Fire information 2021.cougarrock@firenet.gov or 208-494-1943

INCIDENT OBJECTIVES

. Incident Name Cougar Rock Complex 2. Date Prepared 07/19/2021 3. Time Prepared 1900

4. Objectives

High Value Assets and Resources to be Protected:

- Private properties, infrastructure and timber resources.
- Habitat reparation and watershed, cultural, historic, and heritage sites.
- Waterways and riparian areas.

Leader's Intent:

- Protect human life. Firefighter and public safety will be given the highest priority at all times. Risks to firefighters and the public will be managed by utilizing a risked-based approach to decision making. An emphasis will be placed on exposure to accidents and heat related illness.
- Minimize the exposure of the public and responders to transmission or infection from COVID-19 by following agency quidance and established CDC, local, state and national guidance to ensure a healthy work environment.
- Communicate proactively with agency staffs, cooperators, permittees and stakeholders, including PotlachDeltic, Idaho Department of Lands, United States Army Corps of Engineers, United States Forest Service, the Nez Perce Tribe, and the Clearwater County Sheriff, Emergency Management Coordinator and County Commisioners, through effective and timely dialogues, meetings and comprehensive information sharing for purposes to include public safety, evacuations, traffic control, road closures, structure protection and any other safety risk to public and industrial operators.
- Inform the Agency Administrator and Association Line Officer of any public meetings and media contacts and coordinate with the Clearwater IDL and CPTPA to ensure that we build on existing relationships, contacts and key messages.
- Utilize appropriate fire strategies to minimize fire impacts to residences, commercial properties, critical community infrastructure and natural resources, and critical watersheds.
- Implement appropriate measures to limit the spread of noxious weeds, including washing all vehicles and equipment upon arrival at the incident and departure from the incident.
- Work with agency staff and cooperators to assess wildfire effects to infrastructure and watersheds and develop and implement short-term actions to address high-risk watershed impacts.
- Commit incident resources only where there is a high probability of meeting reasonable objectives or when the risk of injury or death can be mitigated.
- Follow and adhere to the 10 standard orders. Continually evaluate the 18 watch out situations through clear concise direction and understanding of assignments and necessary mitigations.
- Maintain and foster relationships with users of public lands, landowners, agencies and local communities.
- Maintain the highest degree of professionalism on the incident and within local communities.
- Adhere to applicable work-rest guidelines to reduce fatigue and ensure that assigned fire-fighting personnel receive adequate rest.
- Maintain a workplace and atmosphere of mutual respect and free of any harassment. There will be no tolerance for any unethical, illegal drug or alcohol related incidents.
- Effectively manage costs commensurate with the high value assets and resources to be protected and risks.
- Efficiently demobilize resources in a manner that will ensure safe travel and "right-sizing" consistent with demobilization glidepath direction.

Operational Objectives:

- Scout for and prioritize potential fire suppression and values at risk protection opportunities.
- Gather intelligence on personnel and equipment on the incident.
- Engage in fire suppression and/or values at risk protection actions and/or point protection when safe to do so with available resources.
- Respond as appropriate to, and commensurate with the prioritization of, new/emerging incidents.
- Act with appropriate prioritization if presented with the opportunity to rehabilitate resource damage caused by suppression actions.

Fire Weather Forecast

FORECAST NO: 11

PREDICTION FOR: Day SHIFT

SHIFT DATE: Tuesday, 07-20-2021

NAME OF FIRE: Cougar Rock Complex

UNIT: CPTPA

SIGNED: Eric Trimble/Nathan Lancaster, FBAN

TIME AND DATE

FORECAST ISSUED: 1900 7/19/2021

WEATHER DISCUSSION: For Cougar Rock Complex (Hobbit 1, Scott, Trapper Saddle, Goat Creek)

RED FLAG WARNING IN EFFECT FROM 1 AM TUESDAY TO NOON WEDNESDAY for T-STORMS/ERRATIC WINDS.

Widely Scattered thunderstorms possible into Tuesday morning, with a second round of T-storms late Tuesday night and into Wednesday morning. The second round of storms could be more scattered in coverage and yet produce more lightning and moisture. Gusty, erratic outflow winds up to 25 mph in the vicinity of thunderstorms.

Today Tuesday, July 20:

WEATHER: Partly cloudy. Chance of showers and thunderstorms.

TEMPERATURES:

Fire: 80-85°F

HUMIDITY:

Fire: 30-35%

WINDS (20ft): South to SW winds 3 to 7 mph. Gusty and erratic winds expected near thunderstorms.

