## Fire Weather Forecast

**FORECAST NO:** 03

**PREDICTION FOR:** Friday's Operational Period

**SHIFT DATE:** July 18, 2025

**INCIDENT:** Monroe Canyon

**UNIT:** Fishlake NF

**SIGNED:** *Chris Foltz* **Chris Foltz**

**TIME AND DATE ISSUED:** July 17, 2025 1500

### Discussion:

Monsoonal moisture will remain in place today resulting in the potential for showers and thunderstorms. A mix of dry and wet thunderstorms is expected with a 40-50% chance of a wetting rain ( $>0.10''$ ). Lightning as well as gusty and erratic winds are possible in and near any thunderstorm activity. Isolated to scattered thunderstorms are possible once again on Saturday but coverage and the likelihood of a wetting rain are expected to be less.

### TODAY:

**Sky/Weather:** Partly to mostly cloudy. Isolated to scattered storms after 1200. Gusty and erratic winds are possible near thunderstorms. Smoke/haze in drainages and sheltered areas where precipitation isn't received.

**Max Temperature: Valleys:** 84-88. **Mid-Slopes and Ridges:** 74 to 78.

**Min RH: Valleys:** 28 to 38 percent. **Mid-Slopes and Ridges:** 25 to 35 percent.

**20 ft Winds: Lower Valleys:** Terrain 3 to 7 mph becoming southwest 10 to 14 mph with gusts to 18 mph.

**Mid-slopes and Ridges:** Southwest 8 to 12 mph with gusts to 17 mph, higher near thunderstorms

**Transport Winds:** W 11 mph.

**Chance of Wetting Rain:** 50 percent.

**Expected Rain Amount:**  $0.07''$ , higher in thunderstorms

### TONIGHT:

**Sky/Weather:** Becoming mostly clear. Smoke and haze in valleys and sheltered drainages.

**Min Temperature: Lower Valleys:** 57 to 61. **Mid-Slopes and Ridges:** 58 to 63.

**Max RH: Lower Valleys:** 55 to 65 percent. **Mid-Slopes and Ridges:** 45 to 55 percent.

**20 ft Winds: Valleys/Lower Slopes:** Terrain/down-valley 3 to 6 mph.

**Mid-Slopes and Ridges:** Downslope/down-valley 4 to 8 mph.

**Inversion:** 500 ft after 2100.

### SATURDAY:

**Sky/Weather:** Smoke, haze, and clouds until late morning when the inversion dissipates then partly cloudy with a chance for showers and storms. Gusty and erratic winds are possible near thunderstorms.

**Max Temperature: Valleys:** 86-90. **Mid-Slopes and Ridges:** 77 to 81.

**Min RH: Valleys:** 18 to 28 percent. **Mid-Slopes and Ridges:** 20 to 30 percent.

**20 ft Winds: Lower Valleys:** Terrain 3 to 7 mph becoming southwest 8 to 12 mph with gusts to 14 mph.

**Mid-slopes and Ridges:** Southwest 5 to 9 mph with gusts to 15 mph.

**Transport Winds:** SW 13 mph.

**Chance of Rain:** 20 percent.

**Expected Rain Amount:**  $0.02''$ , higher in thunderstorms

---

**OUTLOOK FOR SUNDAY THROUGH TUESDAY:** A warming and drying trend will begin on Sunday and continue through the week. While an isolated thunderstorm will be possible over higher terrain each afternoon, moisture will be very limited so little if any precipitation is expected.

