DAY: July 25, 2021 0600-2100 NIGHT: Monday, July 25-26, 2021 1800-1000

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Management Objectives

- 1) Protection of human life and safety is the first priority for all actions taken on a wildfire and can overrule all other strategic/management objectives and incident requirements.
- 2) Base management decisions on meeting objectives while also minimizing the risk of COVID-19 exposures to responders and the public. COVID-19 considerations may alter how you meet goals but should not lead to higher risk tactics.
- 3) Maintain and strengthen relationships with the Helena-Lewis and Clark NF, Custer-Gallatin NF, private landowners, the public, cooperators and partners by providing timely and accurate information.
- 4) Use management actions that ensure fire personnel safety from contact with bears through compliance with the Food Storge Special Order.
- 5) Protect the unique attributes of impacted watersheds through actions that minimize sedimentation and invasive species movement.
- 6) Protect impact to cultural resources through consultation with local forest specialists.

Control Objectives

Divide Complex

- 1) Protection of human life and safety is the first priority for all actions taken and shall override all other incident control objectives. Evaluate risk vs. benefit in strategic and tactical planning and only commit operational resources to actions that have the highest probability of success.
- 2) Protect Tenderfoot Experimental Forest infrastructure within the tenderfoot drainage.
- 3) Protect the communities of Belt Park, Deer Creek Estates, Monarch, Neihart and the Hwy 89 corridor to avoid loss or damage to private lands and critical infrastructure.
- 4) Use mechanized equipment to establish and improve control lines where approved to minimize risk and exposure to firefighting resources.
- 5) Provide initial attack resources to respond to any new ignitions within the TFR area to limit potential size and growth.

American Fork Fire

- 1) Protection of human life and safety is the first priority for all actions taken and shall override all other incident control objectives. Evaluate risk vs. benefit in strategic and tactical planning and only commit operational resources to actions that have the highest probability of success.
- 2) Keep fire on Forest Service lands to protect and limit impact to adjacent landowner property and values at risk.
- 3) Provide initial attack resources to respond to any new ignitions within the TFR area to limit potential size and growth.

6. WEATHER FORECAST FOR OPERATIONAL PERIOD

****RED FLAG WARNING in effect this Afternoon and Evening****

WEATHER DISCUSSION: A Red Flag Warning is in effect today for all fires for min RHs near 12 percent and breezy west winds at 15 to 25 mph with gusts to 30. A thermal belt will develop for a period of time tonight, mostly over the Balsinger Fire. Elevated fire weather conditions are expected Monday with more hot and dry conditions. FIRE BEHAVIOR FORECAST

FORECAST NUMBER: # 3	TYPE OF FIRE: Wildland
FIRE NAME: American Fork/ Divide Complex	OPERATIONAL PERIOD: 07/26/2021 Day Shift
DATE ISSUED: 07/24/2021	TIME ISSUED: 2000
UNT: Helena/Lewis and Clark NF and Guster /Gallatin NF	WRITTEN: Kelly Cagle FBAN

FUEL ASSUMPTIONS: The major fuel types found on the American Fork/Divide Complex are Fuel Model 10 (mixed conifer with heavy dead/down) as well as areas of Fuel Model 2 (short grass w/timber) in the lower elevations. Current fuel conditions are favorable for extreme fire behavior within all fuel types, especially 100 hour and 1000 hour fuels. Live fuel moistures are low enough to contribute as well. Heavy dead and down will likely be the most problematic. ERC's are approaching all time high's for today's date.

WEATHER SUMMARY: Reference fire weather forecast for specifics.

A Red Flag Warning is in effect today for min RHs near 12 percent and breezy west winds at 15 to 25 mph with gusts to 30. *A thermal belt will develop for a period of time tonight, mostly over the Balsinger Fire.* Elevated fire weather conditions are expected Monday with more hot and dry conditions. Winds on Monday will be slightly weaker than Sunday.

General Fire Behavior Forecast: Weather today will create conditions for extreme fire behavior. Wind and fuel driven fire with uphill runs and torching or crowning should be expected wherever fuels exist for fire to consume. Long distance spotting is probable anywhere wind and slope align. General movement will be upslope or towards the east. **Expect a high resistance to control.** Expect activity to begin early in the day and persist thru early evening and into the night hours.

Specific:

American Fork Fire – Heavy fuels will continue to smolder. Unburned pocket of fuel east of Lebo Peak may continue to fill in a bit. Any heat near unburned pockets of fuel could produce intense fire behavior. Blacktail fire scar should continue to limit spread to the north.

Balsinger Fire – This fire will likely continue to progress to the north and east until it runs out of fuel. Backing towards the west may also occur. Any fire in timber will be intense, with group torching, crown runs, and long range spotting likely. It will be difficult to suppress fire in conifer fuel under the extremely dry conditions. Grass fuels to the east will substantially reduce fire spread and represent the probable best chance for success.

Ellis Fire – Isolated single tree torching was observed on Thursday. Expect smoldering to continue and torching is possible wherever unburned fuels remain. Any heat source in direct contact with unburned fuel could produce intense fire behavior today.

Initial Attack –Expect any new starts to organize and quickly begin to move, especially in lower elevations with **cured** grass fuels. Rates of spread will likely be high in these fuels. Expect high resistance to control in conifer fuel today as well.

Fine fuel moisture today is -	2 to 3%	3 Critical Thresholds are being exceeded today!
Probability of Ignition today -	90% +	(Rh, wind and 1000 hr fuel moisture)
Max Spotting Distance Today-	½ mile or greater	Haines is at 5 for today

AIR OPERATIONS : Weak inversion should break by 0900. Expected wind gusts may impact aviation availability.

FIRE BEHAVIOR SAFETY: Are you informed on current and expected fire behavior? Fire weather? Do you have solid LCES in place? Make sure you can answer "yes" if you expect to engage fire today.

Hygiene: *What diseases are caused by poor personal hygiene?*

Gastroenteritis, diarrhea, pneumonia, trachoma, skin infections, Covid-19.

And Did You Know?

Phones can carry: E. coli, as well as influenza and MRSA.

Bacteria count per sq. inch on common items.

Key boards and mouse- 79,000

If you spend time working on a fire other than the fire you were resource ordered for, please document that time on the CTR.

Example 1: If your resource order says the Divide fire and you work all day on the American Fork fire, write in the comments that you worked that shift on the American Fork fire.

Finance Remote Processing Procedures

To the right is access to electronic Finance forms. You can access them via the QR code or the URL. On each form are four buttons PRINT, RESET, SAVE and EMAIL. You can complete these forms on your cell phone, tablet or laptop. They are Adobe PDF forms so you will need a PDF reader app on your device. The forms were created on a laptop so the commands in your cell phone and tablet do not allow for the Save and Print functions to work. You will need to use your app's functionality to Save or Print.

Once you have completed the appropriate form for your resource please email to your supervisor for approval.

Supervisors can use their app to apply a signature or just type /s/ your name on the approval line. After approving please email the approved form back to the resource for their record and to the correct finance email:
