P1EKT5 (0117)

INCIDENT ACTION PLAN

Wednesday, August 4, 2021

INCIDENT OBJECTIVES	1. Incident Name DIXIE / JUMBO		2. Date August 3, 2021		3. Time 2100
4. Operational Period: August 4, 2021 DAY OPERATIONS 0600 - 2000					
Incident Objectives <ol style="list-style-type: none"> 1. The Dixie and Jumbo fires will be managed using a variety of suppression strategies based on firefighter safety, availability of firefighting resource and threats to values at risk. 2. Maintain access for firefighting resources and public egress within the Dixie and Jumbo fires' planning area. 3. Execute strategies and tactics to reduce fire impacts to primary private and commercial structures, where possible. 4. Consider efforts to moderate fire behavior to reduce probability of disrupting primary distribution lines to affected communities and communication sites associated with emergency response. 5. Reduce negative impacts of fire management actions on cultural and natural features in the area, where safety and efficacy of suppression actions do not conflict with this objective. Order of priority: Nationally significant cultural resources, critical anadromous fish habitat and other sensitive watershed conditions identified by Agency Administrators. 6. Provide for and maintain clear and continual communication with communities, fire responders and land managers. 					
Incident Requirements <ol style="list-style-type: none"> 1. Utilize risk-informed decision making to reduce fire fighter exposure to hazards while providing for public safety. 2. Utilize pre-existing plans for community protection opportunities in North Star, Black Diamond, Comstock, Dixie, Mallard Ranch, Red River, Concord, Humptown, Frogtown, Fivemile Bar, Mackay Bar, and Copenhaver Ranch. 3. Obtain approval for use of mechanized equipment in the Gospel Hump and Frank Church – River of No Return Wilderness areas. 4. Document the quantity and placement of long-term retardant. Minimize the use of long-term retardant in designated wilderness areas, except to protect human life or to achieve point protection objectives. 5. Any mechanical equipment operations within Inventoried Roadless Areas need prior approval from Agency Administrator. 6. Provide current and accurate information to the media, public, and local office holders as to the status of fires within the complex. 7. Provide for rehabilitation of areas impacted by incident operations in coordination with jurisdictional agency's resource advisor(s). 					
6. Weather Forecast for Period: See attached Fire Weather Forecast

Fire Weather Forecast

FORECAST NO: 27
PREDICTION FOR: Wednesday - Thursday
SHIFT DATES: Aug 4-5, 2021
FORECAST ISSUED: 1800 August 3, 2021

NAME OF FIRE: Dixie
UNIT: ID-NCF NR FMT Team 5
IMET: Pendergrast/Taeger (208) 577-1624

WEATHER DISCUSSION: High pressure will keep warm conditions in place through today. A disturbance moving quickly over the region Thursday will bring gusty South west winds and a chance of storms during the afternoon. There will be a period of relatively cooler, breezy conditions along with a chance of showers into late week.

WEATHER FORECAST TODAY (WEDNESDAY):

	Dixie (5,600 ft)	Mallard Creek (5,400 ft)	Mariah RAWs (3,400 ft)
Max/Min Temp.	86F / 59F	85F / 59F	89F / 53F
Min/Max RH	22% / 60%	24% / 64%	18% / 91%
Day Winds (20 foot)	SW winds 5 to 10 mph gusting to 15 mph in afternoon.	SW winds 5 to 10 mph gusting to 15 mph in afternoon.	Light drainage winds will become SW 4 to 8 mph gusting to 12 mph.
Night Winds (20 foot)	Becoming down drainage 2 to 4 mph after 2200. Moderate inversion	Becoming down drainage 2 to 4 mph after 2200. Moderate inversion	Downslope/downvalley winds 2-4 mph after 2200
Notes			

WEATHER: Morning smoke and fog in drainages becoming hazy during day. (see Air Resource Advisor forecast). Partly cloudy.

LAL: 1 **CWR:** 0% **HAINES:** 4

STABILITY / INVERSION: Moderate night time inversion below active fire area. Mixing by noon.

SMOKE TRANSPORT WINDS: Southwest 13 to 17 mph in afternoon.

Sunset Wednesday 2009

Sunrise Thursday 0532

Sunset Thursday 2007

OUTLOOK FOR THURSDAY (Dixie): Becoming breezy in afternoon with increasing clouds. A chance of showers with isolated storms. Winds Southwest 15 to 25 mph. Max Temps 83 to 86F. Min RH: 20 to 25%. Max RH: 70%. LAL 21. CWR 20%. Haines 4.

THREE DAY EXTENDED (5,600 FT)

	Max T	Min RH	Max RH	Ridge Winds	WX
FRI	72	25%	68%	NW 10 to 15 mph	Isolated storms LAL 2
SAT	73	31%	70%	W 13 to 18 mph	Iso showers LAL 2
SUN	71	33%	74%	W 15 to 20 mph	Sct showers LAL 2

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 27	TYPE OF FIRE: Wildland Fire
FIRE NAME: Dixie/Jumbo	OPERATIONAL PERIOD: Wednesday, August 4th, 2021
DATE ISSUED: 8/3/21	TIME ISSUED: 1900
UNIT: USFS-ID-NCF	SIGNED: Andrew Myhra – FBAN(t)

INPUTS

WEATHER SUMMARY: High pressure to remain over the fire area today. Disturbance moving through the area tomorrow with chance of thunderstorms. Today: High temps – high 80s to mid 90s; Low RH – River Canyon in the teens, low 20s elsewhere.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Major drying occurred across all but the most sheltered drainages around the fire today.
- Minimal fire activity was observed on both the Jumbo and Dixie fires.
- Fuels on exposed slopes and under open canopies are showing little sign of residual heat.
- Many of the heavy fuels within the fire perimeter did not consume and no longer carry heat.
- Live fuel moistures at the higher elevations are likely to remain stable for the next 5-8 days.
- Live fuels moistures gathered and measured at Red River RAWS on 7/30:

