Fire information 2021.cougarrock@firenet.gov or 208-494-1943

INCIDENT OBJECTIVES1. Incident Name
Cougar Rock Complex2. Date Prepared
07/17/20213. Time Prepared
1900

4. Objectives

High Value Assets and Resources to be Protected:

- Private properties, infrastructure and timber resources.
- Habitat reparation and watershed, cultural, historic, and heritage sites.
- Waterways and riparian areas.

Leader's Intent:

- Protect human life. Firefighter and public safety will be given the highest priority at all times. Risks to firefighters and the public will be managed by utilizing a risk-based approach to decision making. An emphasis will be placed on exposure to accidents and heat related illness.
- Minimize the exposure of the public and responders to transmission or infection from COVID-19 by following agency guidance and established CDC, local, state and national guidance to ensure a healthy work environment.
- Communicate proactively with agency staffs, cooperators, permittees and stakeholders, including PotlatchDeltic, Idaho Department of Lands, United States Army Corps of Engineers, United States Forest Service, the Nez Perce Tribe, and the Clearwater County Sheriff, Emergency Management Coordinator and County Commissioners, through effective and timely dialogues, meetings and comprehensive information sharing for purposes to include public safety, evacuations, traffic control, road closures, structure protection and any other safety risk to public and industrial operators.
- Inform the Agency Administrator and Association Line Officer of any public meetings and media contacts and coordinate with the Clearwater IDL and CPTPA to ensure that we build on existing relationships, contacts and key messages.
- Utilize appropriate fire strategies to minimize fire impacts to residences, commercial properties, critical community infrastructure and natural resources, and critical watersheds.
- Implement appropriate measures to limit the spread of noxious weeds, including washing all vehicles and equipment upon arrival at the incident and departure from the incident.
- Work with agency staff and cooperators to assess wildfire effects to infrastructure and watersheds and develop and implement short-term actions to address high-risk watershed impacts.
- Commit incident resources only where there is a high probability of meeting reasonable objectives or when the risk of injury or death can be mitigated.
- Follow and adhere to the 10 standard orders. Continually evaluate the 18 watch out situations through clear concise direction and understanding of assignments and necessary mitigations.
- Maintain and foster relationships with users of public lands, landowners, agencies and local communities.
- Maintain the highest degree of professionalism on the incident and within local communities.
- Adhere to applicable work-rest guidelines to reduce fatigue and ensure that assigned fire-fighting personnel receive adequate rest.
- Maintain a workplace and atmosphere of mutual respect and free of any harassment. There will be no tolerance for any unethical, illegal drug or alcohol related incidents.
- Effectively manage costs commensurate with the high value assets and resources to be protected and risks.
- Efficiently demobilize resources in a manner that will ensure safe travel and "right-sizing" consistent with demobilization glidepath direction.

Operational Objectives:

- Scout for and prioritize potential fire suppression and values at risk protection opportunities.
- Gather intelligence on personnel and equipment on the incident.
- Engage in fire suppression and/or values at risk protection actions and/or point protection when safe to do so with available resources.
- Respond as appropriate to, and commensurate with the prioritization of, new/emerging incidents.
- Act with appropriate prioritization if presented with the opportunity to rehabilitate resource damage caused by suppression actions.

Fire Weather Forecast

FORECAST NO: 8
PREDICTION FOR: Day SHIFT
SHIFT DATE: Thursday, 07-17-2021

NAME OF FIRE: Cougar Rock Complex
UNIT: CPTPA
SIGNED: Eric Trimble/Nathan Lancaster, FBAN

TIME AND DATE
FORECAST ISSUED: 1900 7/16/2021

WEATHER DISCUSSION: For Cougar Rock Complex (Hobbit 1, Scott, Trapper Saddle, Goat Creek)

A dry weather pattern will continue through the weekend. After seasonable temperatures Saturday, conditions warm up again Sunday and Monday. The atmosphere may also become unstable on Sunday with a Haines of 6 possible. Starting Monday night through Wednesday morning there is a chance of thunderstorms over the fire.

