

Dixie Fire

Jumbo Fire

ID-NCF-000448

P1N402 (0117)

INCIDENT ACTION PLAN

Wednesday August 11, 2021

For IAP, Maps, Check-in and Demob

INCIDENT OBJECTIVES	1. Incident Name DIXIE / JUMBO		2. Date Prepared August 10, 2021		3. Time 2100
4. Operational Period: August 11, 2021 DAY OPERATIONS 0600 - 2000					
Incident Objectives 1. The Dixie and Jumbo fires will be managed using a variety of suppression strategies based on firefighter safety, availability of firefighting resource and threats to values at risk. 2. Maintain access for firefighting resources and public egress within the Dixie and Jumbo fires' planning area. 3. Execute strategies and tactics to reduce fire impacts to primary private and commercial structures, where possible. 4. Consider efforts to moderate fire behavior to reduce probability of disrupting primary distribution lines to affected communities and communication sites associated with emergency response. 5. Reduce negative impacts of fire management actions on cultural and natural features in the area, where safety and efficacy of suppression actions do not conflict with this objective. Order of priority: Nationally significant cultural resources, critical anadromous fish habitat and other sensitive watershed conditions identified by Agency Administrators. Incident Requirements 1. Utilize risk-informed decision making to reduce fire fighter exposure to hazards while providing for public safety. 2. Utilize pre-existing plans for community protection opportunities in North Star, Black Diamond, Comstock, Dixie, Mallard Ranch, Red River, Concord, Humptown, Frogtown, Fivemile Bar, Mackay Bar, and Copenhagen Ranch. 3. Obtain approval for use of mechanized equipment in the Gospel Hump and Frank Church – River of No Return Wilderness areas. 4. Document the quantity and placement of long-term retardant. Minimize the use of long-term retardant in designated wilderness areas, except to protect human life or to achieve point protection objectives. 5. Any mechanical equipment operations within Inventoried Roadless Areas need prior approval from Agency Administrator. 6. Provide current and accurate information to the media, public, and local office holders as to the status of fires within the complex. 7. Provide for rehabilitation of areas impacted by incident operations in coordination with jurisdictional agency's resource advisor(s).					
6. Weather Forecast for Period: See attached Fire Weather Forecast

Fire Weather Forecast

FORECAST NO: 34
PREDICTION FOR: Wednesday
SHIFT DATES: Aug 11, 2021
FORECAST ISSUED: 1800 August 10, 2021

NAME OF FIRE: Dixie/Jumbo
UNIT: ID-NCF NR FMT Team 5
IMET: Jimmy Taeger (208) 577-1624

WEATHER DISCUSSION: A warming trend will continue through the end of the week. Afternoon relative humidity will lower to around 20-25% through the period, with lower values in the teens on Saturday. Highs will rise into the 90s to low 100s by Saturday, then lower into the 70s and 80s by Monday with the return of showers and thunderstorms.

WEATHER FORECAST TODAY (WEDNESDAY):

	Dixie (5,600 ft)	Mallard Creek (5,400 ft)	Mariah RAWs (3,400 ft)
Max/Min Temp.	83F / 48F	81F / 49F	96F / 64F
Min/Max RH	25% / 65%	27% / 65%	20% / 45%
Day Winds (20 foot)	NNW winds 10 to 15 mph. Strongest winds between 1100-2000.	NW winds 10 to 15 mph. Strongest winds between 1100-2000.	NW winds 5 to 10 mph. Strongest winds between 1200-2000.
Night Winds (20 foot)	Becoming down drainage 2 to 4 mph after 2000.	Becoming down drainage 2 to 4 mph after 2000.	Downslope/downvalley winds 2-4 mph after 2000.
Notes	Be sure to drink plenty of water!	Be sure to drink plenty of water!	Be sure to drink plenty of water!

WEATHER: Patchy valley fog in the morning, then becoming partly to mostly cloudy.

LAL: 1 CWR: 0% HAINES: 4

STABILITY / INVERSION: Moderate night time inversion below active fire area. Mixing by 1100.

SMOKE TRANSPORT WINDS: North northwest 5 to 10 mph in afternoon.

Sunset Wednesday: 1954

Sunrise Thursday: 0537

Sunset Thursday: 1953

OUTLOOK FOR THURSDAY (Dixie 5,600 FT): Partly cloudy skies. Winds NNE 5 to 10 mph with gusts to 15 mph in the afternoon. Max Temps 86 to 89F. Min RH: 23%. Max RH: 70%. LAL 1. CWR 0%. Haines 4.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 34

TYPE OF FIRE: Wildland Fire

FIRE NAME: Dixie/Jumbo

OPERATIONAL PERIOD: Wednesday, August 11th, 2021

DATE ISSUED: 8/10/21

TIME ISSUED: 1900

UNIT: USFS-ID-NCF

SIGNED: Andrew Myhra – FBAN(t)

INPUTS

WEATHER SUMMARY: Continued hot and dry conditions persist through the weekend. Some possible relief by Monday. Today: Highs – 80s to 90s; Low RH – 20-25%; CWR 0%; Partly to mostly cloudy.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Potential fire behavior will continue to be moderated by fuel conditions
 - ERCs are average for mid-August and climbing
 - 1000hr fuel moisture remains above average for this time of year

ERC Values for Lodgepole RAWS (south of fire)

1000hr fuel moisture for Lodgepole RAWS

- Through the weekend hot and dry weather will create potential for increased fire activity, especially if conditions become windy. Pay attention for “Hot, Dry, Windy” conditions.
- A forecast disturbance on Sunday could bring increased winds.
- As smoke enters the region from other fires, the haze could reduce surface heating.