HAINES INDEX: 4 Low

LAL: 3 CWR: 10%

WEATHER DISCUSSION: For Cougar Rock Complex (Butte Creek, Benton Ridge Fires, Lovell Knob, Sheep, Owl)

RED FLAG WARNING IN EFFECT FROM 1 AM TUESDAY TO NOON WEDNESDAY for T-STORMS/ERRATIC WINDS.

Monsoonal moisture will move through the region Tuesday and bring a better chance for a thunderstorm or two in the vicinity of the Cougar Complex today and into Wednesday. Thunderstorms that do occur will probably bring heavy rain under the core of the storm. Expect higher RHs and a general southwest wind. Gusty outflow winds 15-25 mph possible in the vicinity of thunderstorms...

Today Tuesday, July 20:

WEATHER: Partly cloudy. Chance of showers and thunderstorms.

TEMPERATURES:

Fire: 83-88°F

HUMIDITY:

Fire: 30-35%

WINDS (20ft): Terrain Driven 1-3 mph, becoming southwest 4-8 mph in the afternoon. Occasional gusts over 20 mph in the afternoon. Gusty and erratic winds are possible in the afternoon near any showers and thunderstorms.

HAINES INDEX: 3 Very Low

LAL: 3 CWR: 10%

EXTENDED FORECAST: Wednesday - Sunday

Wednesday.... Partly Cloudy. Chance of showers and T-storms. LAL 2; CWR 10%; Highs 80's; Min Rh: 30%; W winds 5-15 mph

Thursday......Mostly Clear. Lows 60's; Highs: 80's; NW winds 10-15 mph.

Friday..... Mostly Clear. Lows 60's; Highs 80's. West winds 5-10 mph.

Saturday.... Mostly Clear. Lows 60's; Highs 80's.

Sunday.... Mostly Clear. Lows 60's; Highs 80's.

	FIRE BEHAVIOR FORECAST
FORECAST NUMBER: 11	INCIDENT TYPE: Wildfire
FIRE NAME: Cougar Rock Complex	OPERATIONAL PERIOD: July 20, 2021 Tuesday
DATE ISSUED: July 19, 2021	TIME ISSUED: 1800
UNIT: ID-CPTPA	PREPARED BY: Eric Trimble/Nate Lancaster – FBAN
	INPUTS

WEATHER SUMMARY:

Sky Weather: Partly cloudy, chance of T-Storms CWR (>0.10"): 10%, Temps: 80-85°, RH: 30-35%, Haines: 4 Low; LAL: 3 Winds (20 ft): South to SW 3 to 7 mph. Gusty, erratic winds near thunderstorms.

FUELS: Cougar Rock Complex- 14 fires

Mixed conifer forest dominated by Western Red Cedar, Douglas Fir, Western Larch, and Grand Fir. Subalpine Alpine Fir, Engelman Spruce and Lodge Pole Pine at the higher elevations (>4,800'). All age and size classes of conifer fuels with relatively high crown bulk density and low crown base heights. Light to moderate amounts of dead fine fuels and logging/thinning slash will contribute to surface fire spread. Herbaceous and live woody fuels are green and will generally not contribute to fire spread.

Fine Fuels: 6-8%; 10-hr: 9%; 100hr: 9%; 1000hr: 12%

ERC: 95th to 98th percentile. Max spotting distance: 0.2 Mile

OUTPUTS - FIRE BEHAVIOR

General:

Expect low to moderate ground fire activity except near the vicinity of T-storms due to strong, erratic winds. Potential for single and small group tree torching in areas of unsecured line. For the most part, shading due to smoke and clouds will continue to limit fire activity. Live fuels and young conifer plantations should discourage crown fire activity. Heads up for down draft winds from any developing thunderstorms.

Backing/flanking spread 2-3 ft/min with flames 2-3 ft. Head fire with possible 4-6 ft. flame lengths and 4-7 ft/min rates of spread on the steeper sites, higher with torching and when slope and wind align.

Specific:

Benton Fires: Continued movement to the N/NW toward the Reservoir.

Butte Creek: Continued fire growth to the E/NE of Thompson Point.

Goat Creek: Sub-alpine fir will continue to promote fire spread thru single tree and group tree torching in most directions.

Predominant spread direction S/SE.

Scott Road: Continued Fire spread to the SE in the Floodwood drainage.

