INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY/NIGHT	
MONROE CANYON		Date/Time From: 07/24/2025 0600 THU	Date/Time To: 07/25/2025 0600 FRI
3. Objective(s): • Ensure that firefighter and public safety are the top priority. • Protect and minimize fire impacts to the values at risk including structures and infrastructure in threatened communities and inholdings. • Utilize tactics that have the highest probabilities of success, with a minimal amount of risk. • Strengthen relationships with stakeholders and public by providing accurate, thorough, and timely information			
4. Operational Period Command Emphasis: • Dead or fire weakened trees of any size present safety issues, stay aware of what's around you, even outside the fire perimeter. • Fir and slash create challenging fire intensities, but also many opportunities to hide spot fires which can rapidly develop and build intensity, thus safety and control problems. Remain vigilant to detect spot fires.			
General Situational Awareness: • To avoid congestion, day shift should use the Box Creek Road to travel between ICP and the line. Night shift should use Koosharem Canyon Road to travel between ICP and the line. • If possible, avoid areas with standing dead or fire weakened timber. See Hazard Tree Safety on p.20 of the IRPG for mitigations. • Continually evaluate escape routes and safety zones as fire activity increases. See LCES on p.5 of the IRPG. • Drive defensively. Keep speed low, wear safety belts, and obey traffic regulations. Watch for animals (deer, elk, cattle) on the highway and on incident roads.			
5. Site Safety Plan Required? Yes ☐ No ☒

Fire Weather Forecast

[Link to nearby obs](#)

FORECAST NO: 09
PREDICTION FOR: Thursday's Operational Period
SHIFT DATE: July 24, 2025
TIME AND DATE ISSUED: July 23, 2025 1500

INCIDENT: Monroe Canyon
UNIT: Fishlake NF
SIGNED: **Chris Foltz** Chris Foltz
Incident Meteorologist (IMET)

Discussion:

Temperatures will continue to raise a degree or two both today and Friday. At the same time, poor overnight humidity recoveries will combine with afternoon values in the upper single digits to lower teens resulting in elevated fire weather conditions. Winds today will become westerly by mid-to-late afternoon with gusts around 20 mph. Gusts on Friday will tick up a few notches and could approach 25 mph at times, especially on exposed ridges. Local terrain features will result in variable wind directions and speeds, especially in dense canopies.

TODAY:

	6,800' (ICP)	7,500'	9,500' (Magleby)
Sky/Weather	Mostly clear, then partly cloudy after 1100. Isolated thunderstorm possible.		
Max Temp	83-87°F	76-80°F	66-70°F
Min RH	7-17%	6-16%	12-22%
Wind (20 ft)	Terrain driven 3-6 mph, becoming W 8-12 mph, gusts to 19 mph	Terrain/slope driven until 1000, then W 8-13 mph, gusts to 19 mph	
Chance of Lightning	5%	Chance of Wetting Rain	0%

TONIGHT:

	6,800' (ICP)	7,500'	9,500' (Magleby)
Sky/Weather	Partly cloudy early, becoming mostly clear.		
Min Temp	43-48°F	57-62°F	47-52°F
Max RH	27-37%	14-24%	27-37%
Wind (20 ft)	Terrain driven 2-4 mph	Terrain/slope driven 6-10 mph	Terrain/slope driven 5-9 mph, gusts to 15
Inversion	400' AGL after 2100		

FRIDAY:

	6,800' (ICP)	7,500'	9,500' (Magleby)
Sky/Weather	Mostly clear, then partly cloudy after 1100.		
Max Temp	84-88°F	78-82°F	68-72°F
Min RH	7-17%	5-15%	12-22%
Wind (20 ft)	Terrain driven 3-6 mph, becoming SW 9-13 mph, gusts to 21 mph	Terrain/slope driven until 1000, then SW 10-14 mph, gusts to 23 mph	
Chance of Lightning	0%	Chance of Wetting Rain	0%

OUTLOOK FOR SATURDAY THROUGH MONDAY: Elevated to critical fire weather conditions are expected on Saturday with near-critical to critical conditions Sunday and Monday. Highs will range from the 70s above 9,000' to around 90 at ICP. Overnight recoveries will remain in the upper teens to mid 20s while afternoon values fall into the upper single digits to lower teens. Wind gusts approaching or exceeding 25 mph are expected Friday through Sunday.

