HEALTH AND SAFETY MESSAGE

Safety First, Last and Always

INCIDENT: **Yellow Lake**

DATES: **October 29th – November 5th**

Major Hazard and Risk:

- **Hazardous Trees & Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Heads up, always look out for hazard trees around your work area.
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drinks, take frequent breaks, and pay attention to your body. (Even in cold or snowy conditions)
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how snow and weather will reduce the likelihood of utilizing helicopters or ground transportation for a medevac.
- **Infectious Disease/COVID-19:** Wash hands frequently, practice social distancing, wear face coverings when required, clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.

Narrative: As time moves on with this incident, so does our risk. With each passing day the very roots that secure the trees around you are burning away or the tree itself is burning from within just waiting for the right opportunity to come down on you.

Never stop looking at the environment around you!

Defensive Driving

- **Be a defensive driver at all times.**
- **Drive like other drivers don't see you.**
- **Be courteous to all vehicle traffic to and from the fire area(s).**
- **Don't have side bar conversations on the roads....provide the margin of SAFETY for all road users.**

Don't let this be you and your crew!

Incident Safety Officers: Brian Phillips & YOU!

HAZARD TREE SAFETY

- ✓ **Trees that have burned**
- ✓ **Shallow tree root systems**
- ✓ **Dead & broken top trees**
- ✓ **Leaning or hung up trees**
