INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY				
DOLLAR LAKE		Date/Time From: 09/12/2025 0700 FRI	Date/Time To: 09/12/2025 2200 FRI			
3. Objective(s): <u>Management Objectives:</u> <ul style="list-style-type: none"> Firefighter and public safety will be the highest priority throughout the incident. We will utilize a risk-based approach to address firefighter, aviation, and public safety through clear leaders intent with established work priorities and implementation of fundamental firefighting principles using risk-informed decisions. Implement strategies and tactics to minimize fire spread and intensity and develop contingency and structure protection plans to protect high-value resources. Continue to foster and maintain partnerships and relationships with Agency Administrators, cooperators, permittees, and stakeholders with effective and timely dialogue, meetings, and comprehensive information sharing. Provide timely and accurate information to the public. Keep cost commensurate with values at risk. <u>Control Objectives:</u> <ul style="list-style-type: none"> Keep fire South and East of Green River. Keep fire North of Forest Boundary. Keep fire West of the Continental Divide Trail (CDT). 						
4. Operational Period Command Emphasis: Prioritize firefighter and public safety while maintaining clear focus on the mission through coordinated suppression efforts and strong situational awareness.						
General Situational Awareness: Ensure every assignment has a clear task, purpose, and end state. Operate safely, efficiently, and with unified intent. Identify tactical hazards and develop effective control measures to mitigate risk and ensure crew safety. Coordinate with READs on suppression repair tasks.						
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>						
Approved Site Safety Plan(s) Located at:						
6. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table style="width: 100%; margin-top: 10px;"> <tr> <td style="width: 33%; vertical-align: top;"> <input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206 </td> <td style="width: 33%; vertical-align: top;"> <input type="checkbox"/> ICS 207 <input checked="" type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents </td> <td style="width: 34%; vertical-align: top;"> Other Attachments: <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ </td> </tr> </table>				<input checked="" type="checkbox"/> ICS 202 <input checked="" type="checkbox"/> ICS 203 <input checked="" type="checkbox"/> ICS 204 <input checked="" type="checkbox"/> ICS 205 <input type="checkbox"/> ICS 205A <input checked="" type="checkbox"/> ICS 206	<input type="checkbox"/> ICS 207 <input checked="" type="checkbox"/> ICS 208 <input checked="" type="checkbox"/> ICS 220 <input checked="" type="checkbox"/> Map/Chart <input checked="" type="checkbox"/> Weather Forecast/Tides/Currents	Other Attachments: <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____

OPERATIONS CHIEF		GRIF COCHRAN HAYDEN HOELSCHER (T)		BRANCH DIRECTOR			
DIVISION/GROUP SUPERVISOR		WILL HALL TIAE HOLLIDAY (T)		AIR OPERATIONS BRANCH DIRECTOR			
6. Control Operations/Work Assignments:							
<p>Continue to work with REAFs on rehab plan for Div A. Assist Structure Group in improving defense features in and around the Bible Camp area.</p> <p>Purpose: To reinforce existing containment by eliminating residual heat near control lines and improve readiness in case of increased fire activity, ensuring Green River Road remains a viable containment feature.</p> <p>End State: The fire is fully secured within current control features. Mop-up is completed to a depth that reduces the risk of escape. Contingency line prep along Green River Road is complete, providing a strengthened barrier to keep the fire east and south of the road.</p>							
7. Special Instructions:							
<ul style="list-style-type: none"> • ** Qualified medical personnel. • Road grader at ground support, available upon request. • Consult with assigned Resource Advisors on use of dozers, heavy equipment, and approval of draft sites. • Watch out for wildlife and the public on roadways. • No retardant use in the Green River Drainage.

