Check-in Date/Needed Date

On an incident, use the check-in date from the ICS 211 form. If used in dispatch, use the needed date from the resource order form. The current date is the default. The format is mm/dd/yy (leading zeroes are not required). 10 characters.

Example: 8/14/99

Check-in Time/Needed Time

On an incident, use the check-in time from the ICS 211 form using military time format. If used in dispatch, use the needed time from the resource order form. The current time is the default. 4 characters.

Example: 1530

City

Enter the city to which the resource is to be returned during demobilization. 20 characters.

Example: ATLANTA

Configuration

This specifies the way the resource was initially requested and mobilized. 3 characters.

S	=	Single Resource
S/T	=	Strike Team
T/F	=	Task Force

Home Unit

This is the ICS identifier of the unit where the resource is based. For contractor or emergency firefighters, enter PVT. 3 characters. The code is a combination of state abbreviation and home unit code.

Incident Name

The name assigned to the incident. 15 characters.

Example: ANGEL FIRE

Incident Number

The incident order number assigned to the incident.

2 characters = postal state code
3 characters = ICS unit code
5 characters = number

Example: CA-LPFF-00141

Last R&R Date

Enter the last R&R date (the last full day off) for the resource. the format is mm/dd/yyyy (leading zeroes are not required). 10 characters.

Example: 7/20/2002

Leader Name

For resources other than overhead, enter the leader, driver, pilot, operator, or person responsible for the resource. The format is last name, first name. 20 characters.

Example: JOPPLIN, JANIS

Name

The name and/or ID of the resource assigned to the request number. For an overhead resource, enter last name, first name. For a crew resource, enter the crew name. For equipment resources that are items, enter the item name (i.e. shower unit) for equipment resources that are assignable. Be consistent. 20 characters.

Example: ENG MHF 6
 WT PVT 3

 DOZ PVT 1
 ENG PVT S/T 1

where S/T stands for strike team.

For an aircraft resource, enter aircraft type, hyphen, tail number (aircraft type - tail number).

Example: AT-61 for airtanker 61
 H-601 for helicopter 601
 LP-67 for lead plane 67
 AA-N36Z for air attack N36Z

Examples:

Aircraft: H-601
Crew: LOLO CREW #1
Equipment: ENG SHF S/T #1
Overhead: SMITH, JANET

No. Personnel

Enter the total number of people assigned to the resource, including the leader. For example: a wildland engine with a driver, plus 2 crew members would be entered as 3. 3 digit number.

Original Order-Request Number

This is the incident/order and request number on which the resource was originally mobilized. It defaults to the current incident/order and request number. If the resource arrives from another incident, change this number to the original number. 20 characters.

Example: CA-BDF-00201 C-001

Other Quals

Enter the individual's additional Red Card qualifications using standard ICS abbreviations. See Resource Requested list Overhead Codes, page 31. 4 characters.

Example: ORDM

Other1

This is an optional field used to add information not collected by IRSS. 16 characters.

Example: WARNER SPIKE CAMP

to code all resources assigned to this Spike Camp.

Other2

16 characters.

Other3

16 characters.

Release Date

Enter either the planned or actual date released from the incident. If status is pending, the release date is the planned release date. If status is demobbed, the release date is the date actually demobbed. The format is mm/dd/yyyy (leading zeroes are not required). 10 characters.

Example: 9/21/2002

Release Time

Enter either the planned or actual time released from the incident using military time format.

Example: 1900

Remarks

Use this field to enter remarks such as radio number, saws, etc.

Request Number

The number assigned to each resource requested (ordered). One request number is required for each resource (for example, a need for 4 division supervisors would require 4 separate request numbers). If the request number is not known, leave this field blank.

Request number is made up of 2 fields:

1 character = request type
4 or 5 characters = request number

Example: C-0004

Request Type

A	=	Aircraft	I	=	Initial Attack
C	=	Crew	O	=	Overhead
E	=	Equipment	S	=	Supplies

Resource Requested Codes

If you add a code to the table, be sure to add the section and unit for the resource.

If you run a section report and a resource (people or equipment) shows up on the wrong list, modify this portion of the table.

Resources which are included in the 209 and cost report are coded in the 209 and cost columns. If an overhead position is added, code the section and unit plus an O in the 209 and cost columns.

For example: CTSP is coded as working for the Logistics Communications unit (L1). Suppose on your incident, the CTSP works for the Plans Resource Unit. Change the section and unit code for CTSP in the resource requested index list to P3 and the resource will show up in the correct unit.

Resource Requested

This table has the values you will need when adding a resource kind code. Use this table to enter which section and unit the new resource works for.

Enter the resource code that describes the kind and type of the resource.

MO	=	Missouri	WY	=	Wyoming

Status

Enter the status of the resource. An ordered resource is coded U; a resource checked in to the incident is coded C; and a demobbed resource is coded D.

C	=	Checked-in
D	=	Demobbed
N	=	Not able to fill
P	=	Pending Demob
R	=	Reassigned
S	=	Staging
F	=	Filled/not checked-in
U	=	Unfilled
X	=	Cancelled

Transport ID

Enter the vehicle license number or other assigned identification. 9 characters.

Example: DWY739

Travel Method

Enter the primary mode of travel used by the resource to get from home base to the incident; 3 characters. Enter POV for rental equipment/contractors. 3 characters.

AIR	=	Aircraft transportation

Instructions for disabling the Infrared Port for the IBM 380

1) Key the Start Button

- Settings
- Control Panel
- System
- Device Manager
- Infrared

Highlite "Built-in Infrared port on laptop or desktop". Click Properties and Check "Disable in this hardware profile".

2) From Control Panel

- System
- Ports [Com & LPT]

Highlite "Built-in Infrared port on laptop or desktop". Click Properties and Check "Disable in this hardware profile".

3) Reboot

After disabling the IR off of Com1 it should find new hardware and install Com1 to IRQ4 after login.

4) Plug in Socket PCMCIA Serial Adapter

Install Wizard should find the Socket Communications Inc.- Serial Port Adapter Revision B.

Insert Mfg. provided Socket I/O Installation Disk.

Click Next

- Under Control Panel
- System
- Device Manager
- Ports (Com & LPT)

Socket PCMCIA Serial Adapter should show up as Com2. If not then under Properties of the Serial Adapter Resources choose Basic Configuration 0001 with I/O range 02F8-02FF and IRQ 03.

- 5) If an additional Communications port is found after reboot

Under Control Panel
System
Device Manager
Ports (Com & LPT)

Disable the addition port by highlighting the port, go to properties, and check "Disable in this hardware Profile".

- 6) If Com1 doesn't respond then remove Com1 and enable the port disabled in Step 5 and check to see that it's reverted to Com1.
