Fire information 2021.cougarrock@firenet.gov or 208-494-1943

#### **INCIDENT OBJECTIVES**

Incident Name Cougar Rock Complex 2. Date Prepared 07/26/2021

3. Time Prepared

4. Objectives

#### High Value Assets and Resources to be Protected:

- Private properties, infrastructure and timber resources.
- Habitat reparation and watershed, cultural, historic, and heritage sites.
- Waterways and riparian areas.

#### Leader's Intent:

- Protect human life. Firefighter and public safety will be given the highest priority at all times. Risks to firefighters and the public will be managed by utilizing a risked-based approach to decision making. An emphasis will be placed on exposure to accidents and heat related illness.
- Minimize the exposure of the public and responders to transmission or infection from COVID-19 by following agency guidance and established CDC, local, state and national guidance to ensure a healthy work environment.
- Communicate proactively with agency staffs, cooperators, permittees and stakeholders, including PotlachDeltic, Idaho Department of Lands, United States Army Corps of Engineers, United States Forest Service, the Nez Perce Tribe, and the Clearwater County Sheriff, Emergency Management Coordinator and County Commissioners, through effective and timely dialogues, meetings and comprehensive information sharing for purposes to include public safety, evacuations, traffic control, road closures, structure protection and any other safety risk to public and industrial operators.
- Inform the Agency Administrator and Association Line Officer of any public meetings and media contacts and coordinate with the Clearwater IDL and CPTPA to ensure that we build on existing relationships, contacts and key messages.
- Utilize appropriate fire strategies to minimize fire impacts to residences, commercial properties, critical community infrastructure and natural resources, and critical watersheds.
- Implement appropriate measures to limit the spread of noxious weeds, including washing all vehicles and equipment upon arrival at the incident and departure from the incident.
- Work with agency staff and cooperators to assess wildfire effects to infrastructure and watersheds and develop and implement short-term actions to address high-risk watershed impacts.
- Commit incident resources only where there is a high probability of meeting reasonable objectives or when the risk of injury or death can be mitigated.
- Follow and adhere to the 10 standard orders. Continually evaluate the 18 watch out situations through clear concise direction and understanding of assignments and necessary mitigations.
- · Maintain and foster relationships with users of public lands, landowners, agencies and local communities.
- Maintain the highest degree of professionalism on the incident and within local communities.
- Adhere to applicable work-rest guidelines to reduce fatigue and ensure that assigned fire-fighting personnel receive adequate rest.
- Maintain a workplace and atmosphere of mutual respect and free of any harassment. There will be no tolerance for any unethical, illegal drug or alcohol related incidents.
- Effectively manage costs commensurate with the high value assets and resources to be protected and risks.
- Efficiently demobilize resources in a manner that will ensure safe travel and "right-sizing" consistent with demobilization glidepath direction.

#### **Operational Objectives:**

- Scout for and prioritize potential fire suppression and values at risk protection opportunities.
- Gather intelligence on personnel and equipment on the incident.
- Engage in fire suppression and/or values at risk protection actions and/or point protection when safe to do so with available resources.
- Respond as appropriate to, and commensurate with the prioritization of, new/emerging incidents.
- Act with appropriate prioritization if presented with the opportunity to rehabilitate resource damage caused by suppression actions.

#### Fire Weather Forecast

**FORECAST NO: 18** 

PREDICTION FOR: Day SHIFT

**SHIFT DATE:** Tuesday, 07-27-2021

**NAME OF FIRE:** Cougar Rock Complex

UNIT: CPTPA

SIGNED: Eric Trimble/Nathan Lancaster, FBAN

TIME AND DATE

FORECAST ISSUED: 1900 7/26/2021

**WEATHER DISCUSSION:** For Cougar Rock Complex (Hobbit 1, Scott, Trapper Saddle, Goat Creek)

Warming temperatures are expected through the week, with the hottest days still looking to be Friday and Saturday. The increase in monsoonal moisture is expected through this period, bringing with it more clouds and some opportunities for light rain. This will be mainly in the form of light sprinkles if anything through Tuesday. Then better chances come on Wednesday, but the risk of wetting rains is low. The risk for embedded thunderstorms is not zero, but it is too low to include in the official forecast as the better ingredients for thunderstorms stays south and east of the site.