Weather observations can be texted to 816-833-6299 or emailed to christopher.foltz@noaa.gov

FIRE BEHAVIOR FORECAST	
FORECAST NUMBER: 8	TYPE OF FIRE: Wildland Fire
FIRE NAME: Monroe Canyon	OPERATIONAL PERIOD: 07/24 day and night
DATE ISSUED: July 23, 2025	TIME ISSUED: 1730
UNIT: UT-FIF	SIGNED: Mike Pagoaga - FBAN
WEATHER	
Max Temp: 80 Min RH: 11% Wind: Terrain driven shifting at 1000 to west 8-13, gusts up to 19 <i>Local Weather Thresholds that shout WATCH OUT Temperatures above 85°, Relative Humidity below 20%, Eye level winds over 10 mph</i>	
FUELS	
Critically dry fuel conditions are present across Central/Southern Utah due to the ongoing drought and continuing hot and dry weather. Resistance to control is being driven by critically dry 1000-hour fuels, and drought-stressed brush and trees. As heat intensifies and fuel moistures decline further, fire potential will remain elevated across the area Fuels Moistures at critical levels with 100-hour and 1000-hour dead fuel moistures below 10%. ERC is above the 95th percentile.	
FIRE BEHAVIOR	
General Fire Behavior: Fire activity will be similar as yesterday. Torching, group-torching, spotting and surface fire spread should be expected as the fire spreads to the north. Past days firing operations will remain active and have the potential to spot outside of containment lines. RH will remain below 25%, with the most active time being from 1600-1800 when RH values are at their lowest. Night conditions will not improve, and the fire will remain active. <i>Fine Dead Fuel Moisture: 3% unshaded, 6% shaded Probability of Ignition 80%, Spotting close to 1/4 mile</i>	
Specific Fire Behavior: BRANCH I: Remaining heat south of Hunts Lakes continues to be a challenge. Timber fuels on north aspects are continuous enough to aid in backing fire. The possibility of flanking fire arises if it burns toward Dry Creek to the south. Sagebrush and grass fuel types will continue to resist fire. BRANCH II: Expect active fire behavior all day with torching, and spotting. Monroe Creek has been holding, in DIV M. The fire has the highest potential to cross near Tenderfoot Ridge and Third Lefthand Creek. If this happens, terrain influenced runs are possible into DIV G. Additionally, mechanical slash units will create containment issues if they are impacted due to an increase in spotting and heat produced by burning piles. BRANCH III: Torching and spotting will remain a concern around the structures within Monroe Meadows and DP30. Heat from yesterday's firing operations will remain, as large heavy fuels consume. The remainder of the branch will remain quiet as mop-up continues. Night: Fire behavior will remain active in many areas of the fire as humidities do not recover well. Torching and short-range spotting should be expected until at least 2200.	
Safety	
As conditions worsen, previous quiet areas may awake and become active again. Spotting from interior fuels is possible.	

Mike Pagoaga – FBAN (413)-800-6517

6. Control Operations/Work Assignments:							
<u>TASK:</u> Patrol & monitor area from Oak Flat to Hunts Lake. Construct indirect dozer line utilizing 088 Trail west to County Road 2302. Prep and brush out dozer line and Monroe Canyon Road to first left-hand fork road. <u>PURPOSE:</u> Protect private property to the west of the fire by limiting growth with containment lines. Provide highest probability of success to protect private property and Monroe City with successful, redundant suppression and mitigation efforts. <u>END STATE:</u> Little to no impact to private property, fire kept to smallest footprint possible with given conditions. Public land damage minimized. Impact to public from fire, smoke, and suppression efforts kept to minimum.							
7. Special Instructions:							
* IA Resource - Use caution when working in WUI areas and around powerlines. See <i>Wildland Urban Interface (WUI) Firefighting</i> on p. 11, and <i>Powerline Safety</i> on p. 22 of the IRPG. - REMS 3 is a resource for all of Branch I.