6. Control Operations/Work Assignments:							
<p>Task Continue evaluating and improving structure defense systems in the Red Cliff Bible Camp. Assess and prepare for structure defense operations along Green River Road in the southern portion of the incident. In the event of a new incident within the TFR of the Dollar Lake Fire, the resources from Structure / IA will provide initial attack support to the local Forest as coordinated by the incident and local duty officers. Coordinate with Structure Group Supervisor to ensure data/structure plans are collected in a manner that can be captured electronically by the County Fire Chief.</p> <p>Purpose To ensure identified structures are protected through appropriate assessment, preparation, and implementation of defense measures, reducing risk to life and property as fire activity continues.</p> <p>End State Structure defense systems are in place and operational at Red Cliff Bible Camp. Structures along the southern half of Green River Road are assessed, prepped, and ready for defense if fire activity threatens the area.</p>							
7. Special Instructions:							
<ul style="list-style-type: none"> • ** Qualified medical personnel. • Road grader at ground support, available upon request. • Consult Sublette County Structure Protection Plan. • E-151 located in Ground Support (contact Planning Ops if needed)

6. Control Operations/Work Assignments:							
Task: Identify areas of high probability of success utilizing tactics in accordance with wilderness guidance given by the Bridger Teton National Forest and their Agency Administrators. Purpose: To stop progression of the Dollar Lake Fire moving south. End State: Fire progression has been stopped or limited in an area where there is little chance of the fire impacting the values at risk identified by the incident.

INCIDENT Weather Forecast

Forecast No: 18
Prediction For: Friday
Shift Date: September 12, 2025
Forecast Issued: September 11, 2025 at 1734

Name of Incident: Dollar Lake
Unit: WY-BTF-002533
Incident Meteorologist: Julie Malingowski
(801) 872-3416

JAM

Discussion: Friday will have variable cloudiness due to high cloud cover parked over a southwest to northeast corridor over the fire operations area. A few rain showers may develop in the afternoon, with the best chance of rain after 1700. Ridgetop winds will be out of the southwest in the morning and become out of the west by the nighttime hours, but winds will generally be terrain-driven throughout the day. Saturday will likely bring afternoon thunderstorms thanks to abundant daytime heating in the morning hours. Showers and storms will move out of the south on Saturday.

Forecast for Today:

Afternoon and evening showers and isolated thunderstorms

Sky/Weather: 60% chance of rain in the afternoon/evening hours. A trace to a 0.05" of rain is expected by midnight.

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Dollar Lake	DATE: 9/12/2025	Shift: Day
Bear spray use and safety		
<ul style="list-style-type: none"> Individuals, or at least every 3rd person working in a crew, are required to carry bear spray at all times except when in areas of concentrated and large groups of human activity (such as base camps). As a general rule if you are more than 100 feet away from people you will need your own can of bear spray. Bear spray and transport cozy will be checked out to all individuals on the fire and will be returned at demobilization. Cozies will be utilized when transporting bear spray in an enclosed area such as a vehicle cab. Bear spray must be worn on your person and be readily available for use (e.g., hip holster not within line gear). Pepper spray may never be transported in cockpit of aircraft, it always goes in cargo area. It must also be within approved container (i.e., pepper spray cozy). Pilot should be told that it is on board. Report any incident where pepper spray was used to your supervisor as soon as possible. 		
Food storage, garbage, attractants and camps		
<ul style="list-style-type: none"> Food, garbage, & all other bear attractants must be stored in compliance with Forest Food Storage Order, including at all camps on or adjacent to the Forest. Hard sided includes enclosed semi-trailers, enclosed hard sided trailers, vehicle cabs or hard-sided toppers, agency-provided bear boxes, FS-approved garbage bins or dumpsters, and IGBC containers. (Consider carrying nuts and bolts to secure IGBC coolers) Storage options for backcountry camps: Within agency-provided bear boxes or IGBC approved containers or hung 10 feet off the ground and 4 feet from any vertical support. Electric fencing or other approved methods may be used in situations where the quantity of attractants needing storage exceeds the available container capacity. A camp manager is required when food storage methods consistent with the Food Storage Order cannot be provided at base camps. Backcountry spike camps will also have a camp manager. The role of the camp manager is to provide a 24-hour presence, thereby deterring bears from entering camps and ensuring a prompt response should it happen. Camp managers will be provided or trained by the Forest. In base camps, arrangements must be made to haul garbage off-site before storage capacity is reached. Daily transport of garbage to off-site locations must be scheduled for spike camps and concentrated use sites. 		
Bear Encounters		
<ul style="list-style-type: none"> If you encounter a bear, DO NOT RUN. If you are with others, get together in a group and stand your ground. Bear attacks happen very quickly, so immediately prepare your pepper spray for use. If the bear is aware of you, talk to it in low, soft tones so it knows you are human and back away slowly but deliberately in the direction from which you came. Use your pepper spray if the bear approaches closely (range is up to about 30 feet). Report all bear encounters and pepper spray discharges (accidental or intentional to your supervisor, resource advisor, and or safety officer). 		