#### Today Tuesday, July 27:

**WEATHER:** Partly sunny. Haze and areas of smoke. Chance of sprinkles.

**TEMPERATURES:** 

Fire: 78 to 82°F

**HUMIDITY:** 

Fire: 25 to 29%

WINDS (20ft): Southwest 3-5 mph becoming west 4-8 mph in the afternoon.

**HAINES INDEX: 3 Low** 

LAL: 1 CWR: 0%

#### **WEATHER DISCUSSION:** For Cougar Rock Complex (Butte Creek, Benton Ridge Fires, Lovell Knob)

Isolated thunderstorms are possible Tuesday morning and Tuesday late afternoon and evening as monsoonal moisture moves into central Idaho. Any thunderstorm development will be elevated and capable of strong, gusty outflow winds in excess of 30 mph. Little to any confidence exists for a wetting rain with shower and/or thunderstorm activity. Wednesday onward, a ridge of high pressure will keep warm and dry weather across the region. Regional wildfire smoke will maintain valley inversions through the early afternoon hours each day, with light terrain driven wind circulations developing by the late afternoon hours.

#### Today Tuesday, July 27:

WEATHER: Partly cloudy. Slight chance for afternoon thunderstorms.

**TEMPERATURES:** 

Fire: 86 to 91°F

**HUMIDITY:** 

Fire: 15 to 20%

WINDS (20ft): Variable 2-4 mph becoming southwest 4-7 mph with gusts to 12 mph during the afternoon.

**HAINES INDEX:** 3 Very Low

LAL: 1 CWR: 0%

#### EXTENDED FORECAST: Tuesday – Saturday

Wednesday.... Partly Cloudy. Smoke. Lows 60's; Highs 80's. Winds NW 10-15 mph.

Thursday ...... Partly Cloudy. Smoke. Lows 60's; Highs 80's. Winds NW 10-15 mph.

Friday...... Partly Cloudy. Lows 60's; Highs 90's. Winds North 5-10 mph.

Saturday...... Partly Cloudy. Smoke. Lows 60's; Highs 90's.

Sunday ...... Chance of showers and slight chance of thunderstorms. Lows 59-64. Highs 85-90.

	FIRE BEHAVIOR FORECAST
FORECAST NUMBER: 18	INCIDENT TYPE: Wildfire
FIRE NAME: Cougar Rock Complex	OPERATIONAL PERIOD: July 27, 2021 Tuesday
DATE ISSUED: July 26, 2021	TIME ISSUED: 1800
UNIT: ID-CPTPA	PREPARED BY: Eric Trimble/Nate Lancaster – FBAN
	INPUTS

#### **WEATHER SUMMARY:**

Sky Weather: Partly Sunny, Haze CWR: 0%, Temps: 80 to 90°, RH: 17 to 27%, Haines: 3 Very Low; LAL: 1 Winds (20 ft): West winds 3 to 5 mph in the morning increasing to 4 to 8 mph in the afternoon.

#### **FUELS: Cougar Rock Complex-11 fires**

Mixed conifer forest dominated by Western Red Cedar, Douglas Fir, Western Larch, and Grand Fir. Subalpine Alpine Fir, Engelman Spruce and Lodge Pole Pine at the higher elevations (>4,800'). All age and size classes of conifer fuels with relatively high crown bulk density and low crown base heights. Light to moderate amounts of dead fine fuels and logging/thinning slash will contribute to surface fire spread. Herbaceous and live woody fuels are green and will generally not contribute to fire spread.

