GRAND CANYON-PARASHANT NATIONAL MONUMENT

Grand Canyon-Parashant National Monument, located on the northern edge of the Grand Canyon, was established by Presidential proclamation on January 11, 2000. The 1,050,963-acre monument encompasses lands managed by the Bureau of Land Management and the National Park Service, two agencies sharing staff and resources for a common purpose.

The story of this land is rich and long, shaped by natural forces and human history. Remote, open, and undeveloped, the monument displays vast landscapes, from the Mohave Desert to ponderosa pine forests. The diverse resources of this land have attracted many. John Wesley Powell and Clarence Dutton provided stirring written descriptions of the geology, flora, and fauna during their exploration of the area in the 1870s.

Cultural sites provide valuable clues that indicate humans have inhabited this area for 11,000 years. Each group left evidence of their time here, such as pecked and painted rock images, habitation sites, tools, and quarries, which helps us recognize them as distinct units and gives us insight into their lives. One such group, the Southern Paiute Tribe, continues to maintain their ties to the area.

Corrals, fences, water tanks, sawmills, and other remnants of early homesteads are still scattered across the monument. The story of the settlers, their largely secluded lifestyles, and their determination to ranch, farm, and raise a family is told through these cultural landscapes. Ranching continues to be a way of life for many of those same families' descendants.

The monument contains only unpaved roads and visitor services are not available. Though the remoteness and sense of freedom the monument provides is the draw for many, this amazing experience must be tempered with caution, preparedness, and complete self-reliance.

NOTE TO MAP USERS

The surface management status, access, and roads on this map are intended to be general in nature because of map-scale limitations. For detailed information, check the official land records of the responsible Federal agencies. When traveling on private or tribal lands, permission is required; unless legal access is provided by a Federal, State, or County roads.

Arizona State Trust land is NOT public land. The Arizona State Land Department manages Arizona State Trust lands and resources to generate revenues for the State's public schools (K-12) and 13 other public institutions in accordance with the State Constitution and State Legislation. Travel routes depicted across Arizona State Trust lands do not imply legal public access to use or cross State Trust lands. An OHV decal allows crossing Arizona State Trust land when operating an OHV on existing roads and trails and on designated routes (unless otherwise prohibited). An Arizona State Land Recreational Use Permit is required to conduct any recreational activity on State Trust land. To learn how to obtain an Arizona State Land Recreational Permit, go to a State Land Department office, call 602-364-2753, or go online to https://land.az.gov/natural-resources/recreational-permits.