6. Control Operations/Work Assignments:							
<u>TASK:</u> Complete prepping structures at Magleby and Bagley Ranch. Continue to improve suppression systems around structures using hose, pumps, sprinklers, and engines. Secure yesterday's burnout operations in Monroe Creek connecting with Division W burnout. Begin mixed line construction from Monroe Creek west of Magleby property, north toward Magleby Reservoir. <u>PURPOSE:</u> Protect private property in Magleby and Bagley Ranch areas from fire damage by stopping fire prior to incursion. Provide suppression lines to work from in the event fire threatens to impact the area. Eliminate fuels between control lines and the fire to reduce risk of extreme fire behavior. <u>END STATE:</u> Fire growth into and onto private property is eliminated or minimized. Roadways and infrastructure are left undamaged. Closures lifted and fire impacts to public land and recreational areas minimized.							
7. Special Instructions:							
* IA Resources - UAS module may be operating in Division M. - Ensure positive communication with adjacent resources, especially during burnout operations. - Use caution when working in WUI areas and around powerlines. See <i>Wildland Urban Interface (WUI) Firefighting</i> on p. 11, and <i>Powerline Safety</i> on p. 22 of the IRPG. - REMS 2 is a resource for all of Branch II.

6. Control Operations/Work Assignments:						
<u>TASK:</u> Support and boost resources in all divisions as needed, primarily focusing on structure protection and water handling operations. Continue to improve, construct line, and mop up around structures. Maintain water handling systems. Assist other divisions as needed and be prepared to surge resources as needed. Support Division W and M with crews and engines during burnouts near DP 30 and into Monroe Meadows. <u>PURPOSE:</u> Protect property from further or future damage from fire. Limit fire growth. Provide needed support to other divisions with limited resources to ensure global success. <u>END STATE:</u> Fire impact and damage to private property is slowed considerably or stopped. Area closures can be lifted. End up with minimal negative impact from active fire. Fire kept within identified containment areas.						
7. Special Instructions:						
* IA Resources - Ensure positive communication when moving between divisions. - Use caution when working in WUI areas and around powerlines. See <i>Wildland Urban Interface (WUI) Firefighting</i> on p. 11, and <i>Powerline Safety</i> on p. 22 of the IRPG. - REMS 2 is a resource for all of Branch II.

6. Control Operations/Work Assignments:							
TASK: Continue road prep along Koosharem Pasture Road from DP 30 to W/M break. Work with power company and Safety to assess and mitigate powerline hazards in the area. Continue firing from DP30 to South Forest Road to remove remaining unburned islands around Monroe Meadows. Hold burn to containment lines. PURPOSE: Protect roads, critical infrastructure, and private property from negative impacts of the fire. Minimize fire impacted areas on public lands to reasonable fire footprint based on conditions and available resources. END STATE: End up with minimal impact to private property and land infrastructure that is functional and intact. Area closures lifted and fire impacts to land slowed considerably or stopped.							
7. Special Instructions:							
* IA Resources. REMS 1 is a resource for all of Branch III. - Use caution when working with chippers. Review a Risk Assessment or similar prior to chipping operations. - Ensure positive communication with adjacent resources, especially during burnout operations. - Use caution when working in WUI areas, around powerlines, and when working with heavy equipment.

O-5142 EMPF		08/05	ADAM CASE	1	BOX CREEK SPIKE CAMP/0600	BOX CREEK SPIKE CAMP/2200	
6. Control Operations/Work Assignments:							
TASK: Continue to mop up and secure around structures in Manning Meadows. Increase depth of secure edge. Continue to secure fire edge east of Monroe Meadows, working south. Continue chipping along north end of structures in Monroe Meadows. Update containment lines from DP65 to 121 Road. PURPOSE: Limit any further damage to private property from fire impacts. Prevent any further fire growth where possible and reasonable based on conditions and available resources. Remove receptive fuels from area. END STATE: To have the currently active fire edge area extinguished. Eliminate further fire impact to property. Ensure that area closures are lifted so public can return.							
7. Special Instructions:							
* IA Resources - Use caution when working with chippers. Review the Risk Assessment or similar prior to chipping operations. - Ensure positive communication with adjacent resources, especially during burnout operations. - Use caution when working in WUI areas and around powerlines. - REMS 1 is a resource for all of Branch III.