Fine Fuels: 2-5%; 10-hr: 8%; 100hr: 9%; 1000hr: 12%

ERC: >97<sup>th</sup> percentile. Max spotting distance: 0.2 Mile

#### **OUTPUTS - FIRE BEHAVIOR**

#### General:

Expect active surface and ground fire. Single to small group tree torching/short range spotting in unburnt areas within the fire and areas of unsecured line. Live fuels and young conifer plantations should discourage crown fire activity. Except in the SAF/ES stands (i.e. Goat Fire) fire activity should remain on the ground under dense canopies and sheltered sites. Fire primarily moving in activity fuels/slash and jackpots of dead/down/litter. Both on and off-site smoke will damper fire activity.

Backing/flanking spread 2-3 ft/min with flames 2-3 ft. Head fire with possible 5-7 ft. flame lengths and 8-10 ft/min rates of spread on the steeper sites, higher with torching and when slope and wind align.

#### **Specific:**

Benton Fires: Continued movement to the N/NW toward the Reservoir. Fire will move towards the tether line on the east side of the fire.

**Butte Creek:** Continued fire growth to the E/NE of Thompson Point and towards the Reservoir. Thompson creek is currently suppressing fire growth.

**Goat Creek:** Sub-alpine fir will continue to promote fire spread thru single tree and group tree torching in most directions. Predominant spread direction S/SE. This will continue to occur until significant moisture is realized.

Probability of Ignition (PIG): 82 - 87% during the peak of the burning period.

AIR OPERATIONS: Notable impact to aviation over the next 24 hours will be limited surface and slantwise <u>visibility</u> due to <u>wildfire smoke</u>.

SAFETY: You may find yourself going from mop-up or holding to suddenly chasing fire. Make sure you have LCES in place before you engage.

#### 1. Branch 2. Division/Group **ASSIGNMENT LIST** 1 **Hobbit Fire Group** 3. Incident Name 4. Operational Period Date: 07/27/2021 Time: 0600-2200 Cougar Rock Complex **Operations Personnel** Danny Lemer, Paul Wagner (t) Operations Chief - Line/ Joe Brabender **Group Supervisor** Branch Director Operations Chief -Ron Naber Air Branch Director Planning Resources Assigned This Period Last No. Strike Team/Task Force/ Resource Trans. Control Operations

Group includes Hobbit, Goat Creek, Trapper Saddle and West Cedar fires.

**Task:** Continue to secure Hobbit fire perimeter. Monitor sprinkler line from 457 road down to Hobbit fire. Monitor sprinklers above My Blue Heaven cabin. Utilize air resources as appropriate.

Purpose: Provide protection for My Blue Heaven cabin. Slow fire progression toward My Blue Heaven cabin.

End State: Hobbit fire and Goat Creek fire have a viable fire suppression/value at risk protection plan.

#### 8. Special Instructions

Utilize LCES.

Logistic orders to Group Supervisor by 1000 for next shift.

Consolidate trash for back haul.

Disengage from cedar snag areas when winds are 5 mph or greater.

Grandad Bridge and Captains Cabin road closures will be staffed by Clearwater Co. S.O. Deputies as anticipated traffic flow requires.

	Thomas Robbins COM		The source of	the design following falls	wood by oither	And the frequency is	ling on whet	her the f	requency is

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "N" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

#### **HEALTH AND SAFETY MESSAGE**

**SAFETY** starts with **YOU** 

We are ALL accountable for SAFE behaviors

INCIDENT: Cougar Rock Complex **DATE**: July 27<sup>th</sup>, 2021 **TIME**: Day 0600-2200

#### Major Hazards and Risks:

• Fire on the hill – There is still a mission to finish. Stay engaged, focused and finish this incident strong.

#### Quote of the Day

"Your first duty and highest obligation is safety, for your crew and others" by unknown

#### **DEMOB**

On your way home, be careful.

You have had a long assignment.

Fatigue can sneak in.

The same precautions should be taken.

Headlights on, Seatbelts used, Go slow.

