8. MEDICAL EMERGENCY PROCEDURES

Upon occurrence of a "Major Medical" or accident involving significant injury on the fire line, the closest DIVS should respond directly to the scene to take control of the situation and direct necessary actions. If the DIVS is unavailable, the nearest fire line supervisor or leader needs to take charge.

1. Clear all radio traffic on the Incident Command Channel--use to coordinate response with Coeur D' Alene Dispatch Communications via **Little Blacktail Repeater (chnl 8)**. Notify Coeur d' Alene Dispatch at the appropriate time with the information from the 8 line. **DO NOT USE NAMES**. Identify: a) The on-scene Point Of Contact (i.e. DIV, TFLD etc.); b) Describe the nature of the accident.
2. Obtain and facilitate nearest EMT to the scene. Identify to Communications medical personnel on site. Follow the 8 line in the IAP
3. Use Items 1-8 of the Incident Medical Report to communicate Situation to Couer D'alene Dispatch via Command. Report the situation to Operations and Safety.
4. Determine if the person can be transported by vehicle from thier location or if they need to be packaged and carried out. If the patient cannot be moved make contact with Air Operations for a short haul out with Fire Resources. Notify Operations, Safety if this happens. The patient will be transported to an approved heli spot. If the short haul was used on scene resources will be in contact with the short haul ship on Air to ground for that Division. Medical transport will be determined by EMS in the field. The appropriat transport will be requested through CDA Dispatch via command. If used the short haul ship will then then be in contact with medical transport on EMS-2 and the ground contact.
5. Determine if the patients injuries are in need of air transport or ground transport. Ground will be used for transport to approprieat facilaty by protocol. If Air transport is needed for a more significant injury it will be to Kootenai Health or Sacret Heart to be determined by Life Flight.
