****CONTINUED CHANCES FOR SHOWERS AND STORMS****

Discussion:

Another disturbance is expected to traverse the area on Friday and combine with a rather moist airmass and daytime heating to result in scattered showers and storms this afternoon and evening. Temperatures should be similar to yesterday with moderated humidity. Some storms this afternoon and evening could produce heavy downpours and result in isolated instances of high water and debris flows as well as erratic outflow wind gusts.

****SHOWER AND STORM CHANCES INTO THE WEEKEND****

Extended Outlook:

After a couple of additional disturbances pass this weekend, an upper level ridge will begin to reassert control over the weather across the Monroe Canyon fire area. This will lead to a warmer and drier trend to begin the new week.

TRAINING MESSAGE

Training programs, while providing avenues for knowledge, are not magical potions guaranteeing instant expertise. Rather, it's the individual's zeal and perseverance that propel their learning journey forward – driving them to explore further and push beyond their boundaries.

“Learning is not attained by chance; it must be sought for with ardor and attended to with diligence.”

-Abigail Adams

All Trainees must sign-out with TNSP by noon 9/5/25

Human Resource Message

Transition -- or -- Re-entry into the Real World

You have been on assignment for a while. While you were on the fire things happen at home. Little Allison hit a home run in T-ball, Julian got a lead role in the community play, your dog had to go to the vet to have a cheatgrass taken out of his ear (he got car sick all over the back seat of the car), the garden died, and your spouse's birthday was last Wednesday (you did send a card, right?).

A lot has happened at home while you've been away. Before you share all the things you have done and seen, listen to what they have experienced in your absence. Remember to ask about the baseball games, summer camps, and the like. If you spend the time to listen to them first it will make the transition easier and encourage support for future assignments.

Take advantage of the trip home to think about the things that might have happened at home that the folks there would like to tell you about.

Here are some ideas to get you started:

- ☐ Sporting events
- ☐ Birthdays
- ☐ Anniversaries
- ☐ Hamster died
- ☐ Cat had kittens
- ☐ Summer camp

- ☐ Skinned knees
- ☐ Car needs service
- ☐ _____
- ☐ _____
- ☐ _____
- ☐ _____

HAVE A SAFE TRIP HOME! Sherry Neal HRSP

Resource Advisor Message

Please find the full Suppression Repair Plan Summary in the Linktree. Coordinate with the REAFs/ARCHs assigned to your division.

Remove all dead, burned, & fire-weakened trees one tree length from the road edge emphasizing the uphill side. Avoid trees on the downhill side of road that don't have the potential to fall on the roadway. Cut trees with equipment to the extent possible. Where equipment is not practicable, utilize falling modules to cut the remaining trees. Unless prohibited by slope or space, de-limb/process and deck the cut trees/stack the trees in small bunches. Don't deck/stack trees more than 5ft high. Cut trees as close to the ground as possible.
