INCIDENT: Dollar Lake Fire		DATE: 9/16/25 Shift: Day	
Operating in Cold Weather - Avoid the Crud			
<ul style="list-style-type: none"><li>• Cold and Flu Season is upon us. It’s imperative that personnel keep eating well and hydrating. Stay on top of vitamin and electrolyte intake. See Medical Unit for medicines and other needed supplies to remedy and keep colds in check.</li><li>• Be cognizant of your sleeping patterns. It is easy to get behind on sleep if you’re not sleeping well due to cold weather. Communicate needs such as additional sleeping bags, blankets, clothes etc. etc. and work with Supply to address those needs.</li><li>• Pay attention and maintain personal hygiene standards. Wash hands whenever possible and utilize hand sanitizer when available. Keep a clean camp and sleeping area.</li></ul>			
Keeping Warm			
<ul style="list-style-type: none"><li>• Dress in layers, add and remove as necessary. A moisture wicking base layer along with an insulating middle layer and a waterproof outer layer to stay warm and dry if necessary.</li><li>• Just like you need to take breaks from work your body needs breaks from the cold. Take warm up breaks if necessary and drink warm liquids/foods if possible.</li><li>• Although counter intuitive to working try and limit exerting to the point of sweating. Moisture and cold weather do not mix well and can cause problems. Remove any wet clothing immediately.</li></ul>			
What does this all mean?			
Take care of your health, hygiene and wellbeing. Eat and hydrate properly to support your immune system. Don’t skip on healthy fats and carbohydrates.		Ensure you are getting enough rest and quality sleep. Don’t be afraid to take a shower.	

Safety Officers: Todd Legler, Bob Buhr, Andy Williams, Bruce Malloy and Rich McIntyre