6. Control Operations/Work Assignments:						
TASK: Patrol and monitor fire area throughout night. Patrol for flare-ups and spot fires, extinguishing where applicable. Continue day operations efforts to ensure continuity including line construction, maintaining water delivery systems, firing, holding, and structure protection. Maintain suppression presence in evacuated areas. PURPOSE: Provide continuity of operations and 24/7 coverage plus maintain situational awareness of fire area 24/7 to ensure established suppression lines hold and further fire damage to private property is minimized or eliminated. END STATE: Fire growth and risk has been minimized such that night time operations are no longer needed. No further impact to private property from fire. Fire kept to containment lines.

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name: Monroe Canyon	2. Operational Period: Date From: 7/24 Time From: 0600	Date To: 7/25 Time To: 0600
3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan: Weather is expected to continue hot and dry with increasing temperatures and decreasing relative humidity. Spike camps allow for work in remote locations and decrease the risks associated with driving long distances over unimproved roads. However, there are several risks associated with spike camps which may include: - A lack of support or access to additional resources to complete operational objectives - Limited or poor communications - Limited access to emergency services - Logistical delays Some ways to mitigate some of these risks may include: - Anticipate the long-term need for additional resources or logistical support - Confirm communications with ICP and adjacent resources when moving into a new area - Review the Incident Action Plan and identify the medical resources assigned to the area and request more if needed - Carry additional food, gear, and appropriate clothing in case logistical support is delayed The fastest medical response will be through incident assigned medical resources. There is a Medical Unit in camp and a REMS unit and ambulance stationed in each branch. There are also medical resources assigned to most divisions. Remember to start the medical incident response process as quickly as possible and err on the side of caution. “The days are long, but the years are short” ~Gretchen Rubin

DEMOBILIZATION CHECK-OUT PROCESS and TENTATIVE RELEASE

Please do not leave the incident until the following steps have been completed!

1. **48 hours prior** to demobilization date, please ensure that:
 - Your incident supervisor has submitted a Demob Request Form. (QR on front of IAP)
 - If you need a flight arranged for you, please submit a Flight Request Form. (QR on front of IAP)
2. **On your demob date**, please check out with the following units.
 - Demob – pick up Form 221 to have units sign off.
 - Supply Unit – Return gear and supplies.
 - Ground Support– Return pool NERV rentals, receive inspections, etc.
 - Weed Wash – Mandatory Weed Wash for all vehicles.
 - Decon – Mandatory Decon for all internal tanks.
 - Communications Unit – Return Radios and other communications equipment.
 - Time/Finance – Ensure that all CTRs and/or shift tickets have been submitted and **you have received your final, signed OF-288 Time Report or OF-286 invoice.**
3. **Once you have completed the above steps**, return 221 to Demob.
4. Any questions? Contact Demob Unit Leader
 - Demob Unit Leader: (775) 720-6547, 2025.monroe.demob@firenet.gov

GPS Datum: NAD 83

GPS Format Example: 115° 17.489"

Team Ordering / Timeline Process:

0600 – Morning Briefing, start of crew time.

1500 – DIVS to have next days resource order ready for OPS.

1600 – Last call to change spike camp resource (food, fuel, etc.) location.

- All crew level orders will be placed through DIVS
- DIVS will place all orders through Communications Unit
- All orders will be traced using the process found on the front of form

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. (WGS84)		
Incident Name			Geographic Name + "Medical" (Ex: Trout Meadow Medical)		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)		
Patient Care			Name of Care Provider (Ex: EMT Smith)		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG page 106					
Treatment:					
4. TRANSPORT PLAN: Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: <i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