Probability of Ignition (PIG): 40-50% during the peak of the burning period.

AIR OPERATIONS: Marginal VFR with moderate turbulence.

SAFETY: Heads up for snags and weakened green trees particularly during the development of T-Storms.

7. Control Operation	ns		71. 10. 117						

Group includes the Owl and Washington Creek fires.

Task: Secure fire edge along FS Scofield Sourdough road working to the east and west of main fire. Continue to open roads T6050 and T6050A. Look for direct line opportunities from Sneak Creek to Sourdough road.

Purpose: Keep fire south of FS Scofield Sourdough road and north of Sneak Creek.

End State: The Owl fire has a viable fire suppression/values at risk protection plan.

8. Special Instructions

Owl fire has priority.

Utilize LCES.

Grandad Bridge and Captains Cabin road closures will be staffed by Clearwater Co. S.O. Deputies as anticipated traffic flow requires.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Safety i

SAFETY MESSAGE SAFETY IS OUR FIRST PRIORITY

Fire fighter safety comes first on every fire, every time

SAFETY QUOTE;

"Martin Luther King had a dream, as do I. That at the end of fire season all firefighters will go home safely." Marvin Carpenter, Northern Rockies team 6, team safety

HAZARDS and RISKS:

- Traffic in and around the fire
- Long travel routes/times
- Communications
- Hazard green trees and snags
- Working around heavy equipment
- Hot and dry

Before engaging in suppression analyze all risks and mitigate them.

TRUST

SAFETY

There is no U in Safety. U must insert U into safety. It does not just happen by accident. (pun intended) U must believe in safety, U must live it, U must practice it, Otherwise it is just a word without U in it.

Your Safety Team....

Marven Carpenter, Jim Freestone, Opie Blackwell and Steve Wyatt

ASSIGNMENT-SPECIFIC MEDICAL EMERGENCY ACTION PLAN

Pre-Planning for today's assignment

Pre-Planning for	r today's assignment	
What are the likel What kind of seve	y hazards that could cause injuries? ere injuries?	
Who is the likely in emergency in you Zulu")	in-charge DIVS or overhead for an ir assigned area today? (i.e. "Division	
Who are the Med the incident? Wh	lical personnel assigned to your part of at are their capabilities?	
Other Emergency Responders: fire dept., crash rescue, ambulance?		
	: Command channel, Air to Ground, ers, local rescue/medical?	
	Ground vehicle, drop point, coordinates, travel route?	
Transportation Aircraft I.D, Helispot names, methods coordinates? Hoist capable, internal available transport		
,	Other available methods - contingency	
Most likely work	force for evacuation	

Response checklist

Who takes charge?

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Medical personnel and emergency responders manage patients and assist in rescue/extrication.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

Response sequence:

- First, secure the scene and protect responders and patients from further injury. Render first aid.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If not, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.

Information for Communications: <u>Medical Incident Report – See last page of IAP and IRPG</u>
pages 118 and 119.

Helicopter Extraction Operations: <u>See IRPG pages 116 and 117</u>.

Severe Weather: In the event of forecasted severe weather, <u>implement Incident Severe</u> <u>Weather Plan</u>.

Incident Within Incident: Upon arriving at the incident, all overhead should obtain and review the team's Incident Within Incident Plan.

Incident within Incident (IWI) Plan

Immediate response:

- Secure the site to prevent further injury to victims and responders.
- Render first aid using crew and line EMT's and nearby forces.
- Designate a Point of Contact at the scene. Notify communications who this is and when it changes.
- Notify Communications and Medical Unit. Identify whether this is a life threatening emergency or less serious injury.
- Communications requests "Emergency Traffic" to clear channel if it is a life threatening emergency.
- Transmit critical information from the scene to Communications: Type and extent of injury; Airway or breathing problems; serious bleeding; EMT present or needed; ALS needed. Give specific location of victim: Lat/Long; ground or air access; DP#; Helispot or helicopter medevac site. Do not use victim or crew names in any communications. Use the Medical Incident Report, pages 118 and 119 of the Incident Response Pocket Guide (IRPG) as a checklist.
- Request appropriate Medical Unit, incident resource and local 9-1-1 EMS response.
- Designate an Incident Within Incident Commander (IWIC). DIVS is normally in charge. Other
 Operations persons may be in charge until relieved. Notify communications who this is and when it
 changes.
- Communications: If requested, notify Local 9-1-1 EMS and other responders right away. Provide staging information, medical evacuation location(s), IWIC, medical contact information and communication protocol. Post <u>Medical Incident Report</u> at Communications desk to facilitate sharing critical information.
- Medical Unit Leader should assist the IWIC in coordinating any Local EMS, incident medical, and transportation response.
- Communications notifies DIVS, Line OPS and SOF2 to respond to the scene.
- In the event we are shadowing another team, provide whatever assistance we can to help them with the situation.