Drive Defensively.

Don't use phone or text while driving.

Take breaks every two hours.

Follow duty/drive day rules. (16 hrs/10 hrs)

Your loved ones will be happy to see you home SAFELY!!!

### Thank You for all your work!!!!

## TRANSITION DAY!!

#### CHANGE of COMMAND

- Risks to fireline personnel increase significantly during change of command.
- There is a high potential for fatalities, serious injuries or incidents during the transfer.
- Mitigate risks thru proper mitigation methods.
- Know who you work for at all times. Be extra alert during the change of command.
- Have LCES in place and working.

# QUESTIONS THAT COULD SAVE YOUR LIFE

- Who is in charge?
- Are all hazards identified, and have you made them known?
- Communications?
- Weather? Hot/Cold and Dry/Wet.
- Confusion?
- Is there a safer way to do it?
- Can you justify your actions?
- Is this flight necessary?

We still have a job to do, Use extreme caution doing it, don't let Complacency set in.

#### **Your Safety Team**

Marvin Carpenter, and Steve Wyatt.

Remember Each of **You** are safety Officers!!

## ASSIGNMENT-SPECIFIC MEDICAL EMERGENCY ACTION PLAN

Pre-Planning for today's assignment

Pre-Planning for	today's assignment	
What kind of sever		
Who is the likely in emergency in your Zulu")	n-charge DIVS or overhead for an rassigned area today? (i.e. "Division	
Who are the Medi	ical personnel assigned to your part of at are their capabilities?	
Other Emergency ambulance?	Responders: fire dept., crash rescue,	
Communications: Medical helicopte	Command channel, Air to Ground, ers, local rescue/medical?	
	Ground vehicle, drop point, coordinates, travel route?	
Transportation methods available	Aircraft I.D, Helispot names, coordinates? Hoist capable, internal transport	
·	Other available methods - contingency	
Most likely workf	orce for evacuation	

#### Response checklist

#### Who takes charge?

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Medical personnel and emergency responders manage patients and assist in rescue/extrication.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

#### Response sequence:

- First, secure the scene and protect responders and patients from further injury. Render first aid.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If not, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.

Information for Communications: Medical Incident Report — See last page of IAP and IRPG pages 118 and 119.

Helicopter Extraction Operations: See IRPG pages 116 and 117.

Severe Weather: In the event of forecasted severe weather, implement Incident Severe Weather Plan.

Incident Within Incident: Upon arriving at the incident, all overhead should obtain and review the team's Incident Within Incident Plan.

#### Incident within Incident (IWI) Plan

#### Immediate response:

- Secure the site to prevent further injury to victims and responders.
- Render first aid using crew and line EMT's and nearby forces.
- Designate a Point of Contact at the scene. Notify communications who this is and when it changes.
- Notify Communications and Medical Unit. Identify whether this is a life threatening emergency or less serious injury.
- Communications requests "Emergency Traffic" to clear channel if it is a life threatening emergency.
- Transmit critical information from the scene to Communications: Type and extent of injury; Airway or breathing problems; serious bleeding; EMT present or needed; ALS needed. Give specific location of victim: Lat/Long; ground or air access; DP#; Helispot or helicopter medevac site. Do not use victim or crew names in any communications. Use the Medical Incident Report, pages 118 and 119 of the Incident Response Pocket Guide (IRPG) as a checklist.
- Request appropriate Medical Unit, incident resource and local 9-1-1 EMS response.
- Designate an Incident Within Incident Commander (IWIC). DIVS is normally in charge. Other Operations persons may be in charge until relieved. Notify communications who this is and when it changes.
- Communications: If requested, notify Local 9-1-1 EMS and other responders right away. Provide staging information, medical evacuation location(s), IWIC, medical contact information and communication protocol. Post <u>Medical Incident Report</u> at Communications desk to facilitate sharing critical information.
- Medical Unit Leader should assist the IWIC in coordinating any Local EMS, incident medical, and transportation response.
- Communications notifies DIVS, Line OPS and SOF2 to respond to the scene.
- In the event we are shadowing another team, provide whatever assistance we can to help them with the situation.

