<b>3. Objective(s):</b> <ul style="list-style-type: none"> <li>• Ensure that firefighter and public safety are the top priority.</li> <li>• Protect and minimize fire impacts to the values at risk including structures and infrastructure in threatened communities and inholdings.</li> <li>• Utilize tactics that have the highest probabilities of success, with a minimal amount of risk.</li> <li>• Strengthen relationships with stakeholders and public by providing accurate, thorough, and timely information</li> </ul>						
<b>4. Operational Period Command Emphasis:</b> <ul style="list-style-type: none"> <li>• Dead or fire weakened trees of any size present safety issues, stay aware of what's around you, even outside the fire perimeter.</li> <li>• Fir and slash create challenging fire intensities, but also many opportunities to hide spot fires which can rapidly develop and build intensity, thus safety and control problems. Remain vigilant to detect spot fires.</li> </ul>						
<b>General Situational Awareness:</b> <ul style="list-style-type: none"> <li>• To avoid congestion, day shift should use the Box Creek Road to travel between ICP and the line. Night shift should use Koosharem Canyon Road to travel between ICP and the line.</li> <li>• If possible, avoid areas with standing dead or fire weakened timber. See Hazard Tree Safety on p.20 of the IRPG for mitigations.</li> <li>• Continually evaluate escape routes and safety zones as fire activity increases. See LCES on p.5 of the IRPG.</li> <li>• Drive defensively. Keep speed low, wear safety belts, and obey traffic regulations. Watch for animals (deer, elk, cattle) on the highway and on incident roads.</li> </ul>

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 7	<b>TYPE OF FIRE:</b> Wildland Fire
<b>FIRE NAME:</b> Monroe Canyon	<b>OPERATIONAL PERIOD:</b> 07/23 day and night
<b>DATE ISSUED:</b> July 22, 2025	<b>TIME ISSUED:</b> 1730
<b>UNIT:</b> UT-FIF	<b>SIGNED:</b> Mike Pagoaga - FBAN

### WEATHER

**Temp:** 65-79 **RH:** 14-28%  
**Wind:** Terrain driven shifting to west 6-12, gusts up to 17

*Local Weather Thresholds that shout **WATCH OUT** Temperatures above 85°,  
Relative Humidity below 20%, Eye level winds over 10 mph*

### FUELS

Predominant fuels are traditional high load, timber understory (TU5), slash/blowdown (SB4). Numerous prescribed fires, wildfires, and mechanical treatments within the fire area. Heavy accumulations of slash exist adjacent to the perimeter due to fuels treatments in various stages of completion.

Fuels Moistures are at critical levels with 100-hour and 1000-hour dead fuel moistures below 10%. ERC is near the 95<sup>th</sup> percentile. This area is currently under a fire behavior and fuels advisory.

### FIRE BEHAVIOR

#### **General Fire Behavior:**

Another day of increasing fire activity. Torching, group-torching, spotting and surface fire spread should be expected as the fire spreads to the north and east. If the fire aligns with slopes to the north, spread rates and spotting distances will increase. Peak burning times will occur when RH drops below 25%, with the most active time being from 1600-1800 when RH are at their lowest.

*Fine Dead Fuel Moisture: 3% unshaded, 6% shaded  
Probability of Ignition 80%, Short range spotting close to .1 mile*

#### **Specific Fire Behavior:**

**BRANCH I:** Suppression efforts have been successful over the past few shifts resulting in minimal fire behavior or fire potential. Any remaining heat south of Hunts Lakes will have the possibility of moving down slope due to further drying fuels.

**BRANCH II:** This is the most active Branch of the fire, with the majority of the heat within Monroe Canyon. Expect active fire behavior all day with torching, spotting and the potential for up-hill, up-canyon runs. West winds will facilitate the potential for the fire to cross Monroe Canyon to the north.

**BRANCH III:** Continued heat from yesterday's firing operations around Monroe Meadows will have the potential for torching and spotting. Today's conditions will aid in creating a good black edge. Watch for spotting from interior and heavy fuels into the timber to the east of DP 30 toward Bagley Ranch and around the structures within Monroe Meadows.

**Night:** Poor overnight recoveries will facilitate moderate fire behavior throughout the night. Smoke will eventually settle with downslope winds and could make visibility poor.

### Safety

As activity increases ensure your plan is understood by all personnel.  
Maintain strong communication with your supervisor and adjoining resources.