Safety Officers: Todd Legler, Bob Buhr, Andy Williams, Matt Allen, Rick Macintyre, and Bruce Malloy

DOLLAR LAKE PLANS PROCEDURES

Resource Extensions & Crew Swaps

Forms can be obtained in the Plans or Ops Yurts. Please complete the forms with all relevant information and return to the Demob desk in the Plans Yurt or email to **2025.dollarlake.demob@firenet.gov**. Electronic forms can also be requested by emailing Demob.

Demob Instructions

To begin your demob, visit the Plans Yurt in ICP to obtain your demob checklist.

- Checklist items to be completed at ICP, in order:
 - Communications
 - Finance

Once items are completed at ICP, proceed to Staging as you leave the incident.

- Checklist items to be completed at Staging, in order:
 - Supply
 - Ground Support
 - Weed Wash

Once you have gotten all the signatures and are ready to leave, take a picture of the form and email it to: **2025.dollarlake.demob@firenet.gov**

The form must be received by the demob unit when you leave.

You will not be released through dispatch or made available for other incidents unless you follow this process.

Thank You!

Reefer Truck Hours: 0600 to 2200

Shower Hours: 0630 to 1200

1400 to 2215

Supply Hours: 0630 to 2130

Please fill out an ICS 213 or email 2025.dollarlake.ordering@firenet.gov

Include: order #, Name with contact number, delivery location, and time and date needed.

Note: Line orders submitted before **10:30 AM** will be processed within **24 hours**.
Orders submitted after **10:30 AM** will be processed within **48 hours**.

Ground Support: Dave Fritzsche GSUL 928-527-8251

Fueling Hours: 0600-1000; 1100-1730 and 1900-2200

- Speed Limit around base camp: 5 mph, fire roads: 20 mph
- No parking in Sleeping areas.
- Watch for "PERSONNEL ON FOOT", rocks, and ruts while driving in base camp.
- **⚠ Note: Please clean up after yourself — Bears are active in the area.**
- **Fire Crews:** Please verify locations of traceable equipment in the field, as well as the number from their brass plate. Divisions should maintain a copy, as well as give information to Logistics!

The items listed here are considered consumable. Replacement requests for these parts should be filled at the Incident Supply Unit or Local Cache and marked off. If the order is unable to be filled it should be sent to Ordering for S# assignment and sent to a Buying Team or purchasing support for the incident acquisition, or provided to the requesting resource for fill at the home unit.

Items highlighted in gray should be fillable at most cache locations.

REQUESTING PARTY: If the items you are ordering are not listed above, an OF-296 (Property Loss/Damage Form) *MAY* be required.
Be descriptive on your orders and fill the order form out completely!

READ Message: WATERBAR REFRESHER

Waterbars prevent gullying by diverting water captured by a fireline. Making waterbars work involves a handful of features:

- **Distance / Spacing** - The rule of thumb is the steeper the grade, the more frequent the placement of waterbars. Consider how much water will get captured by the line from the next uphill waterbar (or start of the micro- watershed).
- **Diagonal downhill** – the waterbar should be installed at least 30 degrees, and up to 45 degrees, downhill of perpendicular across the line (see drawing above)...otherwise it won't divert the water from the line.
- **Deep enough** - at least 18" deep, so it won't get overtopped by the water coming down the line.
- **Long enough** - extends all the way from one edge of the line on the uphill side of the diagonal, and into the green on the downhill side. If it isn't all the way across the line on the upper side, runoff will flow around it.
- **"Daylighted"** - make sure the runoff from the 'bar can flow into the green, and isn't obstructed by a berm or other blockage like root balls, slash.
- **Dissipated** - if the outlet has the potential to create a gully, build a small rock "garden" to dissipate the flow (small chunks of wood will work).
- **Water bars are NOT:**
 - perpendicular, ninety-degree trenches or rolling dips across a fireline
 - a sediment trap or 'tank trap'
 - made to be driven over (easily)
 - an open ditch made to carry water from one side of a fireline to the other

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Evacuation Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + Medical (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 108

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