FIRE BEHAVIOR FORECAST	
<b>FORECAST NUMBER</b> 3	<b>TYPE OF INCIDENT:</b> Wildland Fire
<b>INCIDENT NAME:</b> Monroe Canyon	<b>OPERATIONAL PERIOD</b> 7/18/25
<b>DATE ISSUED:</b> 17 July 2025	<b>TIME ISSUED:</b> 1900
<b>UNIT:</b> Fishlake National Forest	<b>SIGNED</b> <i>Ken Loda</i>
	Ken Loda, FBAN
INPUTS	
<b>WEATHER SUMMARY</b> See the preceding Fire Weather Forecast.	
<p><b>FUELS CONDITIONS</b> Fuel moisture: Historically, live fuel moistures are climbing at this time. Even with the precipitation we've gotten, those values are rising slightly or static. Live and dead fuel moistures are at or near historic low points for this time of the year. One-hour fuel moisture can be expected to be about 11% at 0600. That will drop to about 4% on exposed flat areas and south aspects from about 1200 to 1700. The 10-hour fuels are at 9%, the 100-hour about 7% and the 1000-hour fuels about 8%. After 2030 the fine fuel moistures will fairly rapidly increase to about 8%, then gradually build to about 12% from midnight through the night. Live fuel moisture: The live moisture is near or below 100% in conifers, but this could vary with aspect and setting.</p>	
OUTPUTS	
<p align="center"><b>SOME MORE RELIEF TODAY, BUT WATCH OUT</b></p> <p><b>GENERAL FIRE BEHAVIOR</b> This fire continues to remain active through the night. Fuel moisture in the heavier dead fuels – the 100- and 1000-hours – are little influenced by light precipitation or changes in relative humidity, so are likely to continue to burn to some extent through the night. General conditions will be fairly active with moderate flame lengths and rates of spread through the day, with some increase around 1200 today with our predicted winds. Much of the fire behavior is dependent on the afternoon winds, with thunderstorms complicating those. General winds will be less today but could still produce some torching and related spot fires. Because of the low live fuel moistures much of the fire has some potential for single and multi-tree torching. At peak burning conditions the behavior in the timber understory is expected to be ROS 7 to 10 ch/hr with flame lengths 7 to 8 feet; in the sage/grass ROS 14 to 24 ch/hr, with up to 5-foot flame length.</p> <p><b>Spotting:</b> Torching and spotting is possible. Spotting distance could be up to 2000 feet in the forecast gusts. Watch for rollout on steep slopes. The probability of ignition will be 20% early and late in the day, and up to 65% during peak burning conditions.</p> <p><b>Crown fire potential:</b> Should we get outflow gusts in the right fuel settings short crown runs could be possible, but not particularly likely.</p> <p><b>SPECIFIC FIRE BEHAVIOR</b> The forecast winds align favorably with much of the terrain, and may push fire along ridges and down the slopes on the uncontrolled eastern flank.</p>	
SAFETY	
<p><b>SAFETY</b> As always keep your situational awareness up. Any nearby thunderstorm activity may push the fire in unpredictable directions.</p> <p><b>AIR OPERATIONS</b> Thunderstorm gusts could complicate if not prevent effective use of aircraft for some time.</p>

## SAFETY MESSAGE/PLAN (ICS 208)

<b>1. Incident Name:</b> Monroe Canyon	<b>2. Operational Period:</b> Date From: 07/18 Time From: 0600	Date To: 07/19 Time To: 0600
<b>3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:</b>  <p style="color: red;"><b>There is a <i>Fuels and Fire Behavior Advisory</i> for this area.</b></p> <p>Valid July 13-July 26, 2025</p> <p><b>Subject:</b> Critically dry fuel conditions are present across Central/Southern Utah and the Arizona Strip extending into the Colorado West Slope and southwest Wyoming. The ongoing drought and recent hot and dry weather has resulted in extreme fire behavior. Continued above normal temperatures and ongoing dry weather, will keep the potential for extreme fire behavior elevated until significant precipitation arrives.</p> <p><b>Concerns to Firefighters and the Public:</b> Dry fuels and rising temperatures are creating conditions for fast-moving, unpredictable wildfires. Firefighters face limited suppression options, while communities near wildland-urban areas are at heightened risk. Even routine activities can spark new ignitions. Extreme caution is critical as fire danger escalates.</p> <p><b>Mitigation Measures:</b></p> <ul style="list-style-type: none"> <li>Monitor conditions closely; anticipate high resistance to control and intense fire behavior.</li> <li>Plan for longer operations and use indirect tactics as needed.</li> <li>Be prepared for torching and spotting; increase lookouts and contingency lines.</li> <li>Avoid direct attack in volatile brush, especially on slopes.</li> <li>Treat all vegetation as highly flammable; spotting distances may increase.</li> <li>Adjust escape routes and safety zones accordingly.</li> <li>Plan for extended shifts and heat exposure—rotate crews and hydrate often.</li> <li>Use updated forecasts to anticipate critical fire behavior periods.</li> </ul> <div style="text-align: center; margin: 20px 0;">  </div> <p style="text-align: center;">Avoid the inertia of bad ideas.</p>

## Attention Field Maps Users!

Please be sure that you are using the “2025 Monroe Canyon Operations Edit” field map. This map comes pre-set so that your information gets associated with our fire. Using local unit maps can result in your information getting lost, thus not making it into the operations and similar maps. If you cannot find the map, try searching for “Monroe”. If it still doesn’t show up, check with the Situation Unit to get added to the incident field maps group.

You collect good information out there. Let’s make sure it is useful!
