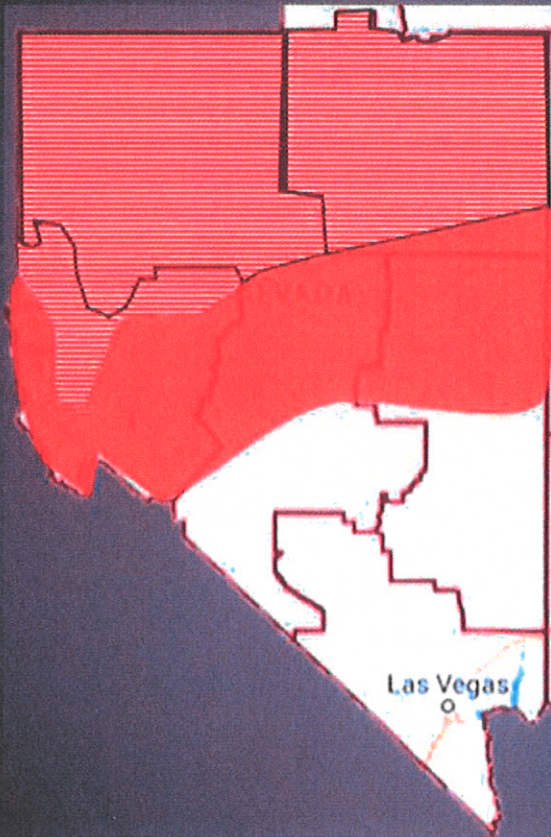

Issued By: Great Basin Coordination Center Predictive Services, Gina Palma (Meteorologist)

1. Incident Name: Stockade Canyon Fire	2. Operational Period:	Date From: 8/9/24 Time From: 0600	Date To: 8/9/24 Time To: 2100	Last Update

Forecast is based on forecast start time of 1600 PDT on August 08.

.DISCUSSION...

...LOCALIZED FIRE WEATHER CONCERNS FOR DRY AND BREEZY CONDITIONS ACROSS EASTERN LASSEN AND NORTHERN WASHOE COUNTIES, AND THE NORTHERN SIERRA FRONT THROUGH SATURDAY...

A dry air mass with poor overnight recoveries will continue through Saturday.

Breezy afternoon west-southwest winds with gusts to 25-30 mph will continue through weekend.

A cooling trend projected to start Sunday onward will bring improved overnight RH recoveries.

FRIDAY...

Sky/Weather.....Sunny. Haze early in the afternoon.

Temperature.....Max 93-95.

RH.....Min 10-13%.

20-Foot Winds.....Northwest winds around 7 mph shifting to the west in the morning, then increasing to southwest 9-14 mph gusting to 25 mph in the afternoon.

LAL.....1.

Chc Wetting Rain....0%.

Transport Winds.....Northwest around 10 mph shifting to the southwest by late morning afternoon, then becoming west-southwest around

Ventilation.....Poor to fair increasing to excellent in the afternoon.

Haines Index.....4 to 5.

5. Special Instructions

MIST: Minimum Impact Suppression Tactics

In spike camp:

- ✓ Select impact resistant sites for your tent: rocky or sandy soils are best.
- ✓ Camp at least 200 ft away from creeks, rivers, lakes, and ponds.
- ✓ Do not clear vegetation or dig trenches to create bedding sites.
- ✓ Pack out all garbage, including food scraps, cigarette butts, and flagging.
- ✓ Use toilets where provided. Otherwise dig a cathole 6-8" deep at least 200 feet from water. Bury toilet paper in hole.
- ✓ Carry water and bathe away from lakes and streams. Do not introduce soap, shampoo, or other chemicals into streams.

Leave No Trace Camp Away From Water

Why It Matters

Camping too close to water threatens water quality, displaces wildlife, damages fragile wetland plant communities, and spoils the view for other visitors. Camp at least 200 feet away from all water sources.

Finance Reminders

CTRs

- Total your daily hours and circle them on your CTR
- Document your CTR when Operations determines you are not able to take a lunch break
- When recording hazard pay, show the category of hazardous exposure (e.g., firefighting, hover hookup) on your CTR
- List all crewmembers on your CTR
- Write/sign legibly
- Keep your time current

APPROVED BY Paul Jones		SUPERVISOR Rich Brown		OPERATOR T.Holle	

- Make sure resource order number is listed on the shift ticket.
- Fill out shift ticket completely and legibly.
- Ensure signatures are legible.
- Document names of all operators.
- Document daily if transport is being kept by the incident
- Include all shift hours and show a lunch break or documentation for a compensable lunch break – even if equipment is on a daily rate
- Keep your time current

Please submit **daily** CTRs and Equipment Shift Tickets either hard copy at ICP or electronically through the email address below.