SPECIFIC:

Division C: Minimal fire activity. Some heat persists near the crest of Mammoth Mountain.

Division F: Isolated heat remains on the north aspect of Blowout Ridge but is not actively spreading.

Division T/X: Active fire persists south of the burn scar in the Noble Creek drainage and NW of Mallard Creek campground. Watch for increased activity and wind surfacing on ridgetops, flats, and NW→SE aligned drainages.

Jumbo Fire: Isolated smoke in the SE corner of the fire. Continue to monitor by air.

AIR OPERATIONS: Sunset 1956. Sunrise Wednesday 0536. Moderate inversion mixing by 1100.

FIRE BEHAVIOR SAFETY: The Salmon River Canyon has been known to produce unexpected wind conditions, developing downslopes in the afternoon from the canyon break to the upper third of the canyon. As afternoon heating occurs, air can rise almost straight vertical from the center of the canyon. The rising hot air is replaced with cooler air from the upland plateaus. This can be counter-intuitive to common understanding of diurnal winds and may catch firefighters off-guard.

Safety Message

Major Hazards and Risks: Getting Hotter and Drier

WEATHER BECOMING HOTTER AND DRIER: Weather is getting hotter and drier additionally after receiving precipitation. Pay particular attention to an increase in fire behavior with smokes popping up earlier in the day and with increased volume of smoke.

Watch Out Situation for Today

14.WEATHER IS GETTING HOTTER AND DRIER

COVID-19

- **Social Distancing** - Maintain 6' foot distance whenever possible.
- **Wear a mask** – For everyone's safety "wear a mask" when riding in vehicles in groups of more than one not part of your "Module of One" and social distancing is not possible.
- **Wash Hands**- Wash hands frequently using soap and water or use hand sanitizer if needed.
- **Watch for symptoms** - Watch personnel for cough, headache, loss of taste or smell, temperature, shortness of breath.
- **Use Common sense**- If sick, stay home, and report illness. Avoid crowded locations.
- **Monitor**- CDC web site provides updated information. Local health department.

Be Mindful About Safety in all Your Actions

Northern Rockies Team 5

DIXIE/JUMBO FIRE

Incident within an Incident Emergency Action Plan

In the case of a serious accident requiring patient transport to a medical facility:

- The closest ranking Operations Leader (i.e., Division Supervisor) at the accident scene will take charge and be the Point of Contact (POC).
- Use the 8-line protocol to assess patient; if patient evaluation is either red or yellow use **Dixie Fire Command Frequency Identified for the Division the IWI is occurring on**. Air extraction resources will use Air to Ground tactical or Air Ambulance EMS2.
- If incident should occur outside the Dixie/Jumbo Fires contact 911 and Dixie Communications on Command frequency for monitoring and support and to notify whether patient is incident personnel or civilian.
- Patients evaluated as Green notify nearest supervisor of the location of the incident and assigned EMT to determine treatment and transport to Medical Unit.
- Upon notification of a serious accident, the Following will report to the ICP Communications trailer: Incident Commander, Safety Officer, Operations Section Chief (Planning OPS), and Medical Unit Leader to monitor IWI. Safety Officer will notify Finance and/or Comp Claims of the IWI.
- Incident radio traffic will be monitored from 0500 to 2200 every day on Command at ICP.

LEAVING DIXIE:

1. When am I demobing?

Your last work day is listed in the daily IAP, your demob is the following day. Questions about demob can be answered by visiting the demob unit's tent or by emailing 2021.goose.demob@firenet.gov

2. How do I demob?

On your demob date start by visiting the demob tent and pick up your Demob Checklist form. "Run the gauntlet" to Supply, Commo, and Finance. Last stop on the gauntlet is DEMOB.

3. Complete the Remote Checkout via the QR Code on the IAP. If you have connectivity issues, DEMOB can help.

HELPFUL TIPS:

- **TURN IN YOUR TIME DAILY!** (This simple step will greatly simplify your demob)
- Email approved CTRs/Shift Tickets, 2021.dixie.finance@firenet.gov
- *OR*
- Deposit approved CTRs/Shift Tickets in the box conveniently located on the table at morning briefing.
- You can start your demob process the day before if you are leaving the next morning.
- If you came to this incident in an airplane and you haven't personally spoken with DEMOB, get it done sooner than later.
- Listen for any updates on demobing at the morning briefing.
- Above all: **Travel Safely Home**

YOUR DIXIE FINANCE IS HERE FOR YOU!

Need to submit your approved CTR or shift ticket?

How about your resource order?

AD hiring paperwork?

IT'S EASY TO DO!

Use your cell phone to take a picture of the
document you need to send

And email it to:

Medical Incident Report – 8 Line

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment:

See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.