Today Saturday, July 17:

WEATHER: Mostly Sunny. Hazy.

TEMPERATURES: Fire: 80-82°F

HUMIDITY: Fire: 29-33%

WINDS (20ft): Variable 1 to 3 in the morning becoming southwest winds 3 to 6 mph by 1000 PDT with gusts up to 10 mph along the ridgeline in the afternoon.

HAINES INDEX: 3 Very Low **LAL:** 1 **CWR:** 0%

WEATHER DISCUSSION: For Cougar Rock Complex (Butte Creek, Benton Ridge Fires, Lovell Knob, Sheep, Owl)

Warm and dry conditions will continue over the fire on Saturday, with similar RHs and temperatures as were seen on Friday. Winds will be light and terrain driven, becoming more westerly in the afternoon. High pressure strengthens over the region on Sunday, resulting in strong thermal belts with relatively poor RH recoveries Saturday night. This will be followed by much hotter and drier temperatures for Sunday afternoon. Very unstable conditions are expected for Sunday afternoon as well, resulting in a Haines of 6. Wildfire smoke will continue to stream into the region, which could help limit some of the instability on Sunday, depending on how thick it is.

Today Saturday, July 17:

WEATHER: Sunny, Smoke

TEMPERATURES: Fire: 83-88 °F

HUMIDITY: Fire: 23-28%

WINDS (20ft): Upslope/upvalley 1-3 mph becoming west around 5 mph in the afternoon.

HAINES INDEX: 4 Low **LAL:** 1 **CWR:** 0%

EXTENDED FORECAST: Sunday – Thursday

Sunday.... Widespread haze. Areas of smoke. Sunny, with a high near 86. Calm wind becoming southwest around 6 mph in the afternoon.
Monday..... Widespread haze. Partly sunny, with a high near 83.
Tuesday..... A 20 percent chance of showers and thunderstorms. Widespread haze. Mostly sunny, with a high near 81.
Wednesday.. Widespread haze. Sunny, with a high near 79.
Thursday.... Widespread haze. Sunny, with a high near 79.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 8	INCIDENT TYPE: Wildfire
FIRE NAME: Cougar Rock Complex	OPERATIONAL PERIOD: July 17, 2021 Friday
DATE ISSUED: July 16, 2021	TIME ISSUED: 1800
UNIT: ID-CPTA	PREPARED BY: Eric Trimble/Nate Lancaster – FBAN

INPUTS

WEATHER SUMMARY:

Sky Weather: Smoky/hazy skies. CWR (>0.10"): 0%, Temps: 80-88°, RH: 23-33%, Haines: 4-5 Low to Moderate, LAL: 1
Winds (20 ft): West 3 to 6 mph with gusts to 15 mph on the higher ridgetops after 1300.

FUELS: Cougar Rock Complex- 14 fires

Mixed conifer forest dominated by Western Red Cedar, Douglas Fir, Western Larch, and Grand Fir. Subalpine Alpine Fir, Engelman Spruce and Lodge Pole Pine at the higher elevations (>4,800'). All age and size classes of conifer fuels with relatively high crown bulk density and low crown base heights. Light to moderate amounts of dead fine fuels and logging/thinning slash will contribute to surface fire spread. Herbaceous and live woody fuels are green and will generally not contribute to fire spread.

Fine Fuels: 5-7%; 10-hr: 8%; 100hr: 9%; 1000hr: 12%

ERC: 95th to 98th percentile. **Max spotting distance:** 0.2 Mile

OUTPUTS - FIRE BEHAVIOR

General:

Terrain and fuel-driven fire. Expect active surface fire activity within surface and ground fuels with single to group-tree torching and short-range spotting. Highest activity to occur within Subalpine Fir/Engelman Spruce stands at the higher peaks and on the steeper sites (>60% slope) with 70-80% consumption of the 1-hr, 10-hr and 100-hr fuels. Smoke from other fires and under inversion may temper fire activity. Live fuels and young conifer plantations should discourage crown fire activity, until fuels dry in the upcoming weeks.