2024.stockadecanyon.finance@firenet.gov

If you have any possible claims, **DO NOT** wait until last minute. Please get them into Finance early as possible. Use email above.

THANK YOU FROM FINANCE

Important Fire Camp Information You Can Use

Shower Hours

Open: 0600 to 1200
Closed for cleaning: 1200-1400
Open: 1400-2200

Kitchen Hours

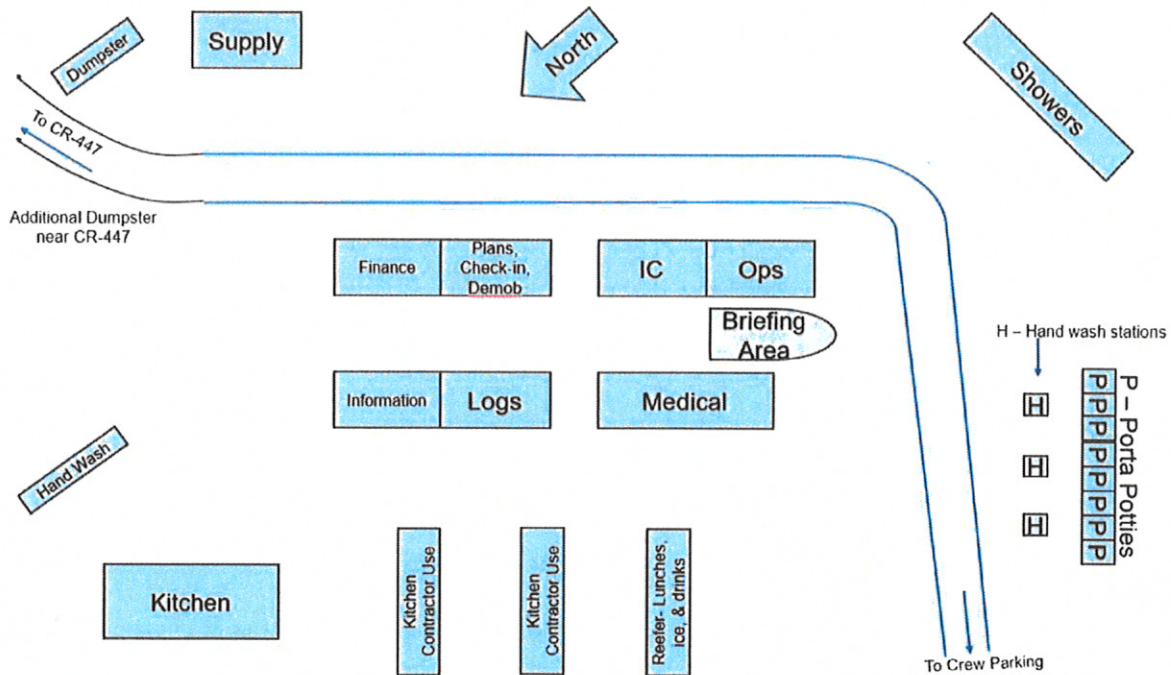

Open: 0530-0830 (breakfast)
Open: 1900-2100 (Dinner)
Lunches, ice, and drinks can be obtained at the reefer.

Supply Hours are 0630-2130

Please Remember Your Resource Order Number

Open Camp WIFI is "STARLINK", no password required.
Be kind and limit downloads so everyone can share the bandwidth!

COVID is still lurking in the shadows. Good Personal Hygiene and Hand washing has been shown to be the best way to limit transmission and keep the camp healthy.

Symptoms & Signs of Heat Illness

Heat Exhaustion: Victim will have cool, clammy skin; pale coloring; feel weak, dizzy and/or nauseous.

Treatment – Have individual sit in shade or cool area; administer fluids; loosen clothing and assure rest.

Heat Stroke: *This is a life-threatening medical emergency!!*

Victim will have hot, dry, red skin and possible convulsions. These symptoms can progress to unconsciousness and death!

Treatment – Initiate emergency medical procedures outlined in incident Med Plan. Immediately cool individual's body by pouring water over them, especially the head and upper body. Monitor the victim and provide whatever medical support necessary. Placing ice around the neck, groin and armpits can help speed the cool down.

Quote of the day

“Life is tough, it’s tougher if you’re stupid”

John Wayne

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Evacuation Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + Medical (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

UNIT LOG (ICS 214)
