

INCIDENT ACTION PLAN - COUGAR ROCK COMPLEX

ID-CTS-000623 Fire Code PN N5HF

Wednesday 08-11-2021

Day Shift: 0600-2200

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

The Medical Incident Report (MIR)

The MIR is not always tasked to the Emergency Medical Technician (EMT) or Paramedic in Patient Care. The intent of the form is to:

1. establish control of the incident, whether routine or life-threatening, by initiating a new Incident Command System,
2. standardize a systematic process for reporting medical incidents/injuries, similar to a fire size-up for initial attack, and
3. enable any firefighter, with prior training and direction, to fill it out and transmit the information.

- Treat it like any incident. If the incident is overwhelming, ask for a more qualified Incident Commander (IC) to assume command. Expand/contract the organization's size depending on the needs of the incident.
- Fill this report out completely prior to transmitting to dispatch/communications. If the incident is life threatening, do not let documentation delay patient care.
- When transmitting the report, state the number and title of each section, and say "break" and pause between the sections (e.g., "**Dispatch**, Task Force Leader (TFLD) Jones. Standby for Priority Medical Incident Report. **1.** All other radio traffic please hold, **break**" (pause/wait for response). "**2. Incident Status:** Nature of Illness is chest pain. Incident Name is Tank Medical. IC will be TFLD Jones. Patient Care will be Paramedic Smith. **Break** (pause again). **3. Initial Patient Assessment** is...").

- When using the MIR during a Multi-Casualty Incident (MCI), state the number injured and their severity (Section 3: e.g., "3. Initial Patient Assessment, I have five patients. three Reds, one Yellow, and one Green. Mechanism of Injury is...").
- Use the terms Paramedic or EMT with the provider's last name in "Patient Care." Do not use EMT to describe a Paramedic or the ambiguous term Medic. All those roles need to be clearly identified to understand the level of care and treatment the patient(s) will receive.
- Enact more than one transport plan and clear more than one frequency if needed for Sections 5 and 6.
- Always be ready for the first plan to fail and be flexible enough to move into an alternate plan. Use the acronym PACE (Primary, Alternate, Contingency, and Emergency) for planning purposes.

Mop-up Guidelines

Mop-up from the fire edge to a distance interior that:

- 1.) Minimizes hazard exposure to suppression resources;
- 2.) Is commensurate to the risk of escape from torching and spotting;
- 3.) Is a minimum distance of 100 feet if firefighter safety is not compromised.

Concentrate on ragged green fingers or islands that have potential to torch and spot. One hundred percent mop-up of all spot fires outside the perimeter.

Keep Your Crew Healthy for the Next One!

- **Perform hand hygiene:** When soap and water are available, wash your hands often for at least 20 seconds, especially after coughing or sneezing. This is especially true when hands are visibly dirty, after touching commonly touched surfaces like porta potty doors, tables, and equipment, after using the toilet, or before eating. If soap and water are not readily available, alcohol-based hand sanitizers with at least 60% alcohol should be used.
- **Follow respiratory etiquette principles:** Cover your nose and mouth with a tissue when coughing or sneezing. If using a tissue, immediately throw away the tissue away after use and wash or sanitize your hands as described above.
- **Keeping hands away from face:** Practice not touching your eyes, nose, or mouth. While it may seem simple, germs often spread this way.
- **Clean and disinfect the environment appropriately:** Frequently touched surfaces in the workplace (engines, rigs, and buggies) should be routinely cleaned and if necessary disinfected.