Aviation Mishap:

For an aviation accident within the fire area, the standard Incident within Incident protocols will be followed.

For an aviation accident outside of the fire area, the following procedure will be followed in addition to the Incident within an Incident Protocols.:

If an aviation accident is suspected or reported, Helibase will dispatch Air Attack to the location to assess the scene. If no Air Attack is available than the closest aviation resource will be dispatched. Helibase will then make a determination on the most appropriate helicopter available to respond for rescue considering time, capabilities, access, etc. Once on scene the helitack on site will designate a POC to be in charge of the situation until relieved. Once these resources are on scene and communication is established the Incident within an Incident protocols remain the same.

Finance Demob Process

The finance demob process can be done remotely or in person.

Remote Demob for Equipment and / or Personnel / Crews

- Complete your Last Day Shift Ticket and / or CTR (this would include your travel). Forest Service AD's need to project their time for their travel
- Write your email address on the Shift Ticket and / or CTR
- Send your Shift Ticket and / or CTR to:
 2021.cougarrock.finance@firenet.gov
- Finance will complete the posting and send the documents back to you by email for your review and signature
- Please return the Final Signed Documents to the finance email (Contracted Equipment – in lieu of signature approval you may respond to the finance email that "All is Correct")
- Forest Service Casual Hire Employees (AD's) should also submit their travel information which may include per diem, lodging, baggage fees, gas receipts etc.

In Person Demob for Equipment and / or Personnel / Crews

- Complete your Last Day Shift Ticket and / or CTR (this would include your travel.) Forest Service AD's need to project their travel time.
- Turn in to finance the Shift Ticket and / or CTR for input
- A draft will be provided for review
- After review and approval a "Final" will be printed for signatures

If you have any questions call Finance at 208-820-4661

COUGAR ROCK COMPLEX ID-CTS-000623 VIRTUAL DEMOB PROCESS V1.0

The following virtual demobilization process has been established for all resources demobilizing from the Cougar Rock Complex. You will need a cell or internet connection to complete the Check-Out Form.

STEP 1: Return all accountable property (radios, supplies, etc.) to the Communications Unit and/or the Supply Unit. ***ALL NON-LOCAL VEHICLES THAT HAVE BEEN OFF-PAVEMENT MUST GO THROUGH WEED WASH AT THE OROFINO ICP OR OTHER AREA DESIGNATED BY GROUND SUPPORT PRIOR TO DEMOBILIZING**

<u>STEP 2:</u> Deliver Unit Logs, Field WX Observations, Performance Evaluations and other documentation to the Documentation Unit at the Orofino ICP. If you do not check-out at the Orofino ICP, arrange with your supervisor to deliver your documentation to the Documentation Unit.

STEP 3: Finalize all CTRs and Shift Tickets and complete any other required Finance demobilization item(s) per the Finance Demobilization sheet.

<u>STEP 4:</u> After you have completed Steps 1, 2 and 3, use the following QR code to access the virtual Demobilization Form. After you have answered all questions, press the "SUBMIT" button to submit the form.