Backing/flanking spread 1-2 ft/min with flames 2-4 ft. Head fire with possible 5-8 ft. flame lengths and 9-12 ft/min rates of spread on the steeper sites, higher with torching and when slope and wind align. Spotting will increase as the inversion breaks and as receptive fuels continue to warm and dry.

Specific:

Benton Fires: Continued movement to the NW toward the Reservoir.

Butte Creek: Continued fire growth towards the SE as up valley, up canyon winds push the fire to the east.

Goat Creek: Sub-alpine fir will continue to promote fire spread thru multiple tree and group torching in most directions.

Scott Road: Continued Fire spread in the Floodwood drainage, N on FS ground towards Hemlock Creek Rd.

Probability of Ignition (PIG): 70-80% during the peak of the burning period.

AIR OPERATIONS: Marginal VFR due to widespread smoke. Inversion may lift in the higher elevations late in the afternoon.

SAFETY: Don't stand too close to people that are always bandaged up

"He was who Babe Ruth was pointing at."

7. Control Operations						
Group includes Hobbit, Goat Creek, Trapper Saddle and West Cedar fires.						
Task: Mop up fires two chains in from fire perimeters.						
Purpose: Secure fires so additional resources can be assigned suppression responsibilities on the Goat Fire.						
End State: Progression of fires has been halted.						
8. Special Instructions						
Utilize LCES.						
Logistic orders to Group Supervisor by 1000 for next shift.						
Consolidate trash for back haul.						
Disengage from cedar snag areas when winds are 5 mph or greater.						
Grandad Bridge and Captains Cabin road closures will be staffed by Clearwater Co. S.O. Deputies from 0600-1800 and 1800-0600.

7. Control Operations						
Task: Build machine line from Kaufman Saddle to Thompson Creek. Build machine line from Kaufman Saddle to Thompson Point. Scout line from Bottle Creek to Kaufman Saddle. Open Butte Creek Road from Hansen Saddle to reservoir. Scout direct line around Thompson Point.						
Purpose: Keep fire between Butte and Thompson Creeks and North of Kaufman Saddle.						
End State: Limit fire growth and protect timber value.						
8. Special Instructions						
Utilize LCES.						
Watch out for logging traffic from Kaufman Saddle to Highway11.						
Grandad Bridge and Captains Cabin road closures will be staffed by Clearwater Co. S.O. Deputies from 0600-1800 and 1800-0600.

7. Control Operations						
Group includes the Owl and Washington Creek fires.						
Task: Secure fire edge along FS Scofield Sourdough road working to the east and west of main fire. Continue to open roads T6050 and T6050A. Look for direct line opportunities from Sneak Creek to Sourdough road.						
Purpose: Keep fire south of FS Scofield Sourdough road and north of Sneak Creek.						
End State: The Owl fire has a viable fire suppression/values at risk protection plan.						
8. Special Instructions						
Owl fire has priority. Utilize LCES. Grandad Bridge and Captains Cabin road closures will be staffed by Clearwater Co. S.O. Deputies from 0600-1800 and 1800-0600.

Prepared By (Communications Unit) Thomas Robbins COM1 				Incident Location		Orofino ID			

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Cougar Rock Complex

DATE: 07-17-21 TIME: 0600-2200

Major Hazards and Risks:

Snags: Dead and fire weakened green trees.

Driving: Today may be the first day you drive on local roads or the hundredth time. Driving these roads could be the greatest hazard of your day.

Complacency: Can sneak up on you and in a second ruin everything you have accomplished the last week.

COVID 19: Continue to be vigilant on its spread and social distance, wear masks if not vaccinated indoors and wash hands.

Will Robinson always had a robot looking out for him.

We do not have that luxury. We must watch out for ourselves and each other.

EQUIPMENT on Cougar Rock

- 14 Dozers
- 6 excavators
- 8 feller bunchers
- 21 other misc heavy equipment pieces

**TOTAL
49**

There are also log trucks and skidders working in the fire area getting logs off the hill.