#### Aviation Mishap:

For an aviation accident within the fire area, the standard Incident within Incident protocols will be followed.

For an aviation accident outside of the fire area, the following procedure will be followed in addition to the Incident within an Incident Protocols.:

If an aviation accident is suspected or reported, Helibase will dispatch Air Attack to the location to assess the scene. If no Air Attack is available than the closest aviation resource will be dispatched. Helibase will then make a determination on the most appropriate helicopter available to respond for rescue considering time, capabilities, access, etc. Once on scene the helitack on site will designate a POC to be in charge of the situation until relieved. Once these resources are on scene and communication is established the Incident within an Incident protocols remain the same.

# COUGAR ROCK COMPLEX ID-CTS-000623 VIRTUAL DEMOB PROCESS V1.1

The following virtual demobilization process has been established for all resources demobilizing from the Cougar Rock Complex. You will need a cell or internet connection to complete the Check-Out Form.

<u>STEP 1:</u> Return all accountable property (radios, supplies, etc.) to the Communications Unit and/or the Supply Unit at Headquarters Camp or ICP. \*\*\*ALL NON-LOCAL VEHICLES THAT HAVE BEEN OFF-PAVEMENT MUST GO THROUGH WEED WASH AT THE **45555 HWY 12, OROFINO** PRIOR TO DEMOBILIZING\*\*

<u>STEP 2:</u> Deliver Unit Logs, Field WX Observations, Performance Evaluations and other documentation to the Documentation Unit at the Orofino ICP. If you do not check-out at the Orofino ICP, arrange with your supervisor to deliver your documentation to the Documentation Unit.

**STEP 3:** Finalize all CTRs and Shift Tickets and complete any other required Finance demobilization item(s) per the Finance Demobilization sheet.

**STEP 4:** After you have completed Steps 1, 2 and 3, use the following QR code to access the virtual Demobilization Form. After you have answered all questions, press the "SUBMIT" button to submit the form.

https://forms.office.com/g/gCN9QfrQPD

The Demobilization Unit will not demobilize you with Grangeville Dispatch until it has received your completed virtual Demobilization Form.

If you are unable to complete the virtual Demobilization Form, visit the Demobilization Unit at the Orofino ICP or contact the Demobilization Unit at **2021.cougarrock.demob@firenet.gov** or at **208-494-2355** to complete your demob.

IF YOU ARE TRAVELING HOME BY AIR, YOU MUST CONTACT THE DEMOBILIZATION UNIT NOT LESS THAN **72 HOURS** PRIOR TO YOUR DEMOB DATE TO CONFIRM TRAVEL INFORMATION.

#### **Finance Demob Process**

The finance demob process can be done remotely or in person.

#### Remote Demob for Equipment and / or Personnel / Crews

- Complete your Last Day Shift Ticket and / or CTR (this would include your travel). Forest Service AD's need to project their time for their travel
- Write your email address on the Shift Ticket and / or CTR
- Send your Shift Ticket and / or CTR to:

## 2021.cougarrock.finance@firenet.gov

- Finance will complete the posting and send the documents back to you by email for your review and signature
- Please return the Final Signed Documents to the finance email (Contracted Equipment – in lieu of signature approval you may respond to the finance email that "All is Correct")
- Forest Service Casual Hire Employees (AD's) should also submit their travel information which may include per diem, lodging, baggage fees, gas receipts etc.

#### In Person Demob for Equipment and / or Personnel / Crews

- Complete your Last Day Shift Ticket and / or CTR (this would include your travel.) Forest Service AD's need to project their travel time.
- Turn in to finance the Shift Ticket and / or CTR for input
- A draft will be provided for review
- After review and approval a "Final" will be printed for signatures

If you have any questions call Finance at 208-820-4661