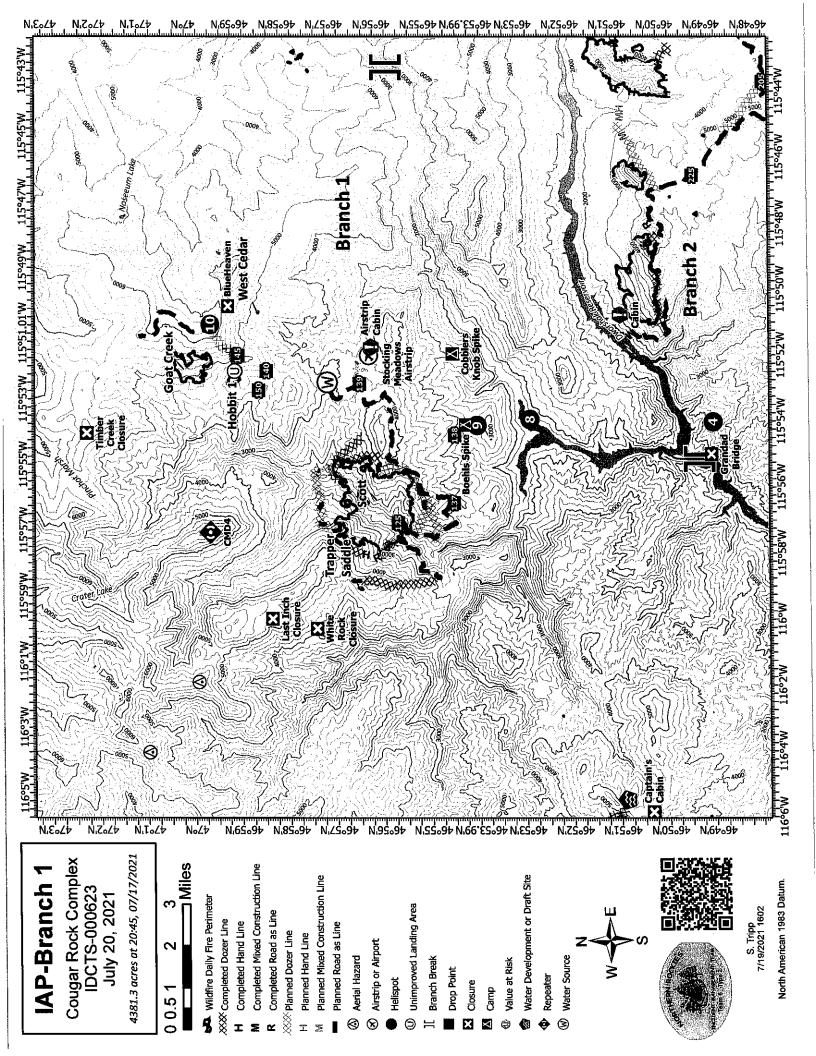

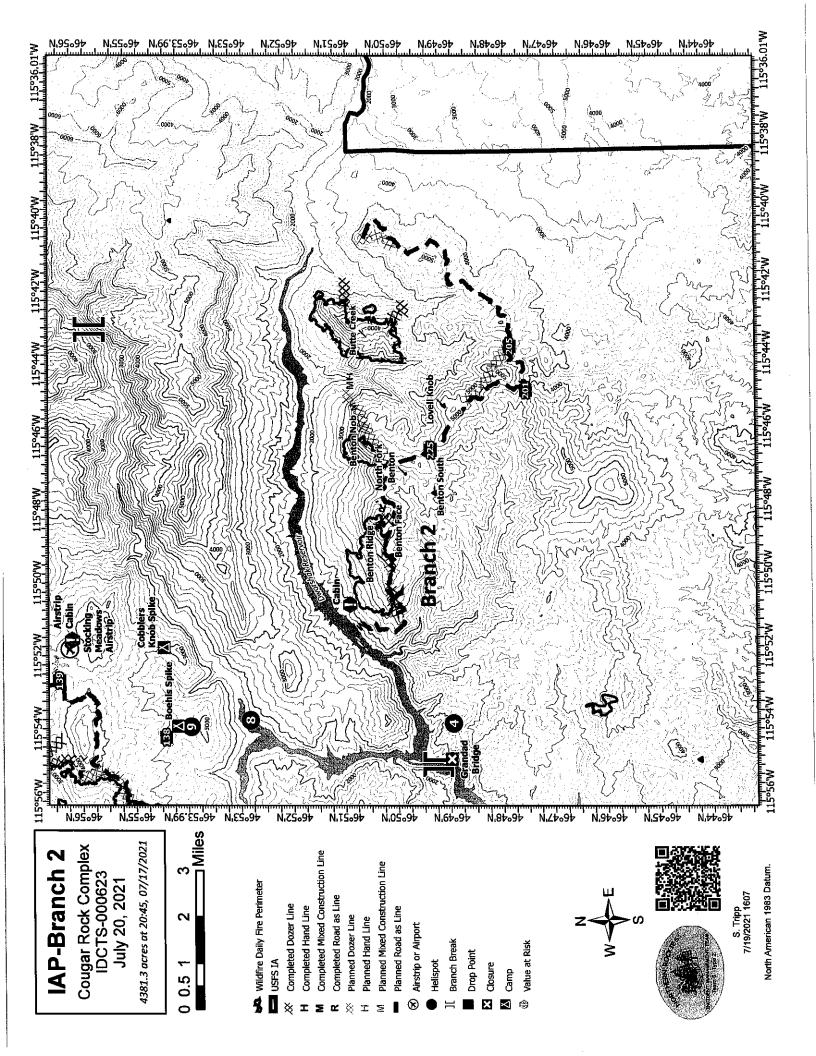

https://forms.office.com/g/gCN9QfrQPD

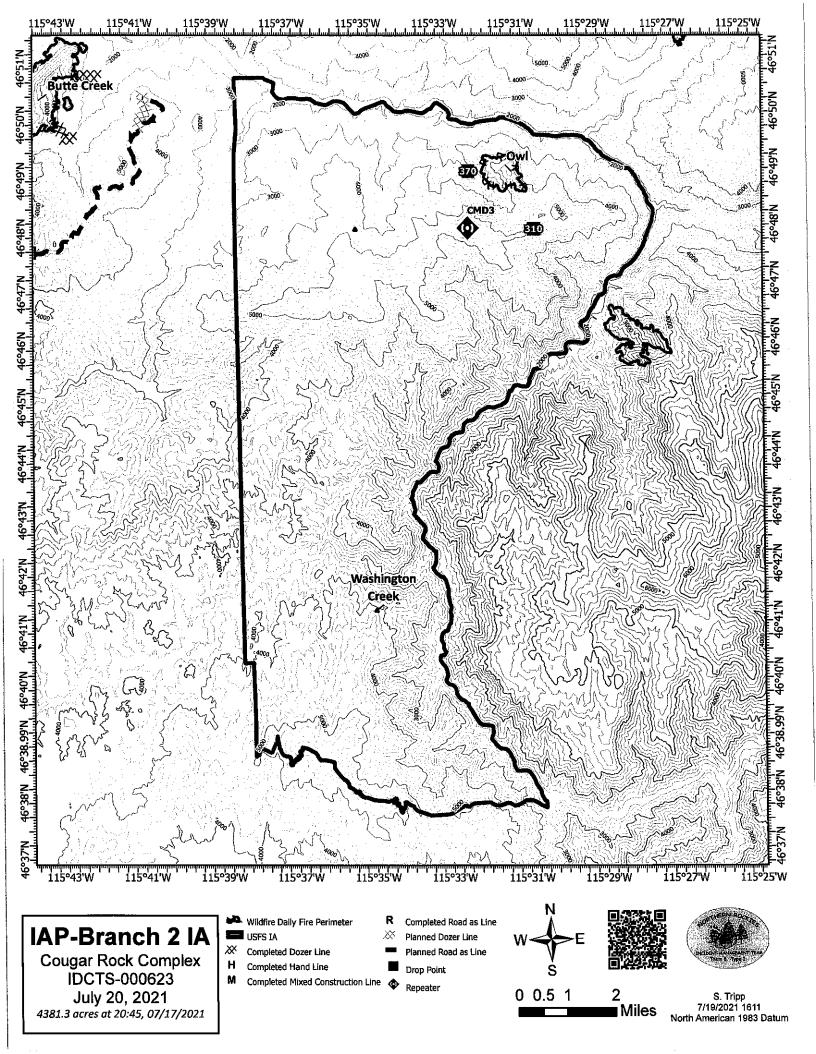

The Demobilization Unit will not demobilize you with Grangeville Dispatch until it has received your completed virtual Demobilization Form.

If you are unable to complete the virtual Demobilization Form, visit the Demobilization Unit at the Orofino ICP or contact the Demobilization Unit at 2021.cougarrock.demob@firenet.gov or at 208-494-2355 to complete your demob.

IF YOU ARE TRAVELING HOME BY AIR, YOU MUST CONTACT THE DEMOBILIZATION UNIT NOT LESS THAN **72 HOURS** PRIOR TO YOUR DEMOB DATE TO CONFIRM TRAVEL INFORMATION.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Hea the following items to communicate situation to communications/dispatch.

Ex: "Communications, Div. Alpha. INCIDENT STATUS: Provide incidence	dent summary (including number of pat I priority patient, unconscious, struck by	tients) and command s	tructure.	Road 1 at (Lat./Long.) This will be the Trout
everity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or li	thing, bleeding severel lous injury or ilined walk, 2° – 3° burns no r injury or iliness.	y, 2° – 3° burns more than 4 p is. Evacuation may be I it more than 1-3 palm sizes.	nalm sizes, heat stroke, disoriented. DELAYED if necessary.