This equates to a lot of iron on and around our fires.

This is a great time to be driving slowly, having your head on a swivel, and having a heightened sense of Situational Awareness working around all of the equipment. Be alert, inform others of the hazards. Implement mitigations to reduce the hazards.

If we work as a team, we will be successful as a team.

**Your safety team, Marvin Carpenter, Jim Freestone
and Opie Blackwell.**

**And
EACH OF YOU!**

ASSIGNMENT-SPECIFIC MEDICAL EMERGENCY ACTION PLAN

Pre-Planning for today's assignment

What are the likely hazards that could cause injuries? What kind of severe injuries?		
Who is the likely in-charge DIVS or overhead for an emergency in your assigned area today? (i.e. "Division Zulu")		
Who are the Medical personnel assigned to your part of the incident? What are their capabilities?		
Other Emergency Responders: fire dept., crash rescue, ambulance?		
Communications: Command channel, Air to Ground, Medical helicopters, local rescue/medical?		
Transportation methods available	Ground vehicle, drop point, coordinates, travel route?	
	Aircraft I.D, Helispot names, coordinates? Hoist capable, internal transport	
	Other available methods - contingency	
Most likely workforce for evacuation		

Response checklist

Who takes charge?

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Medical personnel and emergency responders manage patients and assist in rescue/extrication.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

Response sequence:

- First, secure the scene and protect responders and patients from further injury. Render first aid.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If not, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.

Information for Communications: Medical Incident Report – See last page of IAP and IRPG pages 118 and 119.

Helicopter Extraction Operations: See IRPG pages 116 and 117.

Severe Weather: In the event of forecasted severe weather, implement Incident Severe Weather Plan.

Incident Within Incident: Upon arriving at the incident, all overhead should obtain and review the team's Incident Within Incident Plan.

Incident within Incident (IWI) Plan

Immediate response:

- Secure the site to prevent further injury to victims and responders.
- Render first aid using crew and line EMT's and nearby forces.
- Designate a Point of Contact at the scene. Notify communications who this is and when it changes.
- Notify Communications and Medical Unit. Identify whether this is a life threatening emergency or less serious injury.
- Communications requests "Emergency Traffic" to clear channel if it is a life threatening emergency.
- Transmit critical information from the scene to Communications: Type and extent of injury; Airway or breathing problems; serious bleeding; EMT present or needed; ALS needed. Give specific location of victim: Lat/Long; ground or air access; DP#; Helispot or helicopter medevac site. Do not use victim or crew names in any communications. **Use the Medical Incident Report, pages 118 and 119 of the Incident Response Pocket Guide (IRPG) as a checklist.**
- Request appropriate Medical Unit, incident resource and local 9-1-1 EMS response.
- Designate an Incident Within Incident Commander (IWIC). DIVS is normally in charge. Other Operations persons may be in charge until relieved. Notify communications who this is and when it changes.
- Communications: If requested, notify Local 9-1-1 EMS and other responders right away. Provide staging information, medical evacuation location(s), IWIC, medical contact information and communication protocol. Post Medical Incident Report at Communications desk to facilitate sharing critical information.
- Medical Unit Leader should assist the IWIC in coordinating any Local EMS, incident medical, and transportation response.
- Communications notifies DIVS, Line OPS and SOF2 to respond to the scene.
- In the event we are shadowing another team, provide whatever assistance we can to help them with the situation.

Aviation Mishap:

For an aviation accident within the fire area, the standard Incident within Incident protocols will be followed.

For an aviation accident outside of the fire area, the following procedure will be followed in addition to the Incident within an Incident Protocols.:

If an aviation accident is suspected or reported, Helibase will dispatch Air Attack to the location to assess the scene. If no Air Attack is available than the closest aviation resource will be dispatched. Helibase will then make a determination on the most appropriate helicopter available to respond for rescue considering time, capabilities, access, etc. Once on scene the helitack on site will designate a POC to be in charge of the situation until relieved. Once these resources are on scene and communication is established the Incident within an Incident protocols remain the same.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