1000 hr	Beargrass	Doug-fir	Grand-fir	Kinnikinnik	Lodgepole	Ponderosa
7%	133%	109%	151%	127%	144%	119%

- In the mixed-conifer, areas of concentrated fuels and heavy duff continue to show signs of fire activity.
- Needle drop is occurring in many locations and may increase potential for reburn across the surface especially where wind is an input.
- Herbaceous and woody fuels in the river canyon are fully-cured, and will continue to dry-out quickly.
- Areas of concentrated fuel in Comstock Creek, north of 1190rd and high in Noble Creek may produce isolated torching late in the burn period today.
- Minimal fire spread and limited spotting potential expected over the next 48-72 hrs.
- Projected ERCs remain below average today.

SPECIFIC:

Division C: Light fuels on the south aspect will be available throughout the burn period today, burning rollout and heavies holding heat near adjacent fuels could lead to small pockets of fire growth.

Division F: Isolated smokes above Comstock Creek, creeping and rollout could extend fingers downhill and put fire in a position for short uphill runs.

Division T: Dispersed heat north of the 1190rd has the potential build in unburned pockets and produce single or group tree torching later in the burn period especially with the influence of any wind.

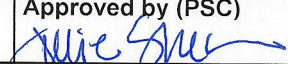

Division X: Active perimeter high in the Noble Creek drainage and south toward Mallard Creek. Mallard RAWS received only 1/3" of rain on Sunday. Single and group tree torching possible late in the burn period. This area could be exposed to a SW wind and potential spotting as the weather disturbance passes through on Thursday.

Division V: Continuous stands of heavy mixed-conifer between the indirect line and the main fire's edge.

Jumbo Fire: Minimal smoke observed around the fire perimeter.

AIR OPERATIONS: Sunset 2009. Sunrise Wednesday 0532. Moderate inversion mixing in the morning

FIRE BEHAVIOR SAFETY: Needle/leaf litter falling from the canopy can carry fire across already burned surface fuels creating a reburn that could threaten the fire perimeter from hundred of meters away. Be aware of pre-treated brush and fresh needlecast or leaf litter on top of smoldering fuels.

ICS-220 AIR OPERATIONS SUMMARY

Prepared By: Jeff Polack

08/03/2021

Prepared Time: 2000

1. INCIDENT NAME:
Dixie / Jumbo Fires

2. OPS PERIOD DATE:
08/04/2021

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.):
Assess mission complexity and the Benefit/Risk of the mission. Ensure visibility and winds are adequate to safely conduct flight operations. Ensure safe vertical & horizontal separation between aircraft in smokey conditions. Call in and out of the dips. Beware of general aviation in Salmon River corridor.
Smoky conditions can hamper aviation operations, adhere to visibility limitations, and DO NOT be pressured into accepting a mission that you know or feel is unsafe!
Terminate operational rotorwing no later than sunset.

HEAT STRESS QUIZ

Fill in the blank:

1. An early symptom of a heat stroke is _____ body temperature.
2. Heat strokes may cause loss of _____.
3. _____ or _____ are advanced symptoms of heat stroke.
4. You should lower the victim's _____ as fast as possible.
5. Drink _____ ounces of cool water every 15 minutes.
6. Tingling in _____ and _____ may occur as a symptom of heat exhaustion.
7. _____ or _____ clothing and boots to treat heat exhaustion.
8. In order to prevent heat rash and cramps one should keep skin _____ and _____.
9. Red rash and _____ are symptoms of heat rash or cramps.
10. _____ is a way to treat heat rash.

True or False:

- _____ 1. Give liquids to unconscious victims during heat stroke.
- _____ 2. An advanced symptom of a heat stroke is no detectable pulse.
- _____ 3. Frequent breaks are not necessary in hot areas.
- _____ 4. Victim may experience intense dehydration as sign of heat exhaustion.
- _____ 5. If victim becomes faint or unconscious calling 911 or initiating an IWI is not necessary.

Answers:

1. High 2. Consciousness 3. Seizure or Convulsions 4. Body Temperature 5. Five to Seven
6. Hands and Feet 7. Loosen or Remove 8. Dry & Clean 9. Itching 10. Ointment
True/False: F, T, F, T, F

Be Mindful About Safety in all Your Actions
Northern Rockies Team 5

DIXIE/JUMBO FIRE

Incident within an Incident Emergency Action Plan

In the case of a serious accident requiring patient transport to a medical facility:

- The closest ranking Operations Leader (i.e., Division Supervisor) at the accident scene will take charge and be the Point of Contact (POC).
- Use the 8-line protocol to assess patient; if patient evaluation is either red or yellow use **Dixie Fire Command Frequency Identified for the Division the IWI is occurring on**. Air extraction resources will use Air to Ground tactical or Air Ambulance EMS2.
- If incident should occur outside the Dixie/Jumbo Fires contact 911 and Dixie Communications on Command frequency for monitoring and support and to notify whether patient is incident personnel or civilian.
- Patients evaluated as Green notify nearest supervisor of the location of the incident and assigned EMT to determine treatment and transport to Medical Unit.
- Upon notification of a serious accident, the Following will report to the ICP Communications trailer: Incident Commander, Safety Officer, Operations Section Chief (Planning OPS), and Medical Unit Leader to monitor IWI. Safety Officer will notify Finance and/or Comp Claims of the IWI.
- Incident radio traffic will be monitored from 0500 to 2200 every day on Command at ICP.

Medical Incident Report – 8 Line

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment:

See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.
